TRUSTEES' REPORT.

To His Excellency, Albert G. Porter, Governor of Indiana:

SIR: The Board of Trustees of the Indiana Hospital for the Insane has the honor to make the following report for the fiscal year ending October 31, 1884.

Estimated value of real estate.....	\$1,407,150 00
Value of personal property	164,744 63
Total	<u>\$1,571,894 63</u>

THE REVENUE.

For maintenance as per appropriation	\$245,000 00
Of this amount there was expended for maintenance proper	213,665 47
Expended for permanent improvements paid out of appropriation for maintenance	7,628 75
Total expended	<u>\$221,294 22</u>
Leaving an unexpended balance of.....	<u>23,705 78</u>

REPAIRS.

For repairs as per appropriation	\$7,500 00
Amount expended for repairs.....	7,489 80
Unexpended balance.....	<u>10 20</u>

CLOTHING.

For clothing as per appropriation	\$12,000 00
Amount expended for clothing.....	9,223 15
Unexpended balance.....	<u>2,776 85</u>

SPECIFIC APPROPRIATIONS.

FOR FURNISHING DEPARTMENT FOR WOMEN.

Amount of unexpended balance of appropriation October 31, 1883.....	\$9,729 05
Amount expended	9,701 27
Unexpended balance.....	<u>28 38</u>

WAREHOUSE.

Unexpended balance of appropriation October 31, 1883, \$90.08. Expended, as per exhibit No. 6, \$90.08.

COAL SHEDS.

Unexpended balance of appropriation October 31, 1883, \$795.85. Expended as per exhibit No. 7, \$795.85.

The revenue from sales and donations during the year was \$753.67, which amount was properly covered into the General Fund of the State Treasury, as the law requires.

The daily average number of patients during the year was 1,207. The per capita expense per annum was \$177.02.

STATISTICAL.

The following shows the per capita expense for the last six years:

In 1879 per capita expenses for maintenance was.....	\$191 31
" 1880 " " " " " " "	184 64
" 1881 " " " " " " " "	184 97
" 1882 " " " " " " " "	194 00
" 1883 " " " " " " " "	194 00
" 1884 " " " " " " " "	177 02

The farm and garden products compare favorably with former reports. One item especially shows an unusual yield—that of net pork produced on the farm.

Total production of net pork produced during the year was 47,437 pounds, valued at 10 cents per pound, \$4,743.70. Cost of the young hogs, \$1,660.22. Net profits, \$3,083.48. The above amount was realized from slops alone.

We call your attention to the Superintendent's report, where can be found the practical results of the year. It is very satisfactory to the Board of Trustees, and compares favorably with former years.

We especially call your attention to the fact that the experiment of non-restraints, commenced more than a year ago, has proved to be a decided success. It is now demonstrated beyond successful contradiction, that a Hospital for the Insane can be managed without mechanical restraints, and the good effects from such treatment is incalculable. The patients well understand there are none in use in this Hospital, and have no fear of being locked in cribs or tied to stationary objects. They are more easily managed by having confidence in the kind treatment of the physicians and attendants.

Also, we call your attention to the abolition of alcoholic spirits from use in the Hospital as a remedial agent. But very few gallons have been purchased during the year, and none during the last half. It is believed by the Hospital management that spirituous liquors are detrimental to insane people, except in low cases of vitality, and then experience shows that other remedies are far more preferable.

It is a noticeable fact, that since its discontinuance the morals of the Hospital have improved.

The employment of a female physician in the Department for Women has proven to be very satisfactory. Certainly such should be continued so long as a skillful person can be found.

The Hospital has now a capacity for fourteen hundred and fifty patients, which is well nigh filled. With this large population, allow us to make known to your Excellency a few urgent needs :

We need the closing up of the street upon the north side of the Hospital. The extreme northern wards in the Department for Women are within a short distance of that street, which is rapidly becoming a thoroughfare. The passing of persons so near those back wards is very injurious to the patients. Also, the strip of the land between that street and the one immediately on the north.

The village of Haughville will soon extend over those few acres, and bring family residences uncomfortably close for the good of the patients in the Hospital. The land can be profit-

ably used for garden purposes, and can be purchased for less money now, than in the future. The cost will be a mere trifle, compared to the inestimable value to the Institution.

Also, the strip of land between the Hospital Park and the National road, on the south.

The necessities of such a purchase are fully set out in the Superintendent's Report, as is, also, the necessity of a special appropriation for an iron fence enclosing the Park.

With more than fourteen hundred patients to provide for, we estimate the amount of appropriation necessary as follows:

For maintenance, per annum.....	\$260,000
For repairs, per annum.....	15,000
For clothing, per annum.....	12,000

Special appropriation to complete:

Warehouse and coal sheds.....	3,000
Special for sewer.....	8,000
Total.....	<u>\$298,000</u>

You will observe that our estimate for repairs is much larger than the last appropriation. This is on account of the fact that the repairs are greater than when the Hospital was new, and there is no better proof that the former appropriation was insufficient, than the fact, that we found it necessary to take more than seven thousand dollars from the maintenance appropriation of last year, and use it to repair the roof, gutters, etc. It is the worst kind of economy to permit the buildings, which are worth more than a million of dollars, to become injured for the want of a few thousand to keep them in repair.

The health of the Institution has been unusually good. It is with pleasure that we report to you, that the Hospital is in excellent condition. The officers and employes have been faithful in the discharge of their duties. Superintendent Fletcher and his staff of physicians, are entitled to much credit for their faithfulness and efficient work.

Respectfully submitted,

THOS. H. HARRISON,
R. H. TARLETON,
P. M. GAPIN.

SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Hospital for the Insane :

GENTLEMEN—I present for your consideration the Thirty-sixth Annual Report of this Hospital.

NUMBER OF PATIENTS.

There were in the hospital at the beginning of our fiscal year, six hundred men and four hundred and ninety-six women.

ADMISSIONS.

During the year four hundred and three men and five hundred and five women were admitted, making a total of nine hundred and eight.

DISCHARGES.

Two hundred and eighty-four were discharged from the Department for Men and one hundred died. Eighty-nine from the Department for Women.

DEATHS.

Among the men there were eighty-one deaths, whilst among the women there were thirty-one, giving a total of one hundred and twelve deaths.

WHOLE NUMBER UNDER TREATMENT.

During the year we have had under treatment one thousand and three males, and one thousand and one females, total two thousand and four.

DAILY AVERAGE.

Average number daily, twelve hundred and seven. Expense *per capita*, \$177.

THE HEALTH OF THE INSTITUTION.

SMALL-POX.

We have fortunately escaped any serious epidemic disease, which was greatly feared owing to the crowded and general bad hygienic condition, which surrounds the old hospital, the Department for Men.

In March a case of confluent small-pox developed, and a few days after a second one, in malignant form; these were at once removed to the pest-house, where the latter died. The first case returned to the Hospital, to succumb to pneumonia a few months later. The effect of complete isolation and general vaccination was illustrated here, for the wards in which the cases occurred were completely cut off from the rest of the house for three weeks—every patient vaccinated or re-vaccinated—and no other cases developed.

RECOVERIES.

We have avoided using the word “cured” upon discharging patients; “recovered” or “improved” is quite enough. The large number of re-admissions to all the hospitals of this country shows how uncertain are the so-called cures. One case, that of a man who had epilepsy and homicidal mania, who appeared to suffer at all times excruciating pain in the head, was cured; I think, by trephining and removing depressed bone, (an inch and a half in diameter), which had been driven upon the brain by a fall from a house-top a year or two before. The relief was experienced as soon as the operation was over.

FEMALE PHYSICIAN.

In my last report I suggested the appointment of a female physician for the Department for Women, and shortly afterwards nominated Dr. Sarah Stockton for that position. I am pleased to report that results have shown the wisdom of that appointment in the general and special improved condition of the female patients under her charge. She has had to take charge of one division of the house as a general practitioner, and do all the special work for the whole establishment, and has given complete satisfaction in every capacity.

RESTRAINTS.

A year ago restraints by cribs, straps, anklets, hand-cuffs, collars restraint, chairs, camisoles, leather mittens, etc., were generally discarded, and gradually both patients and attendants have learned to do without them, and all parties agree that the Hospital is more home-like and comfortable in their absence.

Occasionally patients who disfigure themselves or pick their clothing to pieces with their fingers, have had to wear mittens made of bedticking. Occasionally a patient is shut up in his or her room. The year's experience has taught us that the patients thrive better without restraints, and that fewer patients are injured and less therapeutic restraint is required, and that with well-qualified, well-paid attendants none of the mechanical apparatus generally known as restraints would be required. To those who may point to two suicides and one homicide as the result of non-restraint, it would be well to remember that a like number have occurred in past years with the restraint plan in fullest perfection, and where in one instance a woman succeeded in strangling herself when locked in a crib. In the Department for Women, where there are more suicidal cases and where restraints have longest been discontinued, with fewer attendants, not an accident has occurred.

DISCONTINUANCE OF ALCOHOLIC BEVERAGES AS THERAPEUTIC AGENTS.

Many years of practical observation among the sick have convinced me that in diseases of the brain alcoholic stimulants were injurious rather than beneficial. Within the year their use has been gradually lessened, until since June last, no spirits, wine or malt liquors have been purchased or prescribed, save the alcohol or wines used in preparing medicines according to the United States Pharmacopia. Milk has been given without stint to the class of patients that formerly had stimulants, and with marked benefit; and, save in few cases of dipsomania, the preference was for milk. It is pleasing to note that at least one other Superintendent of a Hospital for the Insane has had a like experience. Dr. R. M. Bucke, of the London, Ontario, Asylum, says :

"During the year just closed no alcohol in any form has been prescribed at this asylum, either in sickness or health.

This is the second year during which our nine hundred patients have been total abstainers, and so far I have seen no case in which the administration would be beneficial."

THE WORK.

During the month of June the remaining eight wards of the Department for Women were completed and furnished, and are now occupied. By this additional room we have been able to gather in nearly, if not all, the chronic insane women of the State who applied for admission, thus giving comfortable homes to many who were utterly neglected and cruelly treated. This class of cases is not desirable for a grand showing in statistical tables of "Recoveries," and are proper inmates for an asylum rather than a hospital. In this connection I would state that it is my belief that, through some error in the enumeration, the census of 1880 leads to a false conclusion, and that is, that we have an insane person in every 500. According to the law creating our State Bureau of Statistics, it is the duty of that officer to report each year the number of insane persons in each county to the Superintendent of this Hospital, and from this source I gather the information that there are 508 persons outside the Hospital, and it is likely that an analysis of these cases would show that many of them are not proper subjects for treatment, being idiotic or epileptic, for which our law makes no provision.

The work upon our farm and garden has been successful beyond expectation, giving healthful employment to many patients.

Our florist has extended his labors by ornamenting new plots of ground, increasing the capacity of the greenhouses, building new arbors, and, above all, keeping every ward in the Department for Women well supplied with beautiful blooming and foliage plants.

During the summer it became apparent that the roofs of both buildings were sadly in need of repair, and in the Department for Men it was absolutely necessary for the protection of the lives and comfort of the inmates, as well as protection of property, to make expensive repairs upon roof, cornice and foundation. From the Department for Women all the down spouting had to be removed and new supplied. Extensive changes were required in the bath-rooms, sinks and water-

closets. All of which has greatly increased our expenses above the meager repair fund which was appropriated four years ago. To pay for this we have had to draw liberally upon our surplus maintenance fund, which was done upon advice of the Attorney General.

Within the wards the physicians, matron, supervisors and attendants have been making an endeavor to render each ward more and more pleasing and homelike than before, and yet this work is in its infancy. Industries of various kinds, and instruction of some sort, are required among the more chronic patients, whilst a greater variety of amusements should be furnished for all.

Instead of returning each year a large sum back into the Treasury—which the Representatives of the State have generously appropriated for the care and treatment of our insane—would it not be better to use the whole sum for the advancement of newer methods of treatment? I cannot believe that the return of \$26,492.83 back into the State Treasury has given the people of the State any more satisfaction, or as much, as if that sum or a portion of it had been expended in industrial schools, musical instruments, books, gymnasiums and amusements, or in paying for teachers and instructors.

WHAT IS WANTED.

I desire to call your attention to the fact that we have a population of more than seventeen hundred persons, living in two houses situate upon one hundred and sixty acres of land; that two villages have grown up, one on the north, one on the south of the Hospital farm, and are now growing so rapidly that in five years we will be surrounded. On the south boundary, a strip of land but fifty feet wide, originally cut off from the Hospital farm, is now built up compactly with frame cottages, hedging in our south front, their back view giving us the benefit of their privy vaults, pigs and poultry. This strip of ground terminates with a toll-gate situated at our gate-way, which levies tributes on the State and all who visit the Hospital except on foot.

The Street Railway terminus is in the center of the Hospital grounds, and people going to and from the city from the north, make the State grounds a common thoroughfare. We have no other than a most common wooden fence, four and one half feet

in height, to keep our patients in and the public out. Our farm and garden are open to public and private pillage. The loss by this means is very great, and becoming more so every year.

The extension of Vermont street from the city passes within forty yards of the north wing of the Hospital building; in other words, brings our back wards, which should be most secluded, within sight and conversational distance of a street, which in a few years, will likely be occupied by dwellings, factories, saloons, etc. As a Board of Trustees, in the interests of the State, and in the interests of those whose recovery depends upon a quiet retreat, I beg of you to appeal to the coming Legislature, through the Governor, to condemn the strip of ground on the south and the street north, then make an appropriation sufficient to enclose the whole place with a permanent iron fence, which will permit the patients to wander at will within, and protect the State's property from without.

The most urgent claim that the Hospital has upon the State is, that a new and perfect sewer be constructed; the old one being principally made of porous cement pipe and brick; the cement pipe, by the action of acids, is constantly crumbling away, and our kitchen, which is in a basement, is overflowed with corrupt sewerage, whilst the wards are filled with poisonous gases endangering the lives of the inmates every day.

A careful survey and report upon this subject drawn by an expert sanitary engineer is appended. With the completion of the Women's Department and the great increase of population, it was found that in the laundry it is nearly impossible to keep the work up. An extension of the same building is required to do the work with economy to the State.

The last Legislature provided for the building of a coal shed at each of the buildings, also, a much-needed store room, bakery, etc. Through some mis-interpretation of the act, the sum was insufficient to the completion of either structure. The store room, a brick structure, is now under roof and not much damaged, but the coal shed merely reached the erection of the frame, and by exposure for eighteen months is about in ruins; it is hoped that the store room will be provided for at once, that we may have lodgings for a large number of our employes who are stowed away in uncomfortable quarters. The cornices, gutters, dormer windows, towers and spouting of both buildings will require painting, as the tin and galvanized iron work are now becoming much corroded and leaking.

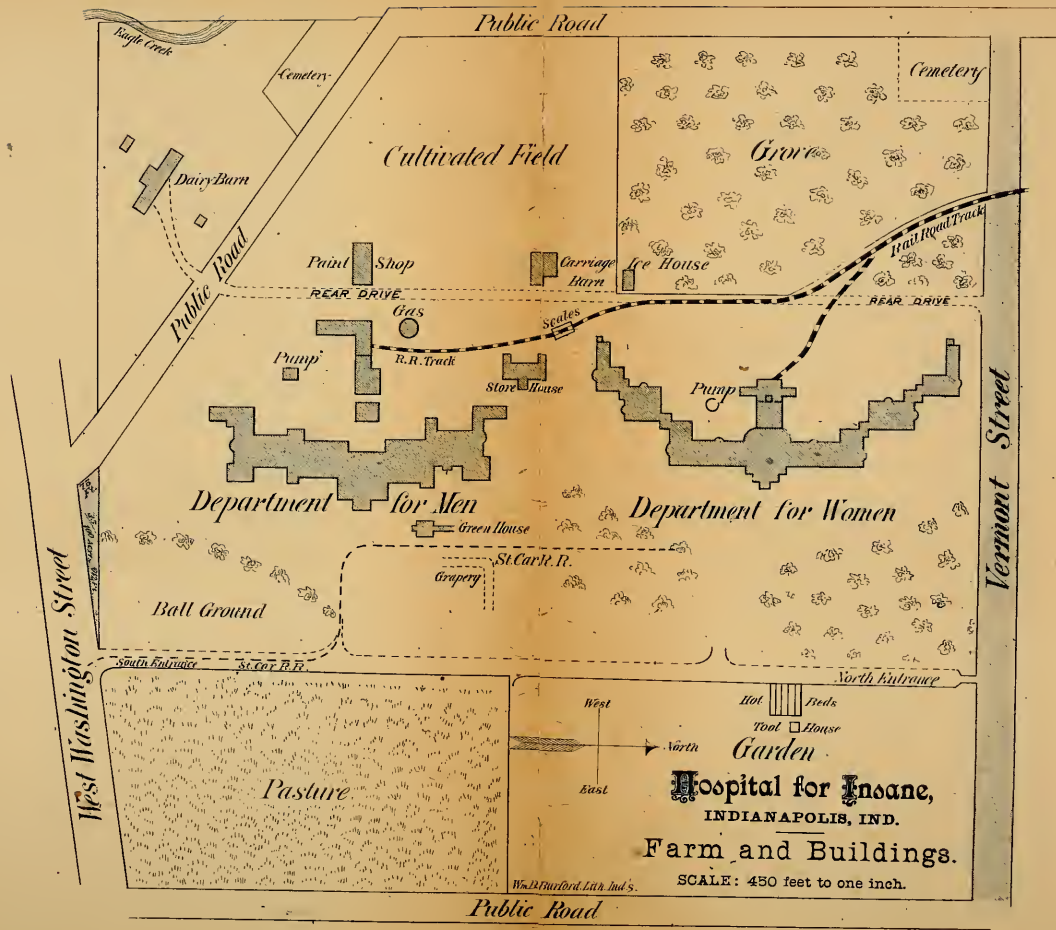

in height, to keep our patients in and the public out. Our farm and garden are open to public and private pillage. The loss by this means is very great, and becoming more so every year.

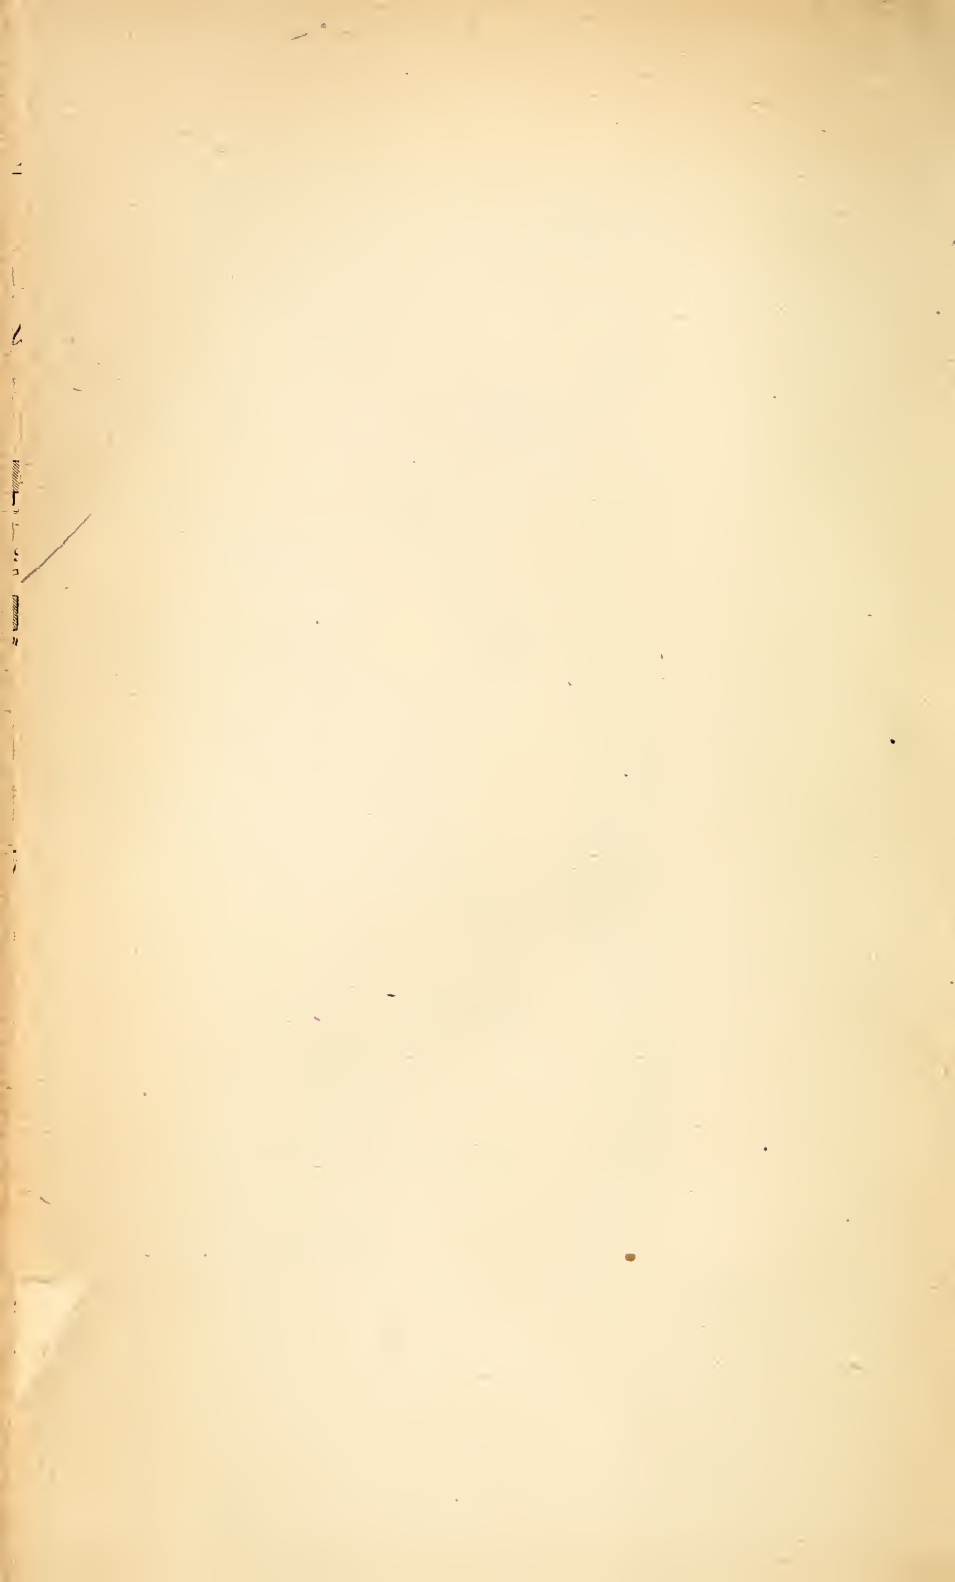

The extension of Vermont street from the city passes within forty yards of the north wing of the Hospital building; in other words, brings our back wards, which should be most secluded, within sight and conversational distance of a street, which in a few years, will likely be occupied by dwellings, factories, saloons, etc. As a Board of Trustees, in the interests of the State, and in the interests of those whose recovery depends upon a quiet retreat, I beg of you to appeal to the coming Legislature, through the Governor, to condemn the strip of ground on the south and the street north, then make an appropriation sufficient to enclose the whole place with a permanent iron fence, which will permit the patients to wander at will within, and protect the State's property from without.

The most urgent claim that the Hospital has upon the State is, that a new and perfect sewer be constructed; the old one being principally made of porous cement pipe and brick; the cement pipe, by the action of acids, is constantly crumbling away, and our kitchen, which is in a basement, is overflowed with corrupt sewerage, whilst the wards are filled with poisonous gases endangering the lives of the inmates every day.

A careful survey and report upon this subject drawn by an expert sanitary engineer is appended. With the completion of the Women's Department and the great increase of population, it was found that in the laundry it is nearly impossible to keep the work up. An extension of the same building is required to do the work with economy to the State.

The last Legislature provided for the building of a coal shed at each of the buildings, also, a much-needed store room, bakery, etc. Through some mis-interpretation of the act, the sum was insufficient to the completion of either structure. The store room, a brick structure, is now under roof and not much damaged, but the coal shed merely reached the erection of the frame, and by exposure for eighteen months is about in ruins; it is hoped that the store room will be provided for at once, that we may have lodgings for a large number of our employes who are stowed away in uncomfortable quarters. The cornices, gutters, dormer windows, towers and spouting of both buildings will require painting, as the tin and galvanized iron work are now becoming much corroded and leaking.

The Department for Men is an old building and has been badly used; (it has been condemned in the lower wards as a place for patients for the past twenty years by various Legislature commissions); each administration putting off the requisite repairs from year to year, leaving it for a new appropriation—or having insufficient appropriation—until it is in a dilapidated condition in some parts. If it was private property, no owner would let it become so, and it is poor economy in the State to let her property decline. The halls and chapel of the Department for Women have never been fully furnished. A large organ or piano should be placed in the latter, and half a dozen small organs put in the wards. Nothing gives so much pleasure, amusement, and benefit to the patients as music.

The law, which relates to the conveyance of female patients of this institution, should be changed.

The women to be sent is frequently adjudged insane by a commission, who secretly, or under some false pretense, examines her case, and without warning, a sheriff or his deputy suddenly arrests, and sometimes binds the patient, conveying her, she knows not what for nor whither. She is brought here frequently after a long journey, in a worse state than before, and one from which there is less chance of recovery.

I would suggest in all such cases when the patient can not be brought by her friends, it should be the duty of the Superintendent to send a skilled female attendant from the Hospital for such insane person.

CHANGES.

During the year several changes have taken place on this Hospital Staff by resignation.

First, the resignation of Dr. J. N. Smith, who removed to Florida to enter other fields of usefulness. Next the resignation and death of Dr. T. Davenport, by which the State lost a most honorable citizen and a physician of high standing, who was loved by all who knew him. And last the resignation of Dr. W. E. Brandt.

Dr. A. J. Thomas succeeded Dr. Davenport as First Assistant Physician in the Department for Men, with Dr. Clarence B. McClure as his assistant, and Dr. W. G. Browning as *interne*, while Dr. J. R. Brown took Dr. Thomas' place in the Department for Women, and Dr. Sarah Stockton was appointed to the vacancy made by the resignation of Dr. Smith.

November 1st, of last year, Captain M. L. Stansbury, book and store keeper, a valued and efficient officer, resigned, and was succeeded by J. S. Hall.

I append the statistical tables that I consider of importance to give information to the people, and leave out a large number that usually appear in reports of similar institutions, because they are of no value to the general public and to the profession, and but further proofs of the fallacy of statistics, the plan formerly agreed upon by the Association of American Superintendents of Insane Hospitals being discarded by a large number of its members.

Throughout the year we have had regular services in the Chapel, conducted by Chaplain John Kidd, who also has devoted much time to various forms of entertainments for the patients.

To a large number of charitable and kindly disposed persons all over the State we are indebted for packages of books, magazines, etc., which have contributed largely to the amusement of the inmates.

In conclusion, I desire to return my thanks to the officers and employes of the institution for their uniform courtesy and zeal in the good work that has engaged them during the past year.

Respectfully submitted,

W. B. FLETCHER,

Superintendent.

REPORT OF CIVIL ENGINEER.

DR. W. B. FLETCHER,

Superintendent of Hospital for Insane, Indianapolis, Ind:

SIR—Having been appointed by you to examine the sewers and drains pertaining to the Hospital, and to report plans and estimates for correcting evils arising from faulty drainage, I have the honor to submit the following report for your consideration :

I find that there are in operation two main sewers uniting near the bank of Little Eagle Creek, and having one common outlet. The one for the Department for Men being constructed of brick, and that for the Department for Women being built of concrete or cement pipes. In both cases the drains from the buildings to the sewers are cement pipes. The sewers, as far as examined, are each from eighteen inches to two feet in diameter, and appear to be in a sound condition. The fact that there is no record or marking by which the drains can be traced has made the examination difficult and unsatisfactory.

In enumerating the causes which produce the evils complained of, namely, the sluggish action of drains, and the pollution of the rooms by sewer gas, I call attention to the following observations:

First. The crushing in and filling up of drains constructed of cement. The chemical action of house sewage, which, in the case of the Hospital is often charged with strong medicines of various kinds, slowly but surely destroys these pipes. The trouble from this source seems to be greater near the buildings, and to decrease as the sewage becomes diluted with large quantities of water. It is only a matter of time as to the failure of all cement pipes used for conducting sewage wastes. It may not be out of place here to say that formerly, especially in England and Germany, sewers constructed of concrete and cement

were held in high repute, when made of the best material, but experience in this country with similar pipes as ordinarily made has led sanitary engineers to regard them as unsafe, either for public or private sewage purposes.

Second. The pipes connecting the buildings have, in several cases, too little fall or descent towards the sewer, so that the pipes do not discharge their contents readily, and often become choked. Especially is this the case with the drain from the general kitchen of the Department for Men, and with the most of the drains of the Department for Women. A survey of these drains develops the fact that the fall is only from one-third to one-half what it should be, while that of the large sewer is much greater than is necessary to serve the desired purpose.

Third. The ventilation of the drains has been almost entirely neglected. There are some openings made near the buildings for the purpose of repairing the drains, which afford some ventilation, but they are so near as to be detrimental to health by reason of the foul air emitted.

The ventilation of sewers and drains is an important matter, for the following reasons: The temperature of the air in the drains undergoes sudden changes by reason of the entrance of hot and cold water alternately. This produces unequal air pressure in the drain which will seek relief at the point most easily forced, which point is the water-sealed trap which is supposed to protect the house from drain air. In this way a greater or less quantity of sewer gas finds its way into the dwelling. Again, there is always more or less decaying matter adhering to the pipes, the product of which, if permitted to immediately pass off through ventilators, gives an additional means of keeping the pipes or drains clean.

With these defects in the drainage of the Hospital buildings in view, we are now prepared to discuss the matter with reference to the course it is best to pursue in order to correct existing evils.

By means of levels taken for the purpose, I have found that neither sewer is deep enough, opposite the building, to afford good drainage from the general kitchen of the Department for Men. The drains connecting this department with the brick sewer must be renewed because of their imperfect state of preservation, and continual decay and failure.

The sewer for the Department for Women fails for the reason that it is not deep enough opposite the apartments to allow the drains to be laid with sufficient grade to be self-cleansing. Were this sewer located correctly for the required work, the wisdom of trusting to it would be questionable, because of its liability to fail through the corroding effects of sewage, as has already been demonstrated in the case of the smaller drains.

It seems impossible to use either sewer as it is now laid, and through it secure good drainage for both buildings. I have, therefore, made surveys with reference to the best course for a new and separate sewer which may serve for the perfect drainage of both buildings, and have determined upon the line as shown upon the drawings annexed to this report. The outlet will be only a few feet from the outfall of the present sewer, taking a straight course from this point to the rear of the Department for Men, thence running north, as shown upon the plan. This will be shorter than either of the old sewers, and will serve for both buildings. The profile of this line, showing length, gradients and depth of cut, is also hereto attached.

The material for this sewer should be the best quality of vitrified salt-glazed sewer pipe, securely jointed and laid in the best possible manner. The size recommended is fifteen inches, inside diameter for the first fifteen hundred feet, and ten-inch pipe for the remaining distance.

The sewer is located so that drains which discharge into it shall have a grade of not less than one in fifty. All drains must be of the best salt-glazed socket pipe and must be trapped either inside or outside the building. Special attention should be given to junctions and joints. The whole system should be well defined and so located and marked upon the ground that the drains can be traced at any subsequent time.

For the ventilation of the system, a three-inch iron pipe should be connected with each drain just before it enters the building, which pipe should be continued up the side of the building until it reaches a point where its current will not enter any apartment of the building. The aim in work of this character should be to secure perfect material and have thorough work done in every detail.

Work done according to the plan I have described will, I believe, secure the following results:

First. With the water supply and means of flushing at hand the drains will be kept clean, and a quick removal of all wastes from the buildings will be secured.

Second. The ventilating pipes at the head of the drains in conjunction with the ventilator of the sewer shown on the profile at station 900, will maintain an equilibrium of the air in the drains, thus avoiding the forcing of traps which in unventilated drains often takes place.

Third. A permanent and lasting material, and a system which will seldom fail or get out of order.

Fourth. A record of the position and size of all drains so that when any trouble occurs, it can be found with the least possible expense and delay.

I here give a tabulated statement of the length of drains and size of pipes required on the work, together with estimates of their cost, and also other material and work which will be necessary to complete the system. The drawings give in themselves information which is to be regarded as a part of this report.

ESTIMATE OF SEWER PIPE REQUIRED.

The letters refer to lines which connect directly with the sewer. The numbered lines under the lettered lines are branches which connect with those that are lettered. The blue figures on the plat indicate the length of that line. The red figures show the number of feet to junction.

THE

INDIANA INSTITUTION

FOR THE

EDUCATION OF THE DEAF AND DUMB

THE FORTY-FIRST ANNUAL REPORT

OF THE

BOARD OF MANAGEMENT AND THE SUPERINTENDENT.

FOR THE

Fiscal Year Ending October 31, 1884.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1885.

EXECUTIVE DEPARTMENT,

DECEMBER 6, 1884. }

Received, December 6, 1884, examined by the Governor, referred to the Auditor of State for verification of the financial statement and delivered to the Secretary of State, to be filed and preserved in his office and published pursuant to the order of the Board of Commissioners of Public Printing.

FRANK H. BLACKLEDGE,

Private Secretary.

Filed in my office December 6, 1884.

W. R. MYERS,

Secretary of State.

THE INDIANA INSTITUTION FOR THE
EDUCATION OF THE DEAF AND DUMB,
INDIANAPOLIS, IND., December 6, 1884. }

To His Excellency, ALBERT G. PORTER,
Governor of the State of Indiana:

In compliance with the law, and by direction of the Board of Trustees, I have the honor to lay before you the annual report of the Board, and of the Superintendent of the Institution for the Education of the Deaf and Dumb, for the fiscal year ending October 31, 1884.

Respectfully submitted,

M. JAMES, *Secretary.*

BOARD OF MANAGEMENT.

PRESIDENT,

THOMAS H. HARRISON, M. D.

TRUSTEES,

M. JAMES, M. D., Secretary.

S. E. URMSTON, Treasurer.

EDUCATIONAL AND BUSINESS DEPARTMENT.

SUPERINTENDENT,
WILLIAM GLENN.

INSTRUCTORS,

FRED. MINTER,
Lessee of the Chair Shop.

KATE GORMAN,
Mistress of the Sewing Room.

JOHN RIEMAN,
Florist.

REPORT OF BOARD OF TRUSTEES.

To His Excellency, ALBERT G. PORTER, .

Governor of Indiana:

SIR—The Board of Trustees of the Institution for the Education of the Deaf and Dumb has the honor to submit to your Excellency the following report for the fiscal year ending October 31, 1884:

FINANCES.

The inventory made on the 31st of
October, 1884, shows—

Real estate.....	\$457,700 00	
Personal property.....	38,050 99	
Total.....		\$495,750 99

FOR MAINTENANCE.

Amount appropriated for maintenance Nov. 1, 1883, was.....	\$56,200 00	
Amount expended for maintenance, in- cluding salaries of Trustees	53,320 60	
Unexpended balance.....		\$2,879 40

REPAIRS.

Total amount appropriated.....	\$3,000 00	
Total amount expended.....	2,184 87	
Unexpended balance.....		\$815 13

EARNINGS AND CLOTHING.

Amount received from articles sold	\$57 41	
Amount received from counties on ac- count of clothing furnished to pupils	761 42	
Total.....		\$818 83

RECAPITULATION.

RECEIPTS.

For maintenance	\$56,200 00	
For repairs	3,000 00	
For earnings	57 41	
For clothing furnished	761 42	
Total		\$60,018 83

DISBURSEMENTS.

For maintenance	\$53,320 60	
For repairs	2,184 87	
Total		55,505 47

Unexpended balance	\$4,513 36
--------------------------	------------

Which amount was properly covered into the General Fund of the State Treasury, as required by law.

We call your attention to the Superintendent's report for a detailed statement of the year's work, which is herewith transmitted. It is full and complete.

The amount of appropriation heretofore made, namely, \$55,000, is not sufficient to obtain satisfactory results. Therefore, we ask that an appropriation of \$65,000 be made for maintenance.

For the want of a sufficient repair fund the Institution is not in a good state of repairs. The boilers are worn out and are not considered safe. They have been in use for about fifteen years. An estimate has been made by competent persons as to the cost of putting in new boilers, and it can not be done for less than \$2,500.

Considerable repairs are needed on the engine, which will probably cost \$500. The distributing water-pipes must be taken out and new put instead.

The steam apparatus for heating is worn out, which necessitates the purchase of a new one.

The Institution virtually has no barn for the stock. A new brick barn is recommended by the Superintendent. The above named repairs, including the current monthly repairs, will cost \$15,000 for the first year of the biennial term, after which the usual appropriation of \$3,000 for current repairs will be sufficient.

With the assurance that the same care and economy will be continued, as for the two years just past, the Legislature will be justified in making such appropriations.

We call the attention of your Excellency to the fact that a large number of deaf and dumb children make application for admission to this Institution that must be refused for the want of sufficient room. More than a hundred are deprived of the advantages of an education. Every one will readily see how difficult it is for the officers of the Institution to discriminate between these unfortunate children. The only principle which should govern them is to give every one an even chance in the race of life as nearly as possible. The noble aims and purposes of the Institution are not fully realized, because a large per cent. of that class of unfortunates are excluded for the want of facilities. We believe it is the duty of the Legislature to take immediate steps to remedy this wrong.

The Legislature in 1883, by special act, empowered the Board of Trustees to convey a certain strip of land, seven feet in width and over twelve hundred in length, to the Chicago, St. Louis and Pittsburg Railroad Company. The conveyance was conditionally made, providing that said railroad make and perpetually keep in repairs an iron fence running between said railroad and the park of the Institution. Also, to cover the shops belonging to the Institution with slate, and make other necessary improvements, all of which are to be kept *perpetually* in good repairs, at the cost of the railroad. If, at any time the conditions of the contract be not complied with, said strip of land reverts back to the State of Indiana. The improvements have all been made to the satisfaction of the Board of Trustees.

In conclusion, allow us to commend the Institution with all of its interests to your favor, believing as we do, that, notwithstanding the many cares of State, it shares in your estimation an even place with all the other great charities of our Commonwealth.

Respectfully submitted,

THOMAS H. HARRISON, *President.*

MILTON JAMES, *Secretary.*

STEPHEN E. URMSTON, *Treasurer.*

REPORT OF THE SUPERINTENDENT.

To the Board of Management:

GENTLEMEN—The law of this State requires the business and financial year of the Benevolent Institutions, and the reports thereof, to correspond with the fiscal year of the State Treasury, which begins on the 1st day of November and ends on the 31st day of the following October. This year includes a part of two school terms of this Institution. And the law also requires the Superintendent to report to the Board of Trustees the number of inmates (pupils) received and the number discharged during the fiscal year, and for this reason, by complying with the law, the number of pupils reported as received, enrolled and under instruction during the year is greater than the number of pupils in the Institution at any one time during the same year, since a part of those in the Institution at the beginning of the fiscal year are dismissed at the close of each school term in June, and a number of new pupils are admitted to the Institution at the beginning of the next school term in September following. This will explain a seeming discrepancy between the number of pupils in the Institution at any particular time and the number received and instructed therein during the year.

I beg leave, therefore, to report that the number of pupils admitted to, enrolled, and having received instruction in this Institution during the year ending October 31, 1884, was as follows:

Boys	205
Girls.....	169
Total	374

Of this number there were dismissed at the close of the school term in June 37, removed by death within the year 1,

total 38; leaving enrolled and entitled to the privileges of the Institution 336; and of these, the number that did not return to the Institution at the school term beginning in September was 17, leaving in attendance at the close of the year 319, and divided as to sex as follows: boys, 169; girls, 150. The number of new pupils received into the Institution during the year was 57, and of these pupils admitted there were, boys 37, and girls 20.

The causes of dismissal of pupils during the year were as follows: Graduated from the Academic Department, 7; dismissed from grades in Primary Department upon expiration of time, 22; left the State not to return, 3; taken home by friends to remain, 3; went home without permission and not returned, 1; sent home on account of incapacity to receive an education, 1; and died within the year, 1; making the whole number of pupils who have ended their connection with the Institution within the year, 38; of these, 24 were boys and 14 girls.

As the law requires the Superintendent to report to the Board not only the number of pupils received and dismissed during the year, but also the counties from which they came, I beg leave to refer you to a tabulated statement in a subsequent part of this report, showing the number of pupils received from the several counties of the State, and the number dismissed from each, and the number remaining and entitled to the benefits of the Institution; and also to the accompanying catalogue containing the names of the pupils received into the Institution within the year, and the counties and towns where they reside. From these it will be seen that pupils have been admitted during the year from eighty-six of the ninety-two counties in the State, showing that all parts of the State have been fairly represented in the Institution, and received its benefits and advantages without partiality.

THE HEALTH

And hygienic condition of the Institution during the year have been good.

When it is remembered that nearly four hundred persons reside within the narrow boundaries of these buildings for nine months of the year, including the most sickly seasons in

this climate, and that nearly all of these are children who have come here with physical systems vitiated by former disease, or hereditary taint, which has deprived them of the sense of hearing and the power of speech, it certainly should stand to the credit of the Institution and its management that but a single death has occurred within twelve months, and that of a new pupil who, doubtless, entered the school with the incipient disease in her system of which she died in less than a month after she came to the Institution. For the purpose of more fully imparting information on the health of, and the diseases incident to, the pupils of this Institution, by permission, I incorporate in this report an article written for and published in the August number of the Indiana Medical Journal, by John E. Lockridge, M. D., one of the physicians to this Institution since May, 1879, in which he makes a careful and critical review of the subject, giving facts and statistics, with deductions therefrom, worthy of study and consideration by all who have the care, and are responsible for the welfare of these unfortunate children. The article covers a period of five years preceding the 1st day of July, 1884, and will be found in the appendix.

One death occurred within the year.

Salinda S. Moore, of Titusville, Ripley county, was admitted to the Institution September 24, and died October 20, 1884. She was in feeble health when she entered the school.

THE EDUCATIONAL

work of the year has been done with conscientious fidelity by the teachers, and generally with sincere earnestness by the pupils.

There has been a progressive development of the intellectual powers, of the moral sense, and a general acquisition of knowledge, not perhaps in every case to that degree that could be desired, but in the main to that extent which fully warrants the conclusion, that the year's efforts to educate the children under instruction have been crowned with success.

However much reason we may have to congratulate ourselves upon the results attained in the education of the deaf and dumb by the method pursued in this Institution, yet, there is a mingling of sorrow in our gladness when these pupils leave

their *alma mater* to take their places in society without the gift of oral language, and without the ability to understand the language of others.

Can the deaf and dumb be taught to speak, and to understand language from the lips of others? This question, throughout Europe, and to some extent in this country, is receiving an affirmative answer, not only theoretically but also practically.

The oral method of instructing the deaf and dumb is rapidly superseding the sign method, where used, in the European schools, and it will sooner or later become the method in the schools of this country.

As german to this subject, I submit the following extract from an address delivered May 31, 1881, by Julius Tarra, Sac. Cav., Director of the Institution for Indigent Deaf Mutes, Milan, President of the International Congress of 1880, etc., who, having tried the "sign," the "combined" and the "pure oral" methods, has found by experience the last by far the best for the born deaf as well as for the semi-deaf and semi-mute:

"All the deaf mutes of our Province, instructed by the pure oral method, speak in an intelligible manner, and understand the speech of others by reading their lips.

"The result of this method, far from being inferior, is for the generality of pupils, superior to that which is afforded by all other methods put together.

"The deaf thus instructed, thanks to their intercourse with society, not only keep up spoken language and the knowledge thereby acquired in the course of instruction, but continue to develop and extend the use of it.

"These three facts attested by the 254 teachers of deaf mutes collected from all civilized countries at the Congress of Milan last autumn, have given, by the almost unanimous vote of these teachers, a complete victory to the pure oral method. In the presence of these facts, all discussions have ceased, serious objections have of themselves disappeared, and the long struggle between the systems has ended. Never, perhaps, has a scientific victory been proclaimed with less opposition; never, perhaps has a resolution so grave, so important, been more prompt, more earnest, more efficient. In fact, the accounts, which reach us from all parts, inform us that several schools in France and England, acting on the resolutions of the Congress, vigorously employ the method voted the best."

The following extract from an address delivered October 31, 1883, before the Philosophical Society, of Washington, D. C., by Alexander Graham Bell, Ph. D., relates to the same subject, and I take the liberty to use it here to show that the general trend of sentiment of those interested in the work of deaf mute education is strongly towards the oral system :

"It is only within the last fifteen years or thereabouts that schools have been established in the United States where all the deaf children admitted are taught articulation and speech-reading; but such schools are rapidly increasing in number. Still, it is not generally known that the experimental stage has passed, and that all deaf mutes can be taught intelligible speech. This is now done in Italy and Germany, and the International conventions of teachers of the deaf and dumb held recently at Milan and Brussels have decided in favor of articulation for the deaf."

If it be admitted, then, that the oral system is the best for the education of the deaf and dumb, or of a large number of them even, the questions will present themselves for the decision of those who may have the management of this Institution. Shall a change of the system of instruction be made? When and how shall it be made? This is a subject that demands earnest and careful consideration by the Trustees, as well as by the Superintendent of the Institution.

If there is a better system of educating the deaf and dumb, than the one practiced here, they are entitled to its benefits and advantages, and it will not satisfy their just demands to say that the present system has done well for forty years, and may do well enough for all future time. This Institution should keep step with the progress of the age, and as the world moves onward, the Institution should press forward to higher attainments in the education of the deaf and dumb of the State.

Should a change be decided upon, then, concomitant subjects of importance will arise for consideration and determination, which are not necessary to be presented to the Board at the present time, nor in this report.

THE INDUSTRIAL

Department has been carried on as successfully and satisfactorily as the circumstances and limited means would permit. Within the year forty boys have received instruction in cabi-

net making, twenty in shoe making, eighty-five in chair caning, and the others have been employed in miscellaneous work about the buildings and upon the grounds. The girls have received instruction, and performed their work faithfully in the sewing room, the ironing room and in light chamber work.

I will repeat here a part of my last annual report, as the same necessity and conditions exist now as they did then. "This Department of the Institution is too limited to afford proper opportunities and facilities to carry on the education of the pupils as fully as it should be, and, therefore, one or more additional branches of industry should be established as soon as circumstances will permit."

To do this a new building should be erected near where the shops stand, of sufficient capacity for at least two or three new lines of industry, a power room with new and proper machinery, new engine and boilers sufficient to supply the necessary power, and to heat the building by steam. The machinery should be removed from the building now occupied by it, and the building should be converted into a carpenter and repair shop, and the present shop should be removed, as it enhances the danger of fire breaking out.

Each industrial branch should be under a skilled and competent instructor, who should receive a salary sufficient to justify him in devoting his time and abilities to the mechanical education of the boys under his charge.

IMPROVEMENTS AND REPAIRS.

During the vacation the broken and injured stucco upon the front building was thoroughly repaired; the two shop buildings, greenhouse, two other outbuildings, the fence inclosing the north and west sides of the park, the woodwork in the help's dining-room, the kitchen and bakery, were painted. The slate roofs, down spouts and gutters of the buildings were repaired, also the plastering on the inside of the buildings; and all inside walls and ceilings not papered or painted, were whitewashed; the arches of the oven in the bakery were repaired, and a part of the walls of the washhouse were taken down and rebuilt. The walls and ceiling of the office were repapered, and new carpets were laid in the office and five of the private rooms, and a new fire-proof safe has been placed in the

office; a new piston and piston-rod and valve-rod have been put in the large force-pump, and a new cylinder put in one of the supply pumps. Numerous other minor repairs have been made during the year, to which your attention has already been directed.

The Chicago, St. Louis & Pittsburg Railroad Company, in exchange for a narrow strip of ground adjacent to their road-bed, put up a good and substantial iron fence, separating the grounds of the Institution from the railroad tracks; also the company removed the shingled roofs from, and put slate roofs upon the shop buildings, and built a high close board fence on the east line between the Institution grounds and the grounds of the company.

IMPROVEMENTS NEEDED.

On this subject I will renew my recommendations contained in my last annual report, as the same improvements are needed now as then:

“The necessity for additional buildings for the accommodation of the increasing number of pupils, to which attention has heretofore been called, still exists; no appropriation therefor having yet been made by the Legislature, nothing could be done but wait until the required means to erect and complete the buildings may be provided. A new brick barn should be built to take the place of the present frame one, which is old and not well adapted to the purpose for which it was intended. Some more new fences are needed upon the farm. Two of the steam boilers have been in use about fourteen years, and it would be advisable to put new ones in their place. The pipes for distributing water through the buildings are old and about worn out, and the entire system should be renewed, as should also the steam heating apparatus throughout the buildings. A new greenhouse will soon have to be built, and additional shop room should be provided to establish other branches of industry for the instruction of the boys. These are the most important improvements needed now, and your attention will be called to others as the necessity for them may demand.”

FINANCIAL AND BUSINESS TRANSACTIONS.

I deem it necessary to submit only a very brief summary of the financial and business transactions of the year, and refer you to the detailed and itemized statements in the succeeding part of this report for such further information as you may desire.

RULES AND REGULATIONS

—FOR THE—

ADMISSION OF PUPILS.

I. The Institution is open to all the deaf and dumb of the State, of suitable age and capacity for receiving instruction, free of charge. For the present, and until additional accommodations shall be provided, boys can be admitted only between the ages of twelve and twenty-one; and girls between the ages of ten and nineteen.

II. Pupils will be admitted on the following conditions: 1. The pupil, well provided with clothes, is to be brought to the Institution punctually at the commencement of each session, unless detained at home by his or her sickness. 2. The pupil is to remain in the school until the last Wednesday in June in each year. 3. No parent or guardian shall be allowed to take a pupil out of the school in session time without assigning satisfactory reasons.

III. The annual sessions of the school commence on the first Wednesday after the 15th day of September, and close on the last Wednesday of June. *Every pupil is to come promptly on or before the first day of the session, and is to remain until the last day of the same. The only exceptions allowed are cases of sickness.*

IV. The Institution will provide for each State pupil, regularly admitted, boarding, lodging, washing, superintendence of conduct, manners and morals, medical attendance, instruction, school books, slates, and all other incidental expenses of the

school room, without charge, but will not pay the traveling expenses of pupils in coming to or returning from the Institution, nor supply them with clothing.

V. Those who are unable to pay for the necessary clothing, or whose parents neglect to supply them, it is made the duty of the Superintendent to furnish in accordance with the following legislative enactment: "That when the pupils of the Institution for the Deaf and Dumb are not otherwise supplied with clothing, they shall be furnished by the Superintendent, who shall make out an account therefor, in each case, against the respective counties from which said pupils were sent, in an amount not exceeding forty dollars per annum for every such pupil, which account will be signed by the Superintendent, and attested by the seal of the Institution for the Deaf and Dumb, and the Treasurer of State shall charge the account thus certified to the county from which the pupil was sent, and collect the amount due from such county at each settlement with the Treasurer thereof, and such moneys shall be covered into the general fund of the State Treasury." [Act March 6, 1879.]

"Sec. 3. When such account shall be received by the Treasurer of the proper county (to whom it shall be immediately sent upon its reception by the Treasurer of State from the Superintendent), such County Treasurer shall cause the same to be paid out of the county treasury to the Treasurer of the State; and such County Treasurer shall collect the amount of such account from the estate of such pupil, if he have any, by suit, if necessary, in the name of the county."

VI. Each applicant for admission should come well supplied with clothing, and on all articles on which it is possible to mark the name of the pupil, it should be written with indelible ink. In all cases, except those clothed by the county, besides the ordinary supply of clothing, the applicant should deposit with the Superintendent a sum not less than five dollars, to defray incidental expenses, repairs of shoes, etc., any part of which remaining unexpended at the close of the session will be returned. Each pupil should be supplied with a trunk.

VII. The Institution is not an asylum, but a school of learning; hence no one can be admitted or retained as a pupil, who, from sickness, or from other cause, is unable to pursue his or her studies successfully.

VIII. The course of study in the Primary Department

embraces spelling, reading, writing, arithmetic, geography and grammar, and ordinarily requires seven years to complete it. All the pupils who wish it, and who will avail themselves of it, are allowed the full benefit of this course of study.

IX. For the benefit of those who wish to qualify themselves for teaching, or for other intellectual pursuits, the Trustees have established a High Class, and adopted a course of three years' study in the sciences. From among those who complete the Primary course of study the Superintendent may select each year the most promising pupils and admit them as members of this class.

X. It is the intention of the Trustees to render the pupils self-supporting, so far as practicable, and that every pupil, on leaving the Institution, shall be proficient in some useful occupation or trade, so as to be able to procure a livelihood without reliance on the charities of others. In accordance with this design, all the scholars will be required to labor a portion of each day—the girls performing the lighter kinds of housework and various kinds of needlework, as plain sewing, or ornamental work, and dress-making; and the boys at various trades, the necessary work about the Institution, and in the cultivation of the farm and garden.

XI. All business letters or letters of inquiry in regard to pupils in the Institution, or those whom it may be designed to place there, should be addressed to WM. GLENN, *Superintendent Institution for the Deaf and Dumb, Indianapolis, Indiana.*

XII. Those persons bringing pupils to, or taking them away, can not be furnished with board and lodging at the Institution.

XIII. No pupil, unless under extraordinary circumstances, can be received at any other time than at the commencement of the session.

XIV. The pupils will be sent home to spend the vacation, which extends from the last Wednesday in June to the first Wednesday after the 15th of September.

A CLASSIFIED, DETAILED AND ITEMIZED STATEMENT

—OF THE—

RECEIPTS AND EXPENDITURES,

AND OF THE

BUSINESS TRANSACTIONS,

FOR THE

Fiscal Year Ending, October 31, 1884.

The following classified and itemized exhibits of the financial and business transactions of the year, were prepared by the book-keeper of the Institution from the books, bills and vouchers on file in this office, and are full and correct in detail, and will be found to contain all the facts and information upon these subjects as required by law:

EXHIBIT No. 1.

Condensed Financial Statement for Fiscal Year Ending October 31, 1884.

. MAINTENANCE.

Receipts.

* Total allowance for year ending October 31, 1884.....	\$56,200 00
--	-------------

MAINTENANCE.

Disbursements.

As per exhibit No. 5	\$52,120 60	
For salaries of Trustees.....	1,200 00	
Total		53,320 60
Balance unexpended.....		\$2,879 40

REPAIRS.

Receipts.

Total allowance for year ending Oct- ober 31, 1884.....	\$3,000 00
--	------------

Disbursements.

As per exhibit No. 6.....	2,184 87	
Balance unexpended		815 13
Total balance unexpended.....		\$3,694 53

GENERAL FUND.

Earnings paid Treasurer of State as per exhibit No. 4	\$57 41	
Clothing accounts filed with Treas- urer of State, as per exhibit No. 9	761 42	
Total		818 83
Total amount covered into gen- eral fund		\$4,513 36

* Includes Auditor's warrants for Trustees' salaries, \$1,200, in pursuance Section 2773, R. S.

EXHIBIT No. 2.

A Classified Statement of Expenditures on Account Current Expenses for Fiscal Year Ending October 31, 1884.

Annals of the deaf and dumb.....	\$121 20
Bedding.....	772 18
Breadstuffs.....	2,228 12
Clothing.....	836 59
Dining-room and kitchen.....	777 96
Engineer's supplies.....	105 53
Farm and garden.....	127 47
Fire alarm.....	50 00
Fish and oysters.....	327 01
Fuel.....	2,953 93
Furniture.....	539 98
Greenhouse.....	51 26
Groceries.....	4,097 02
Hospital.....	212 89
Ice.....	162 88
Laundry supplies.....	828 07
Lights.....	1,379 20
Live stock.....	115 50
Library.....	101 26
Meat and lard.....	4,707 20
Miscellaneous expense.....	312 53
Office furniture.....	177 50
Postage.....	77 00
Produce.....	3,607 62
Provender.....	575 74
Salaries and wages.....	26,927 40
School-room supplies.....	548 09
Sewing department.....	75 08
Stable expenses.....	107 31
Stationery.....	206 83
Telephone.....	75 00
Vehicles and harness.....	85 25
Water rent.....	50 00

Total.....

\$53,320 60

EXHIBIT No. 3.

Products of Farm and Garden for Year Ending October 31, 1884.

Beans 8½ bu.....	\$5 42
Beets 66½ bu.....	35 97
Cabbage 319 bbls.....	240 30
Carrots 20 bu.	10 00
Corn 360 bu.....	198 00
Corn, green, 81 doz.....	6 98
Corn fodder 275 shocks.....	41 25
Hay 95 tons.....	855 00
Kohl rabbi 12 doz. bunches.....	3 02
Lettuce 17½ bu.....	8 75
Milk 6,619½ gals.....	992 96
Onions 17¾ bu.....	13 55
Onions 103½ doz. bunches.....	10 30
Parsley 5 doz. bunches.....	2 50
Peas 4½ bu.	3 80
Peppers 72 doz.....	3 60
Pickles 13,241	36 52
Pork 1,503 lbs.....	100 66
Potatoes 21 bu.....	9 95
Potatoes, sweet, 43 bu.	36 55
Pumpkins 489	29 34
Radishes 81½ doz. bunches.	8 10
Radish, horse, 2 bbls.	8 40
Rhubarb 116½ doz. bunches.....	14 57
Tomatoes 166½ bu.....	79 15
Turnips 100 bu.....	50 00
Veal 500 lbs.....	50 55

 Total.....

\$2,855 19

To the Board of Trustees:

GENTLEMEN—I submit the foregoing as an itemized statement and inventory of all the property, real and personal, belonging to the Institution, and connected therewith, on the 31st day of October, 1884.

WM. GLENN, *Superintendent.*

STATE OF INDIANA, }
MARION COUNTY. } ss.

Personally appeared before me, a Notary Public, in and for the County of Marion, State of Indiana, Wm. Glenn, Superintendent of the Indiana Institution for the Education of the Deaf and Dumb, and, being duly sworn, upon his oath says that the foregoing is a complete inventory of all the property, real and personal, belonging to the said Institution, or belonging to the State of Indiana, and connected therewith, or in use in and about the same, on the 31st day of October, A. D. 1884.

Subscribed and sworn to before me, this 1st day of November, A. D. 1884.

R. O. JOHNSON,
Notary Public.

[SEAL.]

All the foregoing I respectfully submit, as my annual report for the year ending October 31st, A. D. 1884.

WM. GLENN, *Superintendent.*

December 3, 1884.

APPENDIX.*

* The School Statistics herein contained are taken from "American Annals of the Deaf and Dumb," a leading deaf-mute journal published in Washington, D. C.

OBSERVATIONS BASED ON THE HOSPITAL REGISTER OF THE DEAF
AND DUMB INSTITUTION OF INDIANA, FROM JULY 1.
1879, TO JULY 1, 1884.

BY JOHN E. LOCKRIDGE, M. D.

Inasmuch as very little has appeared in medical print, so far as I have seen, about this peculiar and unfortunate class of people, I have thought that I might report some facts that would prove interesting and gratifying, if not instructive, to a certain class of readers; to such of the patrons, at least, of the Institution under whose eyes they may chance to fall.

Whilst this practice is difficult, yet not so much so to the experienced practitioner as one would naturally suppose. For whilst they are deprived of two of the most important special senses, yet the remaining senses and faculties are so intensely acute that they are enabled to interpret almost any sign the physician may make to them, be it ever so foreign to that which is regularly taught them.

There is another peculiarity of prime importance and value with them; alimentation and medication are the easiest and simplest possible. They nearly always have a fair, if not good appetite. I have seen pupils in the midst of typhoid fever with an excellent appetite; and scarcely ever is there any difficulty in getting them to take plenty of food. The same is true of medicine. It matters not how sick they may be, they are always ready for their medicine, however large or nauseous the dose may be. Indeed, most of them have no confidence in medicine unless it makes a profound impression on the organs of taste. On one occasion iron by hydrogen was prescribed for a number of well-grown girls, out patients, who needed a ferruginous tonic, it being in as eligible form and as good as any other preparation. In a few days they all returned it, saying that it had no taste and would do no good, and they declined taking it, and wanted something stronger. They were supplied with the tincture of chloride of iron, reinforced by some vegetable bitter, which proved to be entirely acceptable as well as beneficial.

Whilst it is not my purpose to discuss the causes of deaf-muteness in this report, yet I must say that scrofula plays an important part in a large proportion of these people; and its

well-known imprint is not only plainly shown on many of them, but it seems to have cast its livery over many more, and must be taken into the count in their treatment. Yet, notwithstanding the fact that so many have an element of unsoundness about them, and that they remain at the Institution during a very critical period of their lives, especially the girls, from ten to twenty years of age, the death rate has been very low; and they have rallied from sickness, both mild and severe, about as promptly as any other class of children, and especially when the surrounding hygienic conditions were kept in the best possible state.

During the five scholastic years there was an average in school of 325 pupils, the boys being slightly in excess. During this period there were seven deaths at the Institution, six boys and one girl, or about 4 to the 1,000, per annum. When we consider that in the city of New York last year the death rate was only a fraction less than 30 to the 1,000 of all ages, and in Indianapolis over 14 to the 1,000, the management of the Institution should feel greatly encouraged, and the patrons must experience a feeling of comfort and gratification. There were treated in the wards of the hospital during these five years 1,087 cases, or 555 boys and 532 girls, besides the out patients.

During the vacation of 1879, immediately preceding the five years in question, it was discovered that the main sewer, relied upon to convey away everything noxious, as well as the surface water from the premises, was in a condition of almost utter ruin, and, from appearances, had been so for several years; in many places one could thrust his foot into the crevices. It was made of cement, and put in many years before, when the buildings were first erected. As an inevitable consequence the soil beneath the buildings and the whole premises was supersaturated with sewer gas. An entire new brick sewer was put in and everything put in as good a sanitary condition as possible. But unfortunately, the winter of 1879-'80 was phenomenally mild; the ground was scarcely thoroughly frozen and no ice was procured that winter; and consequently the sewer gas was not neutralized by the elements. Typhoid fever, typhomalarial fever, asthenic pneumonia, and like diseases, which are known to be originated and sustained by sewer gas, prevailed to a considerable extent, in a severe and intractable form,

until after the severe winter of 1880-'81 had in a measure dissipated the sewer gas in the soil. Indeed, this deleterious influence showed itself until after the beginning of the third school term, after which it disappeared and showed itself no more to the present time. Yet it will be remembered that the diseases in question have been prevalent and somewhat fatal in the city almost to the present date.

To show at a glance what a wonderful effect a local source of infection has in the maintenance of the principal miasmatic diseases, I will introduce below a table, showing for each year the number of cases of typhoid and typho-malarial fevers, intermittent fever, typhoid pneumonia and diphtheria; also measles and the average duration in the hospital of the cases of intermittent fever; also a column for skin diseases, etc., with the view of showing certain relations existing between the latter and intermittent fever:

YEARS.	No. Cases of Typhoid Fever.	No. Cases of Typho-Mal. Fever.	No. Cases of Intermittent Fev.	No. Cases Pneumonia.	No. Cases Diphtheria.	No. Cases of Measles.	No. Cases of Skin Diseases.	Average Duration of Intermittent Fever.	Whole No. Cases Sick.	No. Deaths.
1879-1880	1	3	28	10	0	55	11	4 dys.	193	2
1880-1881	3	0	61	10	0	0	11	6½ "	208	2
1881-1882	5	2	27	1	2	0	7	7 "	99	2
1882-1883	0	0	89	3	0	55	26	4 "	244	1
1883-1884	0	1	95	5	1	0	63	2½ "	340	0
	9	6	300	29	3	110	118		1,087	7

From the above table it will be seen that of the 15 cases of typhoid and typho-malarial fevers, 14 occurred during the first two and beginning of the third terms, whilst the sewer gas was abroad in the soil. And during this period these diseases, and indeed all others, were very stubborn and intractable.

By a glance at the table it will be apparent from the average number of days in the hospital that intermittent fever was more persistent during this same period. It is true there were not so many cases as there were at a later period, but it was much more frank, presenting all the usual phenomena of chill, hot stage, and sweating stage, and was much more intractable. Whilst the report shows a greatly increased number of cases of

intermittent during the last two terms, yet in reality there were very few cases of frank chills and fever, most all of them being the so-called malarial influence only, "dumb ague," as it were, the miasm not having been sufficiently concentrated to engender the usual phenomena of intermittent; a large, flabby, and indented tongue, the patient being ill at ease with an absence of energy and effort; the complaint yielding promptly to mild treatment, and in a very few days the patients invariably returned to school. But, during these two terms, there was an unusual prevalence of the malarial influence in the community at large, as shown in private practice.

The relation existing between intermittent fever and its congener, if not its autopath, certain forms of skin disease, is strange and important. By referring again to the table it will be seen that during the first two and a half terms, whilst inter-

mittent was most intense and persistent, and monopolizing, as it were, the malarial influence, the number of skin diseases was at its minimum. But during the last two terms, when there was no local source of infection, but a weak general prevalence of miasm, skin diseases were vastly more prevalent. Indeed, the two complaints seem to be interchangeable, some pupils being affected with the one and some with the other at the same time.

Every practitioner in a miasmatic district must be familiar with the apparent identity of these complaints, having observed the same periodicity in the eruption and retrocession of certain skin diseases as in the hot and cold stages of intermittent. The skin diseases thus behaving were urticaria, herpes, erythema, and eczema, and in frequency about as I have named them.

By a final reference to the table it will be seen that out of the seven deaths, six of them occurred within the first three, and one only during the last two years, when complaints were mild and ephemeral, of general prevalence, and without any local source or origin. So well was this local influence understood, that whenever several cases of frank chills and fever occurred in succession a critical search for some local cause was at once instituted, and we scarcely ever failed to discover some green and stagnant puddle of water, leaking pipe, or decaying refuse hiding around some corner; on the correction of which the hospital wards would clear out almost like magic.

Of the twenty-nine cases of pneumonia and *three* death during the five years it will be seen that twenty of these, and all the deaths, occurred during the first two terms, and only nine cases during the three last terms, and these were comparatively mild and easy to manage. A feature of the pneumonia was a tendency to the double form; a large proportion of the cases being of that type during the first two years, if not from the start, the lungs would be attacked in succession, and the latter was more often the case.

Of the two deaths reported from measles one was complicated with acute phthisis pulmonalis, and the other with double pneumonia, and finally with diphtheria. The colored pupils, of whom there were very few, showed very plainly their well known intolerance of the exanthemata, these cases being much more severe and unmanageable; one of the deaths from measles was a colored lad. In 1881 there was a single case of cerebro-spinal meningitis, very severe and stubborn, which ultimately entirely recovered.

During the last two years, and more especially the last one, there was a most striking prevalence of superficial complaints, apparently to the exclusion or supplanting of deep seated and more serious disorders, such as skin diseases, as shown in the table, boils or abscesses, ophthalmia, toothache, and so on. Scarcely a visit was made during the last year but that there was an abscess to be lanced. These superficial ailments, together with bruises and injuries received in playing, apparently increased the whole number of the sick, as will be seen, during the last two years. Of the cases of fracture, nine-tenths were of the clavicle and Colles' fracture of the fore-arm.

The treatment of these pupils requires a great deal of care and circumspection. Anything like an active and spoliative plan of treatment was most disastrous, owing to an innate vice of constitution in the case of so many of them. Notwithstanding the fact that very many cases seemed to present an active and sthenic type, suggesting a corresponding treatment, yet such was delusive, for the tendency was to sink, and that rapidly too. A supporting and even stimulating plan of treatment, almost from the start, was found to be the only safe and proper one; and this, together with their wonderful capacity to take plenty of food, and facility of medication, was most satisfactory.

Such observations, however homely presented, must aid in

impressing those concerned how important a part local causes exert in the production of disease; and must incite to never-ceasing vigilance those who have in charge the health and welfare of congregated individuals.

INDIANAPOLIS, July, 1884.

The foregoing tables show twenty-four thousand eight hundred and sixty-two (24,862) pupils, with two thousand and fifty-two (2,052) teachers in the institutions of the world, of whom seven thousand and nineteen (7,019) pupils, and four hundred and forty-four (444) teachers are in the United States. The teachers of foreign institutions average one to each eleven (11) pupils; those of institutions of the United States average one to each sixteen and one-half (16½) pupils.

THE TENTH CENSUS.

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE, September 23, 1884. }

To the Editor of the Annals:

SIR — In accordance with your request, I take pleasure in submitting, for publication in the *Annals*, the following general results of the inquiry into the number and condition of the deaf and dumb in the United States, made in the Tenth Census.

The total number of the deaf and dumb found was 33,878; of whom 32,806 were returned by enumerators, and 1,072 additional by physicians.

They were found in the following places: 5,393 in institutions for the deaf; 511 in almshouses; 4 in jails and other prisons; 79 in benevolent institutions; 24 in hospitals or asylums for the insane, and 27,867 at their homes or in private families.

With respect to their ages, 1,437 were under six years old; 10,046 between six and sixteen; 5,013 over sixteen and under twenty-one, and 17,382 were twenty-one years old and over. Taking from six to twenty as of proper school-age, the number of school-age was 15,059.

The number reported as in institutions June 1, 1880, was, as stated, 5,393. But in addition to these were found 6,761 not in institutions, who had received special instruction in institutions; or 12,154 educated or partially educated deaf-mutes, in all. This number is doubtless incomplete.

The age at which deafness occurred was stated in 22,473 cases. Of these 12,155 were congenitally deaf; 7,289 lost their hearing under five years of age; 2,235, from five to nine; 694 from ten to fourteen, and 100 at fifteen years.

The cause of deafness was assigned, with more or less definiteness and probability, in 9,209 cases, of which 366 were referred to diseases of the ear, 8,250 to other diseases, and 593 to accidents. The list of causes accepted and tallied is as follows: Meningitis, 2,856; scarlet fever, 2,695; malarial and typhoid fevers, 571; measles, 448; fevers, non-malarial, 381;

catarrh and catarrhal fevers, 324; other inflammations of the air passages, 142; falls, 323; abscesses, 281; whooping-cough, 195; nervous affections, 170; scrofula, 131; quinine, 78; blows and contusions, 74; inflammations of the ear 72; diphtheria, 70; hydrocephalus, 63; teething, 54; mumps, 51; small-pox, and variola, 47; erysipelas, 36; fright, 32; water in the ear, 25; sun-stroke, 21; noises and concussions, 21; tumors, 11; chicken-pox, 10; struck by lightning, 10; foreign bodies in the ear, 9; salt rheum, 3; malformation of the ear, 2; syphilis, 2; consumption, 1. We rejected 850 cases of disease and 128 of accidents, as too vague or improbable to be counted and classified.

Among the complications of deafness were found: Deaf, dumb, and blind, 245; deaf, dumb, and insane, 268; deaf, dumb, and idiotic, 2,122; deaf, dumb, insane, and blind, 30; deaf, dumb, blind, and idiotic, 217. Total number of deaf who are doubly or trebly afflicted, 2,882.

The number of deaf found in the principal cities was: In New York, 718; Philadelphia, 464; Brooklyn, 246; Chicago, 204; Boston, 160; St. Louis, 174; Baltimore, 169; Cincinnati 136; San Francisco, 76; and New Orleans, 109.

The classification by sex, race, and nativity, is as follows: Native white—males, 14,879; females, 12,425; total, 27,304. Foreign white—males, 1,894; females, 1,463; total, 3,357. Colored—males, 1,794; females, 1,423; total, 3,217. The total males are 18,567, and females 15,311.

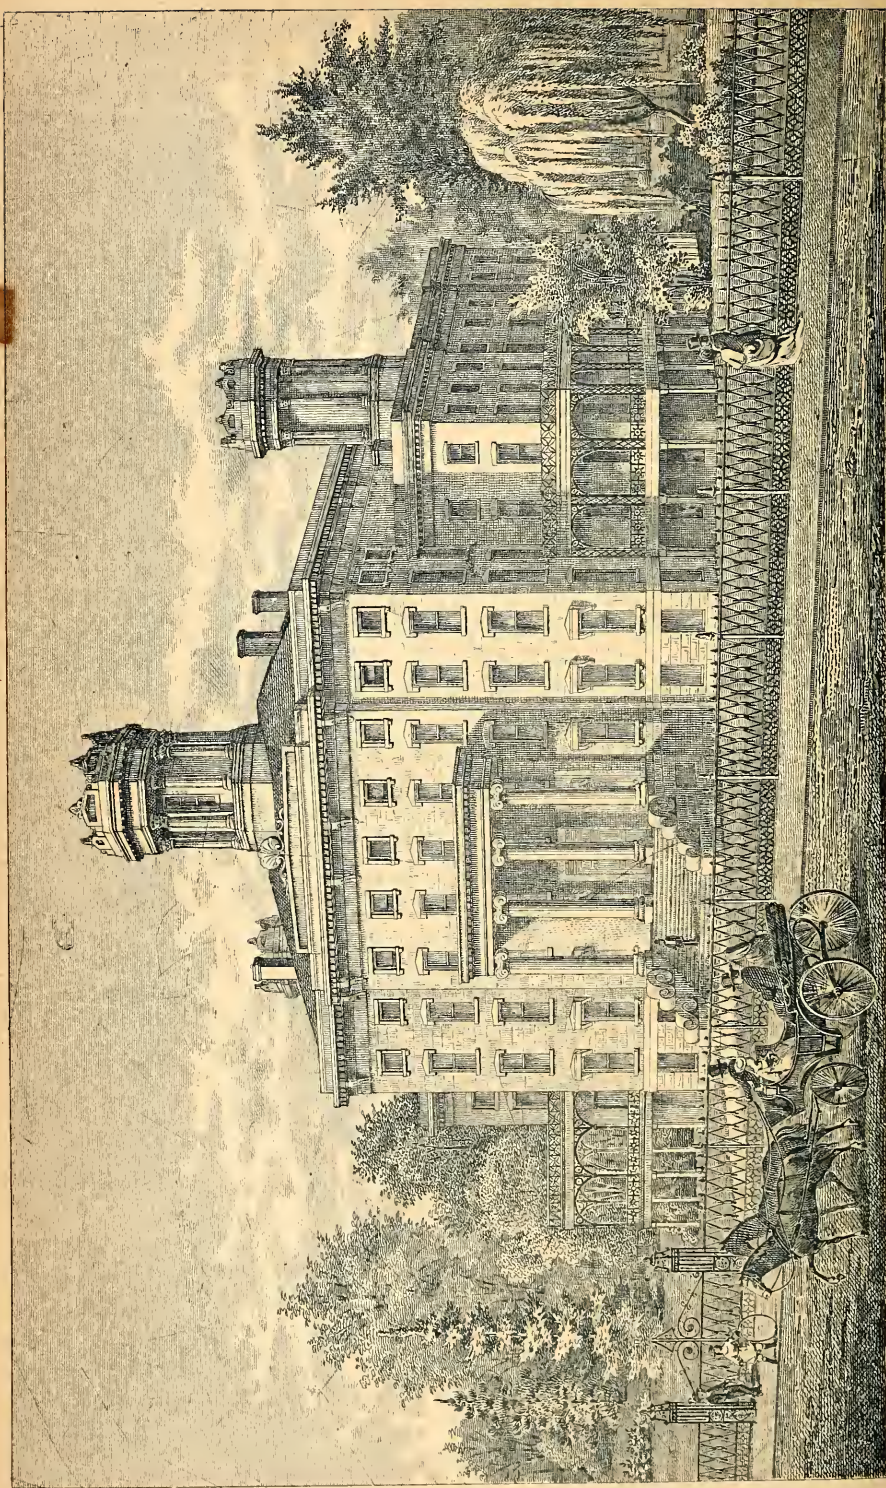

The increase in the number of deaf-mutes in half a century, as reported, has been: In 1830, there were 6,106; in 1840 there were 7,665; in 1850 there were 9,803; in 1860 there were 12,821; in 1870 there were 16,205, and in 1880 there were 33,878 returned. But no close approximation to a complete enumeration has before been made.

Compared with the other three groups of defectives, the deaf and dumb number 33,878; the blind, 48,928; the idiotic, 76,895, and the insane, 91,959. But the blind of school-age number only 7,768 against 15,059 deaf children of corresponding age.

I am, with respect, very sincerely yours,

FRED. H. WINES,

*Expert and Special Agent of the Tenth Census for the
Defective, Dependent, and Delinquent Classes.*

MISS AMY J. LOOMIS, *Girls' Governess*.

REPORT OF TRUSTEES.

To His Excellency, ALBERT G. PORTER,
Governor of Indiana.

SIR:—In submitting this report to you, the Trustees will confine themselves to such things as the law requires.

The Superintendent's report to the Board of Trustees, under the present law, embodies everything of interest to all concerned in this Institution, therefore we call your special attention to the suggestions contained in it.

It is a fact which has been often stated by the Trustees of this Institution that the facilities for the education of the blind are inadequate. Without any intention to discriminate against that class of unfortunates, the law-making power of the State has continually failed to provide sufficient means to educate all of them.

There are quite a number of blind children in the State who are permitted to grow up without the advantages of this Institution, simply for the want of room to accommodate them.

We all certainly feel that every sightless child in the State should have an even chance for an education.

There are also quite a number of blind people in the State, who are above the lawful age for admittance, who could soon acquire a trade which would enable them to obtain a living, provided there was sufficient room in the Institution to accommodate them.

We call your attention to the very great error of sending the indigent pupils back to the poor-houses from whence they came, to spend the summer vacation.

The moral influences at the ordinary asylum for the poor, in the counties, are not good. Very soon bad impressions are made that must be remedied, which is often difficult.

We hope Your Excellency will insist upon a sufficient appropriation for the support of the Institution, that these children who come from alms-houses may remain in the Institution during the vacation, and be kept under proper discipline and instruction.

FINANCIAL STATEMENT.

The value of the real estate is estimated at.....	\$356,238 00
Personal property.....	17,534 01
Total.....	<u>\$373,772 01</u>

REVENUE.

Amount for current support as per appropriation.	\$27,000 00
Trustees' salaries.....	900 00
Total.....	<u>\$27,900 00</u>
Amount expended during year.....	23,073 86
Unexpended balance	<u>\$4,826 14</u>

REPAIRS.

Amount for repairs.....	\$1,992 00
Amount expended for repairs.....	1,845 36
Unexpended balance	<u>\$146 64</u>
Cash receipts paid into the State Treasury during the year.....	298 58
Amount collected from the counties on account of clothing, etc.....	247 33
Total	<u>\$545 91</u>

RECAPITULATION.

RESOURCES.

For current support.	\$27,000 00
Trustees' salaries	900 00
For current repairs	1,992 00
Cash receipts.....	298 58
On account of clothing.....	247 33
Total.....	<u>\$30,437 91</u>

DISBURSEMENTS.

Expended for current support.....	\$23,073 86
Expended for current repairs	1,845 36
Total	<u>\$24,919 22</u>
Total unexpended balance.....	<u>\$5,518 69</u>

STATISTICAL.

The following shows the amount expended for the support of this Institution during the seven years just passed:

1878 total expenses including all repairs.....	\$31,404 96
1879 total expenses including all repairs.....	26,307 48
1880 total expenses including all repairs.....	28,780 32
1881 total expenses including all repairs.....	30,551 42
1882 total expenses including all repairs.....	28,696 06
1883 total expenses including all repairs.....	28,682 70
1884 total expenses including all repairs.....	24,919 22

The Trustees feel that the usual appropriation of \$27,000 for current support, and \$2,000 for current repairs, will meet the requirements of the Institution during its present capacity. This amount economically managed will be sufficient for almost any emergency that may arise.

We commend the Institution to your favor, and invite your personal inspection.

The officers and teachers have been faithful in the discharge of their duties, and are entitled to our confidence and respect.

Respectfully submitted,

THOS H. HARRISON,

HOWARD BRIGGS,

W. V. WILES,

Trustees.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Trustees,

GENTLEMEN:—In compliance with the sections of the statutes of Indiana, providing for the government of the Benevolent Institutions of the State, I have the honor to submit to you my second, and the thirty-eighth annual report of the Institution for the Education of the Blind, being for the fiscal year ending October 31, 1884. It will be found to contain a summary of the affairs and condition of the school; detailed and itemized statements of all receipts and expenditures for the year; and a complete inventory of all property, both real and personal, belonging to the Institute.

CONDITION OF THE INSTITUTE.

It is indeed a great satisfaction to me to be able, at the close of the year, to congratulate you, and through you the many friends in the State, of this noble benevolent enterprise, upon its present prosperous condition and the high degree of efficiency to which it has been brought.

The several departments are thoroughly organized, and the work of instruction in all of them has been directed by the teachers with ability and discretion; the pupils have been obedient, tractable and industrious, and harmony and good-fellowship have prevailed among the officers and teachers.

Notwithstanding our progress and advancement, we do not claim that our system of instructing and training the blind is complete. There is still room for improvement, and we shall continue to make such modifications of our plan of working as observation and experience suggest, and progress requires.

CHARACTER AND OBJECTS OF THE INSTITUTE.

This benevolent institution was not founded, as many suppose, to create an asylum or a house of refuge for aged or helpless blind people, nor a hospital for the treatment of the eyes, but to place within the reach of the blind children in the State the means of education and self-support. It is strictly a part of the great work of *public education* of Indiana—a free school where the children of the State, who have not sight enough to be instructed by the ordinary methods in use in schools for the seeing, may be given, by the skillful manipulation of such appliances as are commonly employed in teaching the blind, a knowledge of the branches of learning usually found in the curriculum of our best city schools, including the high school, and, at the same time, be trained in some useful trade or other employment by which they may be able to earn a living.

Observation proves that educated blind persons seldom become a public charge; are seldom seen begging or grinding a hand-organ on the street corners of cities or towns, whereas the wholly uneducated, especially if belonging to the poorer classes, are a burden to society, but even if born to a fortune, are debarred from many of the enjoyments of life. It is, consequently, one of the noblest results of modern philanthropy, both as regards matters of social importance and as a question of political economy, that means have been provided to enlighten the minds of this unfortunate class; to teach them habits of industry, economy and self-control; and instruct them in some useful employment that they may become good members of society, and take an active and intelligent part in the affairs of life, and thus lighten, in a great degree, the burden of their affliction.

With these aims and purposes constantly in view, we have endeavored to give parents and the general public additional information relative to the character of the school and the value of the work being done, that a deeper interest may be taken in the Institute, and a greater effort made to place every blind child of proper school age, in the State, under its influence and instruction.

THE SCHOOL SESSION.

In accordance with the by-laws of the Institute, there is but one session of the school annually, commencing in the month of September and closing in the following June.

The last session commenced on the 12th day of September, 1883, and continued until the 17th day of June, 1884—a period of forty weeks. The number of pupils who received instruction in one or more departments of the school, was 120—58 males and 62 females. It will be observed that the total number enrolled last year, is the same as the number enrolled during the previous year.

The following figures show the attendance of pupils for the session, and the number present each month:

	<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
Number enrolled who were in attendance the previous year.....	45	49	94
Number re-admitted who were not present during the previous year....	4	1	5
Number of new pupils admitted.....	9	12	21
Total number in attendance.....	58	62	120
Average monthly attendance.....	53	58 7-10	111 7-10
Number present 1st month.....	52	56	108
Number present 2d month.....	54	59	113
Number present 3d month.....	54	59	113
Number present 4th month.....	53	60	113
Number present 5th month.....	52	60	112
Number present 6th month.....	51	60	111
Number present 7th month.....	53	61	114
Number present 8th month.....	53	59	112
Number present 9th month.....	54	57	111
Number present 10th month.....	54	56	110

Of the pupils enrolled, two, Miss Martha J. Bruner, of Cass county, who left the Institute in 1875, and Herman Eickoff, of Marion county, who withdrew from the school in 1876, were re-admitted by special action of the Trustee, the former to review her studies in music, with the hope of fitting herself to teach, and the latter to learn to manipulate certain improvements in machines for making brooms.

Pupils were received from the following fifty-four counties, viz :

	COUNTIES.	Males.	Females.	Total.		COUNTIES.	Males.	Females.	Total.

INSTRUCTION.

The instruction of the Institute is divided into three distinct departments, namely: Literary, Musical and Industrial.

We have endeavored to make a judicious division of time, so that the pupils who are mentally and physically able to engage in the work of all these departments, may have a due proportion of time for each, and also some hours for exercise and rest.

That the school may be successfully conducted, we must have clear and correct ideas of the character of the work to be done; we must consider education here in its widest sense, and treat it, as including all the influences and processes that will unfold and develop all the faculties that will fit a human being for the duties of life.

In selecting studies and work for the pupils, their physical condition, capacity to receive instruction, tastes, and natural aptitudes are carefully considered, and every one is given instruction in those things in which he can make most rapid progress, and which will be the most profitable to him.

LITERARY DEPARTMENT.

There are six grades in this department, in charge of five faithful and competent teachers, namely: Mr. D. W. Nelson, principal, Miss H. A. Daggett, Miss Marie Robellaz, Miss Lizzie Hopkins and Miss Jennie Schofield, assistants. The last named lady is a graduate of the Institute and is rendering acceptable service as a teacher.

The primary object in this department is to give the pupils, if possible, a sound English education.

The course of study includes reading Line and Point print, writing with lead pencils and the New York point system, object teaching, spelling, memorizing choice selections of prose and poetry, grammar, physical and common geography, with dissecting maps, mental and written arithmetic, algebra, natural philosophy, history of the United States, outlines of universal history, geometry, chemistry, mental and moral philosophy. We are not, however, so much concerned about the number of branches taught, as we are about having a few right ones well taught.

Our main objects are to teach the pupils *how* to study and *what* to study, to discipline their minds and strengthen the powers of concentration, recollection and reflection, and aid them to form correct habits of attention and observation.

In educating the blind; the great problem to be solved is, how can the teacher cultivate the memory and the senses of touch and hearing so that they may supply the place of the lost sense of sight. To do this requires the most skillful use of proper appliances, and the highest order of oral-teaching-talent.

During the session all the classes were examined by the superintendent at four different times. These examinations were held for the purpose of ascertaining the progress the pupils were making in their studies, and the accuracy of their knowledge of the work they had gone over. On each occasion they gave evidence of careful and thorough training.

MUSICAL DEPARTMENT.

The instruction in this department is divided into three sections, namely: Vocal, Instrumental, and Tuning.

Lessons are given regularly to all of our pupils, who have an ear for music, in one or more of these sections. The pupils

seem to appreciate fully the special advantages provided in this school, for acquiring a knowledge of music, and to realize the fact that a thorough knowledge of it can be made a source of profit to them, and will aid to improve their social status.

In the vocal section thorough instruction is given in the rudiments of music, chorus and part-singing, and vocalization. In the instrumental section the pupils are taught to play on the pianoforte, cabinet and pipe organs, on the cornet and other brass-band instruments; and in the tuning section they are taught the art of regulating and tuning pianos.

Prof. R. A. Newland is still at the head of this department. He is ably assisted by Miss H. A. Hanvey in the vocal section, and by Miss Addie Carman in the instrumental. Miss Hanvey has rendered valuable service in this department for a number of years. Miss Carman was added to our staff of teachers at the commencement of the present term. She has given evidence of a proper understanding of the duties assigned her, and exhibits tact and skill in her instruction.

Mr. Newland is a graduate of this Institute. His superior acquisitions and his success as a teacher of both vocal and instrumental music, which are freely acknowledged by professional musicians, and the value of his attainments both to himself and others, are incentives to the pupils under his charge, and prompt them to renewed efforts in their musical studies.

The tuning section is in charge of Mr. W. E. Reed, a blind man, who was formerly a pupil in this Institute. His ability to repair, regulate and tune pianos and cabinet organs is indeed remarkable. Fourteen boys received instruction in this section last year. A number of them made commendable progress in the work, and give excellent promise of becoming successful tuners. Two, Frank Ballou and Charles Hansen, have already attained a high degree of proficiency in the art of piano-tuning, and are able to turn their ability to advantage and make it remunerative. They render valuable aid in teaching the art to other pupils in the school, and have gone out and tuned pianos in Indianapolis and other cities, to the satisfaction of the owners.

We have made the training of teachers also an important part of our instruction in this department. Many of our pupils expect to teach music after they leave the school. In order, therefore, that they may succeed in this work, we deem it

necessary that they should have some practical experience in the art of teaching. To this end we have placed a number of our younger pupils under the tuition of an equal number of the most advanced in music. This work is supervised by the Principal of the Department, and proper suggestions are made by him as to the manner of giving the lessons. By this means, we are enabled to give the older pupils the experience in teaching they need, and also to give more pupils than heretofore musical instruction.

INDUSTRIAL DEPARTMENT.

Increased attention and care have been given to the work of this department, for we regard it, in many respects, as the most important part of our system of training. While we give due importance to the value of the literary and musical instruction of the blind, we are not indifferent to the fact that, in a few years, many of our pupils will have to depend wholly upon the labor of their hands for a living. Consequently, viewing our work from a practical standpoint, it would not be complete, were we to neglect to give our pupils the fullest industrial training that our means and circumstances will permit us to give them.

There are two distinct branches of this department, namely: the Workroom for the girls, and the Workshop for the boys.

THE WORKROOM FOR THE GIRLS.

The work in this room is liberally and judiciously managed. It forms an important feature in the education of blind girls. While we aim to make the instruction here thoroughly practical, we are still confronted with the fact that it is exceedingly difficult to give a blind girl such industrial training as will enable her to earn a living, and yet we shall not relax our efforts to reach that end.

Miss Livonia Mason has had charge of this branch of industrial training for a number of years, and has directed the work with discretion.

All the female pupils receive instruction here daily in sewing, knitting, crocheting, and in making fancy and useful articles of thread, worsted, and beads. The older girls are also taught to use the sewing machine, and to mend and darn, and keep in

repair their own clothing. In this room all the towels, napkins, and comforts used in the building are hemmed, and all the sheets, pillow cases and shams, besides many articles of female dress and boys' underclothing, are made. The small boys also spend an hour each day in this room in bead-work. This employment aids to discipline them in the use of their hands and fingers, and to develop their mechanical faculties.

The following is a list of the articles made in the workroom during the year :

Pillow cases.....	109
Napkins (pupils).....	137
Napkins (officers).....	36
Table covers,.....	7
Sheets	125
Shirts for boys.....	4
Combination undersuits.....	4
Drawers (pairs).....	9
Skirts.....	5
Chemises.....	7
Night dresses.....	3
Dresses	8
Waists.....	13
Aprons	15
Towels.....	27
Bedspreads, hemmed.....	57
Pieces of bead-work.....	905
Pieces of crochet-work.....	84

The following is an exhibit of the receipts and expenditures on account of the workroom for the girls:

Cr.

By amount received for manufactured articles sold	\$163 22
By value of manufactured articles on hand October 31, 1884.....	56 90
By value of material on hand October 31, 1884.....	149 25
Total.....	\$369 37

Dr.

To value of manufactured articles on hand at the close of last year.....	\$75 50	
To value of material on hand at the close of last year	184 83	
To amount paid for material during the year ending October 31, 1884.....	9 51	
To cash paid girls for voluntary overwork.....	55 17	
To balance in favor of department.....	44 36	
Total.....		\$369 37

WORKSHOP FOR THE BOYS.

The evident design of the instruction in the workshop is to help the boys to help themselves—to teach them a useful trade by which they can earn a livelihood. For a number of years prior to the opening of the present session of the school, the only mechanical employment taught in the shop, was the broom trade. Most of our older boys have spent from one to three hours a day in learning this trade, and some of them, who could not succeed in the work of the other departments of the Institute, have made good progress here, and will eventually learn to make brooms.

The workshop is in charge of Mr. J. M. Richard, who has been connected with it in one capacity, or another, for nearly a score of years. He has had many years' experience in the mechanical training of blind boys, and exercises ingenuity and skill in aiding them to overcome the difficulties that beset them. Many of the pupils who have gone out from under his teaching, are making a respectable living by prosecuting the broom trade.

At the commencement of the present session of the school, it was decided to introduce the cane-seating of chairs as a part of the industrial training of the Institute, and Mr. A. J. Cochran was employed to give the necessary instruction. A room in the workshop was comfortably fitted up for the purpose, and the necessary forms put in place, at but little expense to the State. This awakened a new interest in our industrial work among our boys. Some who had not begun to learn the broom trade, and others who could not work at it without detriment to their

health, while others who wanted to learn both trades, readily entered upon learning this. Mr. Cochran is a patient and thoughtful instructor, and the progress made by the pupils thus far in this work, is very satisfactory. In a short time we shall set up forms in the girls' workroom, and teach a number of our female pupils the cane-seating trade.

This, it seems to me, can be made one of the most profitable employments in which our pupils, both male and female, can engage. It is light and congenial, and but little capital and simple machinery are required to ply it.

Before passing from this topic, I wish to call the attention of your Honorable Body to the fact that there are in the State a large number of blind people, between the ages of twenty-one and thirty-five years, who, on account of poor health or other causes, were deprived of the advantages of this Institute before they arrived at the maximum age (twenty-one years) at which we receive pupils into the school; or may-be, they lost their sight, through sickness or by accident, after they were twenty-one years old. They are without employment, and, consequently, many of them are without the means of self-support. If something is not done to aid them, in a few years, a majority of them will become a public charge, and remain so during the rest of their natural lives. It seems to me, some provision ought to be made by the Legislature, to give this unfortunate class a trade, or some other employment, by which they may be able to assist, at least, to gain a living.

MORAL AND SOCIAL TRAINING.

The moral and social training of our pupils is a matter of pre-eminent importance. Not only their happiness, but their influence and success in life will depend largely upon it. Honesty, correct habits, amiability and worth, polished manners and chaste language, are irresistible social attractions, and will aid the blind to endear themselves to their friends and to make themselves companionable in society.

The Bible is our code of moral instruction. It is read every morning in connection with our regular chapel exercises, but care is taken that no sectarian belief be taught. Every one about the establishment is strictly enjoined against endeavoring to give a sectarian bias to the minds of the pupils.

When the weather is favorable, the pupils are required to attend morning service every Sunday, at some place of worship, selected by their parents, or themselves. Many of them also attend Sunday School and other services held at the several churches in the neighborhood of the Institute.

In addition to the moral instruction given at these places, the principles and practices of morality, and the use of proper language are carefully taught, by precept and example daily, in the school room.

But the church and the school room are not the only places where a pupil receives moral and social training. He is influenced greatly in these qualities by the habits, condition and moral standing of the family of which he forms a member. It follows, therefore, that as the Institute is really the home of most of the pupils for ten or twelve years from the time they enter it, the purest moral influence should prevail in every department, and the officers, teachers and employees should be particularly circumspect in their deportment and guarded in their language.

CURRENT EXPENSES.

The amount of money expended for the current support of the Institute for the year just closed, as shown by our financial statement, is \$23,073.86, from which should be deducted \$268.35, which was expended for clothing and traveling expenses for pupils, and which will be collected by the Treasurer of State from the several counties, and held by him for meeting the actual expenses for maintenance (\$22,805.51), leaving a balance of the annual appropriation (\$22,996) of \$190.49 in the hands of the State Treasurer. To this balance should be added the sum of \$23,158, the amount of the gift in aid from the Institute for the fiscal year, and already deposited into the State treasury, making the total balance of the maintenance fund remaining in the State treasury \$46,154.49. It is to be seen, by examining former financial statements of the Institution, that the amount expended for support last year, was considerably less, and consequently the balance remaining in the State treasury more, than for a number of years past.

It must not be inferred, however, that the saving of 15 per cent. of the amount appropriated for the current support of this Institute, was accomplished by denying the school anything,

that, with our present surroundings, would have added to its practical efficiency and success. That would have been indeed unwise economy. But it has been accomplished by making judicious purchases; by making a proper use of everything that was brought into the establishment, and by avoiding extravagance and waste on the part of employes.

The pupils' tables are abundantly supplied with a variety of good and wholesome food. All the bread, pies, cakes, rolls and biscuits used, are baked in our own bakery, and are equal in quality to those found on the tables of our best hotels. We have endeavored, at all times, to purchase the purest and freshest articles of food, and insist that no other shall be used. There is much more danger of our pupils indulging too freely in the matter of eating (for some of them have little self-control) than in their not getting enough to eat. We have striven to make the Institute a pleasant and comfortable home for the inmates, and in all matters pertaining to food, health, discipline and training, we have aimed to do what a wise, judicious and conscientious parent would do for his own children.

INDIGENT GRADUATES' FUND.

The origin of this fund was a bequest left in trust to the Superintendent of this Institute by Mrs. Nancy Fitzpatrick, of Muncie, Indiana. She was the mother of Margaret Louisa Fitzpatrick, a former pupil of this school, now deceased. Mrs. Fitzpatrick died, childless, on the fifteenth day of March, 1871, but she left a will, in which, after giving a certain sum of money to each of several blind persons named, friends and associates of her blind daughter, and providing for the payment of certain expenses, she bequeathed the rest of her property to the Superintendent of this Institute, and his successor, to be held in trust for the benefit of the indigent blind of Indiana, who may attend this Institute, and to be given to them on leaving, in such sums as the Superintendent may judge proper. It has been used principally in assisting our needy graduates to obtain an outfit of tools and other articles with which to commence the broom-trade.

The following is an exhibit of the condition of this fund at this date:

Cash on hand November 1, 1883, and since put at interest for one year	\$508 27
Interest on same for one year at 5 per cent	25 41
Amount due the fund from Beckner & Sayce, of Arlington, Indiana	22 15
Value of one set of broom irons on hand.....	8 00
Total.....	<u>\$563 83</u>

There were no demands made for aid from this fund last year.

HEALTH.

The general health of the inmates of the Institute was good throughout the year. There was no epidemic disease among the pupils, nor any other serious sickness, except such as might be expected among so large a number of children, many of whom have enfeebled constitutions and are physically frail. The health of the school is attributable to its healthful location and the close observance of hygienic and sanitary laws.

Death invaded the Institute once during the year, and took from our number one of our new pupils. Lottie Harris, of Noble county, came to us for the first time in September, 1883. She had a weak constitution and was suffering with a complication of diseases. She was attacked with typhoid fever in the latter part of March last, and notwithstanding the most skillful treatment and the most careful nursing, she died on the 3rd of April, after a sickness of two weeks. The body was taken to her home, near Ligonier, Indiana, by her relatives, and interred in the family burying ground. Funeral services were held in the chapel of the Institute, in the forenoon of April 4th, Rev. Dr. Day, of the First Baptist Church, of Indianapolis, officiating. Lottie was a quiet and obedient pupil, and had united with the First Baptist Church of this city during her stay with us. Her death was deplored by us all.

Dr. R. F. Stone, the attending physician, has exhibited ability and skill in the professional treatment of the cases of sickness that came under his charge. He responded promptly and cheerfully to every call made upon him, and otherwise dis-

charged his duties in a manner creditable to himself and his profession. For further particulars regarding the health of the Institute and the causes of blindness, I respectfully refer you to the physician's report herewith appended.

REPAIRS.

The grounds about the building have been carefully and tastefully kept, and always present an attractive appearance. The fences and pavements that surround the premises have been kept clean and in good repair.

During the summer the eight sleeping rooms and the halls on the third floor of the shop building were whitewashed, and otherwise put in repair; the kitchen, bakery, pupils' wash-rooms and a number of pupils' sleeping apartments in the main building, were also whitewashed; the hospitals, bath rooms and the ceilings of a number of school rooms were calcimined.

A neat and substantial fence of cedar posts and pine rails was built along the walks in the court, back of the main building; a new pavement, 122 feet long and 10 feet wide, of selected brick, was laid under the veranda on the east side of the main building; a new brick pavement was also put down on the south and west sides of the work shop, and also around the pump in the yard.

The front steps and the stone floors of the halls and verandas were repaired and the joints filled with cement; the stone base of the first story, all the pillars on the east and west sides of the main building and the front steps, sides and scrolls, were all thoroughly scoured.

The outside walls, wood work, cornice and mouldings of the workshop were thoroughly painted with oil and lead paint. The ceilings of all the verandas around the main building and the greenhouse were also painted. A new and substantial coal shed, 48 feet long and 32 feet wide, was built. It is covered with a good shingle roof, which has been given two coats of paint. We have now stored in this building four hundred tons of Brazil block coal.

All the bath rooms and water-closets were overhauled and the needed repairs made. A thorough renovation was made in these apartments on the female side of the house. It was found that many of the pipes and connections were old and

worn out, and some of the joints were open. All the old supply, drain and ventilation pipes were removed, and new ones put in their place, from the top of the house to the drain in the cellar; new attachments, traps, faucets, caps, valves, etc., all of modern improvement, were supplied. Two new copper bath tubs were also placed in the girls' bath-room.

The total amount expended for repairs was \$1,845.36, which, considering the amount of work done, and the quantity and quality of the materials used, is not an extravagant sum.

PRESENT SESSION.

The present session of the school opened on the tenth day of September. One hundred and fifteen pupils have been enrolled up to date. Re-admitted 105; new pupils received 10; all are in attendance.

We expect soon to add to our present enrollment several pupils who were here last year, but who, on account of sickness, have not been able to be present yet this term, and also a number of new pupils, whose applications for admission I have in my possession at this writing. The indications are that the attendance this session will be as large, if not larger, than during any session in the history of the Institute.

CHANGES.

At the close of the last session in June, Miss M. Bessie File, who, for the past seven years, was a teacher in our literary department, resigned her position. Miss File was a faithful and conscientious teacher, and during her connection with the Institute exerted a most beneficial influence upon the pupils under her tuition. Her place was supplied by the appointment of Miss Marie Robellaz, of New Albany, Indiana, an intelligent and accomplished lady who had a number of years practical experience as a teacher in public schools.

Later, and just before the opening of the present session, Miss Josephine C. Culbertson, who had held the position of assistant teacher of instrumental music, also resigned. She had been an earnest and successful instructor of music, and we

regretted to lose her services. Miss Addie Carman was assigned to the position. She zealously took up the work, and is producing satisfactory results.

Mr. A. J. Cochran, to whom I have already referred under the head of industrial training, was added to our staff of instructors.

SUGGESTIONS.

The main building of the Institute was erected about thirty years ago, and was designed, as I understand it, for a school of about eighty pupils. But, notwithstanding the population of the State has greatly increased in the last three decades, and with it also the number of blind children in the State, little addition has been made to the buildings.

We are doing the best we can with our limited accommodations, but for the successful management of the school we need more room. It requires much more room to conduct properly the work of the several departments of a school of this character, than is required to successfully manage a school of the same number of seeing pupils.

We need more sleeping apartments. We are compelled at present to put from four to seven pupils in a single room, eighteen feet square. We need separate rooms in which to give instruction in piano-tuning; we need larger and better ventilated school rooms; we need comfortable sitting rooms for the pupils, and we need a library in which to keep, properly classified, their books.

I wish to call the attention of the Board to a matter of moral significance which, it seems to me, ought to be corrected. According to the regulations of the Institute, the pupils are sent to their respective homes at the end of each school session in June, to spend the vacation. Now, the homes of a number of our pupils are the county poor-houses of the counties to which they are accredited, where they not unfrequently associate with a low element of society, and, consequently, not only is there danger of the moral influence of the Institute upon them being vitiated, but there is also danger of their contracting habits which may be difficult to control when they return to us. The Legislature ought to provide suitable homes for these pupils during the summer vacation.

In conclusion, allow me, gentlemen of the Board, to tender you my sincere acknowledgements for the many courtesies you have shown me; for the kind words of encouragement that you have been pleased to give me, and for the efficient aid you have rendered me in the discharge of the duties of my position.

I hereby affirm that, to the best of my knowledge and belief, the inventory and statements herewith submitted, under appropriate headings, are correct.

H. B. JACOBS,

Superintendent.

Affirmed and subscribed to before me, a notary public in and for the county of Marion, State of Indiana.

WITNESS my hand and seal, this 13th day of December, 1884.

JAMES W. KING, N. P.

PHYSICIAN'S REPORT.

*To the Honorable Board of Trustees
of the Indiana Institute for the Blind:*

GENTLEMEN—In compliance with the request of the Superintendent, Prof. H. B. Jacobs, I respectfully submit the following report concerning the health of the pupils, the sanitary condition of the Institute and other facts which may be of public interest so far as they relate to the past school term:

It may be well to state at the outset, that general observation and experience point to the belief that the blind as a class have less vitality than those who have sight, and that this opinion appears to be amply confirmed by statistics. The records of many of the long-established Institutes for the Blind clearly show that such individuals are not only more subject to sickness, but that their mortality is at least ten per cent. higher than the average of persons of the same age and otherwise similarly circumstanced. As a factor this want of vitality appears to be associated with blindness, both as to cause and effect. While a want of vitality is one predisposing cause of blindness, it is equally evident that a lack of vitality is in consequence of being blind, which leads to a more sedentary life than is usual with those who are not deprived of vision. For these reasons it has been very truly said, "There are many who are not born blind, who are born to become blind." The general causes of blindness are both ante-natal and post-natal. Of the former causes as regards the pupils of this Institute, no cases are traced to psychological influences, but are found to be mostly due to inter-marriage of near relatives, scrofula, or other hereditary diseases. It is known that in inter-marriages, and where parents are imperfectly developed, that there is liability to want of developement of the nerves of special sense, as well as a double tendency to transmit hereditary disease in case it should exist. But most cases of ante-natal and post-natal blindness appear to result from imperfection or disease of the organs of vision which are accessory to the nerves of special sense, the defect most frequently existing in some part of the globe of the eye. Hereditary blindness is not frequent, but in this Institute six cases

(congenital) appear to be due to this cause; as in one case the father was blind, in two cases the mother was blind, and in three cases both parents were blind. In five cases of congenital blindness the parents were first cousins. The majority of pupils have, however, become blind at different ages since birth. Some of them from special diseases, as purulent ophthalmia, inflammation of the cornea and of the iris, cataract or opacity of the crystalline lens, and amaurosis or paralysis of the optic nerve. Many are blind from general diseases whose sequelæ attack different parts of the eye, as scrofula, measles, and inflammatory fevers. A few have been deprived of vision from blows, wounds, and probably from malpractice.

Out of the one hundred and twenty pupils in attendance during the term, we enumerate the following as causes of their blindness: Congenital, 26; purulent ophthalmia, 23; scrofula, 18; inflammation (of cornea and iris), 13; accidents, 8; cerebro-spinal fever, 7; cataract, 6; measles, 5; erysipelas, 2; malpractice, 2; whooping cough, 1; small-pox, 1; scarlet fever, 1; rheumatic fever, 1; and malarial fever, 1. The remaining five cases are reported as of unknown cause, but are probably due to amaurosis. In this connection it should be stated that of the fifty-eight boys and sixty-two girls in attendance, eighty-one are totally blind and thirty-nine are partly blind. The number partly blind comprises those pupils who possess some power of vision, but not sufficient to enable them to distinguish clearly the forms of objects. It also includes those who are only and barely able to distinguish light from darkness.

Considerable sickness occurred during the first six months of the term, of a similar character to that which prevailed generally in the city, but it yielded readily to appropriate treatment. At the beginning of the term several pupils were entered, already suffering from malarial disorders, but entirely recovered shortly after their admission to the Institute. The more anæmic pupils and those whose natural resistive powers were below the average, were more or less affected by slight changes of temperature, easily contracting colds and suffering from bronchial and neuralgic affections, and some from derangement of digestion. The only serious illness, however, consisted of four cases of pneumonia (one of which was of a "typhoid" character), three cases of inflammatory rheumatism, one of erysipelas, one of typho-malarial fever, and one of "enteric" fever, the lat-

ter being complicated with organic disease of the kidneys, resulting in uræmic coma, lasting two days and nights, and terminating fatally on April the 3d, 1884, after an illness of thirteen days. This patient was a delicate girl of scrofulous constitution, whose health was very much impaired from previous disease. The only epidemic which prevailed during the term was one of mumps. There were about thirty cases of this malady during the winter months, none of which were of a very severe character, and, with one or two exceptions, run a mild and uncomplicated course. During the months of May and June, and up to the date of this report, there has been no sickness of any consequence, and the only accident was a dislocation of the shoulder occurring with one of the boys.

During the epidemic of small-pox in this city last winter, the Institute was for several weeks placed under strict quarantine, and its inmates were thoroughly vaccinated. The sanitary condition of the Institute is excellent. With the facilities for ventilation the number of beds to each sleeping apartment are none too many, but they could not be increased without detriment to health. While only a small proportion of the pupils have been actually sick during the school term, yet many of them have required iron and other tonics or constitutional remedies to build up and maintain their general health. To assist in these results and to improve their physical development, such hygienic measures as bathing, the influence of sunlight and open air, or gymnastic exercise, have been systematically resorted to and persistently but judiciously enforced. The food has been of very wholesome quality, and the diet varied to suit the demands of health. In consequence of this management a marked improvement may now be noted in the physical and mental condition of the pupils; but owing to their peculiarly unfortunate natural defects, to meet all the requirements the duties of the officers, teachers and attendants are laborious and of great responsibility, and are such as can only be faithfully performed by those who take an especial interest in the work before them. In securing the most excellent results in the general management of the Institute, much praise is due the Superintendent. The requisites for his position are untiring industry, unceasing care, and constant vigilance.

R. FRENCH STONE,
Physician.

ACKNOWLEDGMENTS.

We would express our sincere thanks to Professor M. Anagnos, Superintendent of the Perkins Institution for the Blind, located at South Boston, Mass., for his visit to the Institute and for his address to our pupils, which was replete with encouraging words and valuable suggestions.

To Professor Paul C. Sinding, of Copenhagen, Denmark, for an interesting and instructive lecture on the "Division of Time," delivered in the chapel of the Institute, Wednesday evening, January 16, 1884.

To the troupe of Jubilee Singers for visiting the Institute upon the invitation of the Superintendent, and singing for the entertainment of the pupils.

To Professor Wm. A. Bell, Editor of the *Indiana School Journal*, for a practical and entertaining address, on "The Formation of Character," delivered to the inmates of the Institute, Wednesday evening, March 19, 1884.

To Mr. W. Warren Bentley, of New York City, who visited the school and entertained the teachers and pupils with a service of sacred songs.

To Rev. Dr. Henry Day for officiating at the funeral services of Lottie Harris, April 4, 1884.

The following periodicals and weekly newspapers have been sent to the Institute gratuitously, during the whole or a part of the past year, for which the officers, teachers and pupils tender their thanks to the proprietors, and express the hope that the favor may be continued:

Western Christian Advocate, Cincinnati, Ohio.

Weekly Courier, Madison, Indiana.

Odd Fellows' Talisman, Indianapolis, Indiana.

Deaf Mute Index, Colorado Springs, Colorado.

The Democrat, Franklin, Indiana.

Lebanon Weekly Pioneer, Lebanon, Indiana.

The Putnam Democrat, Greencastle, Indiana.

Le Valentin Haüy, Paris, France.

The Goodson Gazette, Stanton, Virginia.

The Tablet, Romney, West Virginia.

We would also ask the proprietors of other papers in Indiana, to favor us in a similar manner, as the local news in a paper is especially interesting to the pupils from the section of the State in which it is published.

CATALOGUE OF PUPILS.

For the Term Ending June 17, 1884.

BOYS.

No.	NAMES.	POST OFFICE.	COUNTY.
1	Ballou, Frank A	Laporte	Laporte.
2	Boaz, Bert	Glen's Valley	Marion.

* Had been enrolled on the books of the Institute, but were not in attendance during the last session; the remaining eight are new pupils.

GENERAL INFORMATION.

The Indiana Institute for the Education of the Blind is located at Indianapolis, the capital of the State, occupying a beautiful and healthful site in the northern part of the city.

It is strictly an educational establishment, a branch of the noble public educational system of Indiana, and has for its object the moral, intellectual and physical development and training of the blind children of suitable school age, of both sexes, residing in the State.

Pupils from this State are admitted to the privileges of the Institution free of charge. They are provided with tuition, boarding, washing, medical attendance and everything necessary, except clothing and traveling expenses.

The school term commences each year on the second Wednesday of September, and continues forty weeks. It is highly important that pupils should be present at the opening of the term, and remain, if possible, to the close.

All pupils are required to come provided with an adequate supply of good, comfortable clothing, embracing suitable articles for both summer and winter wear, in such quantities as to admit of the necessary changes for washing and repairing.

Each article of clothing should be distinctly marked with the owner's name, in order to prevent confusion or loss, and must be sent in good condition, not only upon the first entrance of the pupil, but also at each subsequent return from home after the vacation.

It is positively required that every pupil shall be removed from the Institution at the close of the term, each year, as well as at any other time when such removal may be deemed necessary by the proper officers; and, in case of the failure of the friends of any pupil to comply with this requisition, provision is made by the law for the sending of such pupil to the Trustee of the township in which he or she resides, to be by him provided for at the expense of the county.

As a rule, applicants who are under nine or over twenty-one years of age are not admitted; but exceptions are sometimes made in favor of those who are over age, at the discretion of the Board of Trustees. The term of instruction is not limited to any definite number of years, but is determined by the attainments of the pupil and his fitness to graduate.

No person of imbecile or unsound mind, or of confirmed immoral habits, will be knowingly received into the Institute; and in case any pupil shall, after a fair trial, prove incompetent to receive useful instruction, or disobedient to the regulations of the Institute, such pupil will be thereupon dismissed.

By a recent action of the Board of Trustees, the use of tobacco in every form, in or about the building, is prohibited. Parents should be especially careful to prevent their boys from forming the habit of using it, while at home, during vacations. Its injurious influence on all who begin to use it in childhood is not questioned, but it is especially harmful to the blind. Therefore one can not do them a greater kindness than to guard them against its use.

Letters are written once a month, or oftener if necessary, for those who can not write themselves. If a pupil is taken seriously sick, the friends are immediately notified of the fact.

All letters and packages sent to the pupils should have, besides the name of the pupil addressed, these words: "Institute for the Blind, Indianapolis, Indiana," to insure prompt delivery.

The Institute is open to visitors on every day, except Sundays, between the hours of 10 A. M. and 3 P. M.

Persons bringing pupils to the Institute, or visiting them while here, can not be accommodated with boarding and lodging during their stay in the city.

Parties desiring the admission of a pupil to the Institute are required to fill up the subjoined form of application and forward the same to the Superintendent, giving truthful answers to the interrogatories therein contained, and procuring the signature of a Justice of the Peace to the certificate thereunto attached; and the pupil must in no case be sent until such application shall have been received and favorably responded to by the Superintendent.

FORM OF APPLICATION.

*To the Superintendent of the Indiana Institute
for the Education of the Blind:*

The undersigned, desiring to procure the admission of a pupil for education in the institution under your charge, would submit for your consideration the following particulars, in answer to the several interrogatories herein propounded, and will stand pledged for the correctness of the same, as well as for the proper fulfillment of the requirements set forth in the circular prefixed hereto:

1. What is the *real* and full name of the applicant?
Answer
2. In what State or country was he or she born?
Answer
3. What is the date of his or her birth?
Answer
4. At what age did the blindness occur?
Answer
5. What is the supposed cause of blindness?
Answer
6. Is the blindness total?
Answer
7. If it is not total, is it sufficient to prevent the acquirement of an education in a school for the seeing?
Answer
8. Is the applicant of sound mind, and susceptible of intellectual culture?
Answer
9. Has he or she any bodily deformity, or infirmity; and if so, what?
Answer
10. What is his or her general state of health?
Answer
11. Is he or she free from epilepsy and all infectious diseases?
Answer

12. Has the applicant ever been a pupil in any other school for the blind, and if so, what one and how long?

Answer

13. Is he or she free from all immoral habits?

Answer

14. What are the full names of the *own* parents of the applicant?

Answer

15. Were such parents related before marriage, and if so, how?

Answer

16. Are there other cases of blindness in the family, and if so, how are they related to applicant?

Answer

17. If the father of the applicant is not living, or has, for any reason, ceased to provide for the same, who is his or her present guardian?

Answer

18. What is the postoffice address of the father or guardian, as the case may be, of the applicant?

Answer

19. What are the names of the township, county and State, in which the applicant has legal residence?

Answer

20. If in the State of Indiana, what is the name of the present Trustee of such township?

Answer

Signed this . . . day of . . . , A. D. 18 . . .

.

STATE OF INDIANA, }
 COUNTY. } ss.

I, the undersigned Justice of the Peace in and for said county, hereby certify that , the above-named applicant for admission as a pupil of the Indiana Institute for the Education of the Blind, is a legal resident of the township and county herein set forth as the residence of said applicant.

Witness my hand, this . . . day of . . . , A. D. 18 . . .

{ L. S. }

.

Information relative to the character and purposes of the Institute, and the value of the work done, will be cheerfully given, and all inquiries concerning the admission of pupils or the management of the School, will be promptly answered, by addressing the Superintendent.

H. B. JACOBS,
Superintendent.

CLASSIFIED AND ITEMIZED STATEMENT

OF THE

RECEIPTS AND EXPENDITURES.

And of all business transactions, as shown by the books and papers belonging to the Institution. It is correct and full in detail, as made out and arranged by the book-keeper of the Institution, for the fiscal year ending October 31, 1884.

Appropriation for current support	\$27,000 00	
Appropriation for repairs, buildings, etc	1,992 00	
Total appropriation		\$28,992 00
Expenditures for current support	\$22,173 86	
Expenditures for repairs, buildings and premises	1,845 36	
Total expenditures		24,019 22
Balance of appropriation unexpended		4,972 78
Cash receipts paid into State Treasury		298 58
Clothing accounts collected by State Treasurer.		247 33
Total amount turned into the State Treasury, for fiscal year ending October 31, 1884		\$5,518 69

NOTE—The salaries of the Trustees paid from the General Fund by the Treasurer of State, on the Auditor's warrants, are not included in the total expenditures. By adding the amount of said salaries (\$900) to the total expenditures as shown above, will make the actual expenses of the Institute \$24,919.22, leaving a net balance in the State Treasury of \$4,618.69.

CLASSIFICATION OF EXPENSES FOR THE FISCAL YEAR ENDING OCTOBER 31, 1884.

For Current Support.

SIXTH ANNUAL REPORT

OF THE

BOARD OF TRUSTEES

OF THE

Asylum for Feeble-Minded Children

AND

SOLDIERS' ORPHANS' HOME,

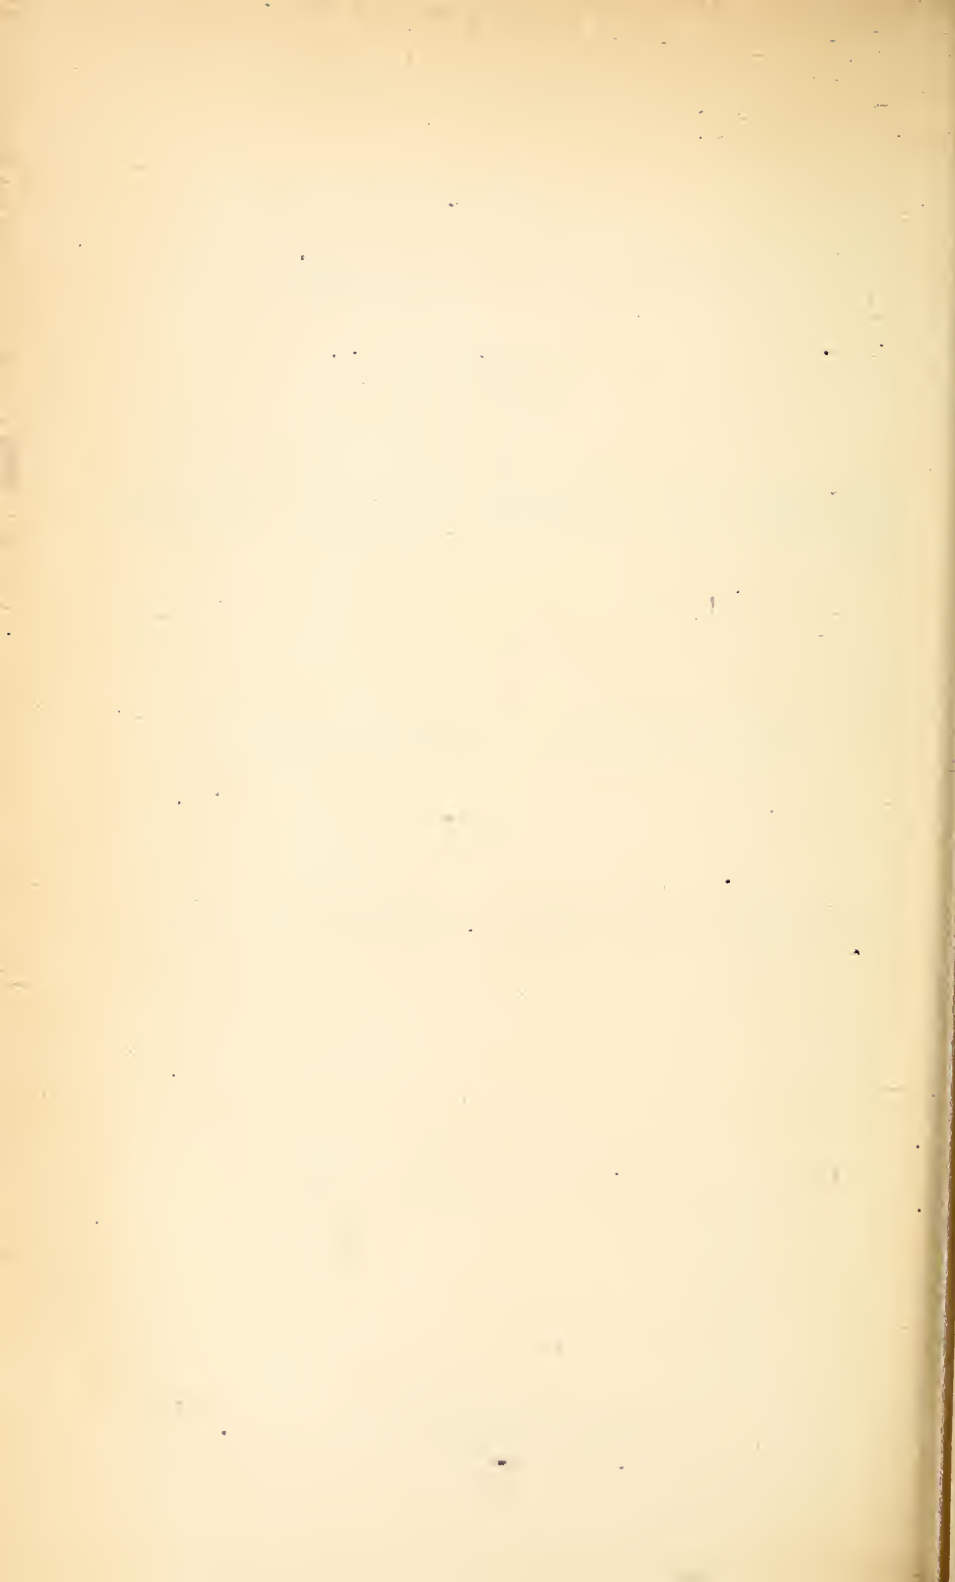

FOR THE

FISCAL YEAR ENDING OCTOBER 31, 1884.

TO THE GOVERNOR.

INDIANAPOLIS:
WM. E. BURFORD, CONTRACTOR FOR STATE PRINTING.

1885.

EXECUTIVE DEPARTMENT,
December 5, 1884. }

Received and examined by the Governor, referred to the Auditor of State for verification of the financial statement, and filed with the Secretary of State for preservation by him, and published pursuant to the order of the Commissioners of Public Printing.

FRANK H. BLACKLEDGE,
Private Secretary.

Filed in my office January 7, 1885.

W. R. MYERS,
Secretary of State.

OFFICE OF AUDITOR OF STATE,
Indianapolis, Jan. 7, 1885. }

The records of this office show that the financial statement agrees with the report, viz:

Warrants issued during fiscal year of 1883-4:

Home department.....	\$19,992 00
Asylum department.....	12,187 00
Current repairs.....	1,992 00
Superintendent's and Trustees' fund.....	2,400 00

The vouchers for expenditures in the different departments correspond with the statement of the expenditures.

JAMES H. RICE,
Auditor of State.

INDIANA ASYLUM FOR FEEBLE-MINDED CHILDREN

AND

Soldiers' Orphans' Home, Near Knightstown.

October 31, 1884.

TRUSTEES' REPORT.

To His Excellency Albert G. Porter, Governor of Indiana:

In presenting this their sixth annual report, being for the fiscal year ending October 31, 1884, the Trustees take pleasure in stating that both Institutions are in a fair healthy condition, prosperous and happy—notwithstanding, for political effect, it has been frequently charged that the Orphans' Home had been “abolished, and the dead soldiers' children scattered to the four winds, dependent upon the cold charity of the world for life's sustenance;” not one word of which is true. No attempt was ever made by any Legislature to “abolish” the Orphans' Home, nor under the present management, has a single applicant been rejected, whose papers showed him or her to be of the proper age, and the orphan child of an Indiana soldier.

It is the law, and has been the policy of the management, to procure homes for these children, as fast as good and permanent ones could be found; and many have been thus provided for and are now securely and comfortably situated with good families. The exact number thus sent out will be furnished your Excellency by the report of the Superintendent herewith submitted. The number actually in the Home at this time is

147. The number admitted during the year, 34; and all these are well fed, well clothed, well instructed, morally and intellectually, and are well governed and never abused. They are taught to "fear God and keep his commandments."

It was not expected in the founding of this Home, that soldiers' orphans in Indiana would last forever. But that the number would naturally decrease, and eventually there would be none left for care at the Home. The truth of this theory is being verified. In 1878 there were reported in the Home 230 orphans. This number has gradually diminished year by year until we now have but 147, as above stated.

In the Legislature of 1879, Charles Hubbard, a representative from Henry County, a good man and true philanthropist, conceived the idea of establishing an asylum for feeble-minded children in Indiana. He had been at great pains in procuring statistics, from which he ascertained that there were in the State a large number of this unfortunate class of children. The tenth census showing 4,725. Mr. Hubbard drafted his bill, and in casting about for a location settled upon the Soldiers' Orphans' Home as the site. Knowing that ere many years, a home for soldiers' orphans would no longer be required, and that the State's property here could be well utilized for his new asylum. The bill as reported by Mr. Hubbard passed, and became the law, under which the new asylum went into operation. Pending the passage, of the bill, no objection was raised from any quarter, as to the location of the asylum. No fear was entertained by Mr. Hubbard, or any one else, as to the injurious results to the orphans from contact with the feeble minded. Nor was such a thing ever thought of until politicians, sought to make capital by false clamor, charging that the orphans were "mixed up with idiots," and that the two classes of children were permitted to "comeingle and mix together without restraint." Now these charges were as false as false could be, for there never has been any "mixing" of the two classes. The Trustees' in the construction of the Asylum wing to the building, were careful to so arrange the same that the separation of the two classes should be complete and perfect. And that this was accomplished is well known to all good people who have taken interest enough in the working of these institutions to visit here and examine for themselves. There never has been any injurious contact of the two classes, and

never will be under the present management. And to the many people of the State who have visited here, and inspected the institutions, giving words of approval and encouragement, and to those newspapers who have spoken words in praise of the management, to all these the Trustees would return their most sincere acknowledgments.

SCHOOLS.

Our orphan schools are under the same excellent management as reported last year, viz.: Miss Susan Ray Wilson, principal; Miss Carrie DeVor, Miss Leora White and Miss Cora Shrum, assistants. It gives us pleasure to state that these teachers are most faithful and untiring in the discharge of their duties as such, and that the progress achieved by the pupils is ample evidence that teachers and scholars have each discharged their duties faithfully and well. For details in this department we would refer your Excellency to the very satisfactory report of Miss Wilson, principal teacher.

FEEBLE-MINDED DEPARTMENT SCHOOLS.

In this department the schools are also making very satisfactory progress. Mrs. Moore, the principal, is an accomplished teacher. She and her able corps of assistants, Mary T. Wilson, and Mrs. Alice Betts, are rendering the State valuable service, and to these beclouded young intellects they are rendering services and benefits incalculable. In the handiwork of these children, they show "evidence of design and mechanical skill," and in their school studies they are making an advancement which is the wonder of all who visit here.

FINANCIAL.

We have said that these children were "well fed, well clothed, were contented and happy." While this is true, it has all been done at the expense of reaching ahead of our scanty monthly allowances. The limited appropriations are positively insufficient, and will not run the machine. Therefore, notwithstanding the utmost economy, we find ourselves in debt at the close of this fiscal year some five thousand dollars. For the exact figures, your Excellency's attention is invited to the financial report of the Superintendent.

The tenth census shows that there are in Indiana 4,725 feeble-minded persons, and suppose one-half of these are of the proper age, and suitable subjects for this institution. Then suppose 10 per cent. of the one-half of said persons should make application for admission to our institution; then we have knocking at our doors for admission 230 of this unfortunate class, without the capacity to receive one of them, our present capacity for 100 being already filled. Then, inasmuch as these charitable enterprises never go backward, but once began always advance, what then are our needs and what the duty of the Legislature and the Governor?

First, that we need double our present capacity for the feeble-minded school and other buildings, and our support funds greatly enlarged.

Second, that if his Excellency views the matter in the same light that we do, he will recommend, in his annual message to the Legislature, an appropriation sufficient to make all these needed improvements, and to buy 450 acres of land adjoining the present property, which can now be bought at fair, reasonable rates. And then we think it the duty of the Legislature to make the appropriation accordingly.

These estimates are the amounts needed, as we think:

For new range.....	\$500 00
For laundry building.....	3,000 00
For current repairs, per annum.....	2,500 00
For 450 acres of land and library.....	35,000 00
For additional buildings for Asylum.....	36,000 00
For Home support and school expenses, per annum..	28,000 00
For Asylum support, per annum	15,000 00
To meet deficiency.....	5,000 00
Superintendent's and Trustees' fund, per annum.....	3,000 00

We would further state to your Excellency, that on that part of the above land known as the "Hall farm" there are fine improvements: a dwelling-house worth \$3,000, a fine large barn, with stables and all necessary out-buildings to correspond, with wells and abundant living spring water for stock, etc.

If these lands are procured, ample employment can be given to from 30 to 50 of the larger boys of both kinds, whose labor may in a measure remunerate the State for the outlay, while

the greater advantages will inure to the boys in educating them for useful employment, and fitting them as best we can for competition in the great battle of life.

LIBRARY.

There was once a library here worth \$1,500.00, which was destroyed with the building by the conflagration of 1877. With the appropriations asked, six or seven hundred dollars can be profitably invested in a library—profitable to both classes of these children—which the Trustees think should be done.

WORKSHOPS.

We again call attention to the fact that, for the want of means, we are still without this important adjunct, the workshop, in preparing our boys and girls as artisans, thus fitting them to compete successfully with the outside world in the great drama of human affairs. With the appropriations asked all these can be furnished.

FURTHER AS TO THE PURCHASE OF THESE LANDS.

The outlay at first blush seems large, and the feasibility of the scheme may be in doubt, yet the Board, after carefully studying the situation, and investigating what other States have done, and what our State has done for other institutions, have come to the conclusion that like results may be achieved here as in other States, and as with other institutions in our own State, to-wit, that the lands without doubt will prove remunerative and self-sustaining, and the advantages to the State's wards will prove above computation.

WATER SUPPLY.

Again we urge that our supply of soft water for the steam boilers is wholly inadequate. The hard spring water is ruinous to the boilers, and good economy would dictate that the evil should be remedied. And in order to do this the 70-acre tract of land on our north, now for sale on reasonable terms, is indispensable, for with this, an outlay of fifty dollars to dam a ravine near the building, as alluded to in our last year's report, will furnish ample surface water for all steam purposes.

HEATING APPARATUS, FIRE-ESCAPES, ETC.

Our heating apparatus is in perfect order and performing well. The return of the water, from condensed steam to the boilers is perfect. No knocking or jaring sound is now heard, and the evenness of temperature, is altogether healthful and pleasant, extending throughout the whole building.

We have built no additional fire-escape this year. The present is in perfect working order. We are, however, still without apparatus for the extinguishment of flames, but with the appropriations asked, these and other indispensables will be furnished.

DETAILS.

For details, reference is had to the reports of the Superintendent, Treasurer and other heads of departments. For finance and expenditure the reports of the Superintendent and Treasurer are full. For sanitary and health conditions, see the Physician's report. For household affairs the Matron's report is referred to, and for stores and supplies the Store-keeper's report is full.

To the Superintendent and all officers under him, the Board bear cheerful testimony to faithfulness and efficiency in the discharge of all duties, and to all employes we cheerfully accord praise for diligence and faithfulness in the performance of all duties in their various employments.

SUPERINTENDENT'S REPORT.

Trustees of Asylum for Feeble-Minded Children:

GENTLEMEN—In submitting this sixth annual report of the Asylum for Feeble-Minded Children, I can not but express the gratitude I feel to a kind Providence for His goodness toward us in preserving life and in giving health and strength to both pupils and teachers. We have to record but one death this year in this department. From the fact that we can accommodate but a limited number of children, we have no change to note in our population. The work has been a satisfactory one, and the improvement, both mental and physical, is as rapid and complete as we could expect.

We are grateful to know that the purpose and object of the asylum is becoming more generally understood throughout the State, and there is an increasing interest manifest by the people in this beneficent charity, not only in our own, but in other States. As an evidence of this, we find the feeble-minded and idiotic receiving greater consideration in our State and national organized charities, than at any time previous in their history. It is becoming a settled fact, that good is being done for this class of dependents, in a way that the claims of these institutions are working their way into the hearts of our philanthropic and benevolent people.

Our school-rooms are all furnished with books, maps, charts, pictures, puzzles, form cards, geometrical figures, color cups and balls, peg-boards with removable pegs, and various other needed appliances, calculated to arrest the attention of the pupils, and intended to promote, arouse and expand the mental faculties, teach them to be systematic; awaken discrimination in size, distance, direction, position, form and number; cultivate habits of order, neatness, obedience, and of interest in and love of work.

The calisthenium is a large hall, well lighted and warmed, and provided with piano, dumb-bells, Indian clubs, wands, rings and May-pole; all being brought into daily use in the physical training of the pupils, constituting the various classes,

and intended to develop manual skill, freedom and grace of movement, clear perception, habits of attention, self-dependence; while at the same time it improves physical organism, develops the mind, and especially the *memory*.

Classes in plain sewing and fancy work all have their places in our system of training, and are valuable as auxiliary means in the hands of the teacher.

The governesses, in sitting-rooms, teach the girls to mend and care for their clothing, beds, and bath-rooms; exercise a restraining influence in correcting unpleasant or vicious habits; also teach them order and neatness about their person and work, and good manners at the table and in the company of others.

The boys have the same opportunity as the girls in all school work, physical drills and exercise, and are rendered useful in the care of their sitting and bed-rooms; daily details are made to farm, laundry, bakery, and in giving attention to the machines and engine in laundry. The object is to keep their minds employed—either in school, kitchen, laundry, field or on the lawns.

The opportunities afforded these children for observation has been enlarged within the past year. The Fair was visited, and the various farming implements and machinery pointed out and their utility and purposes explained; and thus all they saw became to them an object lesson, from which they gained valuable information. A menagerie and circus was visited, and this also proved a source of great enjoyment, and enlarged their idea of the world and what it contains. Frequent walks to the creek, river and woodlands all have proven, in the hands of teacher and governess, fields from which new thoughts and impulses have been instilled into these clouded minds.

We regard this as a year of substantial work, and one of the best in the brief history of this institution.

MANUAL EMPLOYMENT.

It has been demonstrated by the experience in all of our old institutions, that farm work for the boys has proven the most profitable, and that in which they can accomplish most in the way of productive labor. Mechanical pursuits throw them into the towns and villages, and in these communities their infirmi-

ties of body and mind make them an object of ridicule for the thoughtless and ignorant, and in consequence of this exposure to taunt and jeer, their otherwise peaceable and quiet dispositions are soured and they are rendered unhappy, rather than cheerful and peaceable. On farms they can be used advantageously in all its manual labor, and under direction be made self-sustaining help—and in an institution not only produce their own support, but contribute very materially to the support of those entirely dependent and often helpless members of the household.

The following constitutes the population in the Asylum department:

Number children October 30, 1883.....	87
Admitted during year.....	15
Employees	15
Total	117

Accounted for, as follows:

In homes provided by management.....	2
Admitted, awaiting room.....	7
Died.....	1
Taken by friends.....	4
Total.....	14

Number of children October 30, 1884:

Boys	47
Girls	41
Employees	15
Total	117

It can be truthfully said that the Indiana Asylum for Feeble-Minded Children is full, and to meet the demands upon us we must have more buildings. If the State purposes to maintain such an asylum, justice requires the same privileges to be extended to all such children as it now bestows on the 88 in the institution.

Last year, Iowa appropriated \$60,000 for additional buildings to give capacity for the training of her 500 imbecile youth.

We say two are in homes provided by management. One is a girl, and to all my inquiries about her I find this is the answer: "She is slow, but as faithful, patient and kind as can be, and gets along with the children splendidly." Of the boy, the County Commissioner says: "He does not seem to be the same boy we sent to your institution a little over three years ago. He can milk, plow, attend to horses, and is earning his way comfortably."

Under direction, many of the girls can be made good, efficient help in kitchen, laundry and dining-room, and will prove reliable in that they will not desire the privileges and enjoyments that the large percentage of domestics demand.

I can but commend this charity to the favorable consideration of the Christian and charitable people of our State, and pray God's blessing upon this noble beginning for a class hitherto neglected.

Respectfully,

J. W. WHITE,

Superintendent.

Report of Asylum School for the Year Ending October 31, 1884.

To the Superintendent and Board of Trustees:

At present we have in this department 88 children. Of these 76 receive the benefits of the school. Of the 29 children in the First Grade, 17 read in the Third, 8 in the Second, and the remaining 4 in the First Reader.

Monroe's charts and readers were introduced throughout our school during the month of March.

In arithmetic three classes have been formed; the most advanced numbering six, ranging in age from twelve to sixteen years, is doing excellent work in division.

Special attention is given to writing, with encouraging results. A detailed list of studies will be found in the program. In the Second Grade are 24 children. Of these 4 read in the Second and 5 in the First Reader; the remaining 15 read from Monroe's chart. The entire class receives instruction in numbers and writing, and all are making creditable progress.

Miss Mary T. Wilson continues in charge of this grade. The fact that Miss W. has been a teacher in the institution for five years speaks for her excellence, and leaves it only for me to add that one more efficient and faithful would be difficult to find.

The Third Grade comprises 23 children, 14 of whom strongly suggest the necessity of a custodial department. The remaining 9 may, with patient training, be greatly improved. Special drills have been improvised for this class. For the past six weeks Mrs. Betts has been teacher of this grade, succeeding Miss Collins.

Creditable specimens of plain sewing and fancy work have been furnished by a class of twenty-five. Twenty-four children

show marked proficiency in the use of dumb-bells, wands, Indian clubs and rings. A second class of thirty are striving for that degree of excellence that will admit them to the first class.

The singing class remains a source of much profit and pleasure to the children, and of surprise and delight to visitors.

Sundays, from 9 to 10 A. M., and from 2 to 3 P. M., children and teachers assemble for religious instructions in the Amusement Hall, where we are frequently joined by our Superintendent, whose kindly addresses and review of the lesson is much enjoyed.

The Trustees' monthly visits to our school, and the great interest manifested by them in our welfare and progress, prove a source of gratification to our children, and encouragement to the teachers.

PROGRAM.

At 9 A. M. all children and teachers meet in Amusement Hall for opening exercises. At 9:15 First and Second grades pass to school-rooms, the Third remaining for physical drill.

FIRST GRADE.

In Connection with Oral Spelling.

9:15	First Reading Class
9:30	Second Reading Class
9:45	Third Reading Class
9:55	A Class—Arithmetic
10:10	B Class—Arithmetic

R. J. WILSON,
OCTOBER 31, 1884. *Treas. Asylum Feeble-Minded Children.*

Department Indiana Soldiers' Orphans' Home.

*To Board of Trustees Managing the
Indiana Soldiers' Orphans' Home:*

GENTLEMEN—The year just closed finds our Home still endeavoring to continue the work contemplated by its founders. The one hundred and sixty-two children of deceased Indiana soldiers, who would scarcely have had homes in the Commonwealth outside a county poor-house, have been clothed, fed and afforded an opportunity for a good common-school education, well removed from the demoralizing and degrading influences so frequently met with, where poverty is the inheritance, whether in city, town or country. Here, we are glad to say, the influences socially, morally and religiously, have been good and rather elevating in their tendencies. Our teachers, governesses and all our employes, seem to be interested and conscientious workers. It is comforting to think, that out of the eighteen hundred children, who have come and gone from the shadow of these walls, the number who have done well compares favorably with a like number who have grown up in the humble walks of life and in the home circle, where parents have directed in their training.

That some have gone astray, is not to be wondered at, when we see in society so many profligate men and women, who are seeking by precept and example to mislead and ruin innocent and unprotected childhood.

The time at which the State turns away these wards, sixteen years of age, is a very critical period in the life of any young man or woman. They are, at this age, easily influenced for evil and led into indolent and bad habits by the gambler, the thief or the libertine.

The wise man hath said: "Train up a child in the way it should go, and when it is old, it will not depart from it." No one can say that sixteen years is old enough to prevent departure.

The stay of the girls should be lengthened, and they should be instructed in the arts of housekeeping. The boys should be taught some industrial or mechanical pursuits, that in this way they would be more thoroughly equipped for the battles of life. In order to do this, the State must provide liberally, both in buildings and grounds.

"Ill fares the land, to hastening ills a prey,
When wealth accumulates, and men decay."

Three hundred acres should be added and more buildings erected, in order to accomplish more fully and completely the work committed to our hands.

The first, highest and grandest object of the government is the promotion of the happiness of the people. No expense should be spared that is required to effect these objects; and when a measure for the accomplishment is met (as it often is) with a minute and elaborate calculation of the cost, let the answer be, "No expense is too great to be incurred by the Government, which is necessary to secure the present happiness and peace, and ultimate prosperity of its citizens."

Cottages, accommodating families of twenty-five children each, with suitable furniture and utensils, would be needed. Then the girls arriving at the age of fourteen years should be required to spend a portion of their time under the supervision and direction of a good housekeeper, and taught in all the details of cooking, washing, ironing, mending and making clothing, greatly to their own advantage, and in an economical sense, by relieving us of the necessity for so much paid help. One such home cottage would afford us the facilities for thoroughly equipping our girls for a life of usefulness, and insure for them an entrance into good families as efficient help.

For the boys more land is needed, on which they can become farmers and gardeners. The culture of small fruits, also, could be added to horti and floral culture. The importance of labor and habits of industry can not be too early instilled into the minds of young and active boys.

This want of land can be met fully, and on very reasonable

terms to the State, in lands adjoining our fifty acres. It is the surprise of every visitor, when they learn of the few acres now owned, and look at the many boys who could be usefully and profitably employed at all seasons.

During this year there has been only a slight increase in our population, and our rolls show the following:

Number of children in Home October 31, 1883—

Boys.....	96	
Girls.....	47	
		143
Admitted this year.....	34	
Employes and teachers.....	28	
Geo. Meuser and son (armless soldier).....	2	
Total.....	207	

Accounted for as follows:

In homes provided by management.....	12
In homes provided by friends.....	18
Died.....	2

Number remaining October 31, 1884—

Boys.....	95	
Girls.....	50	
		145
Employes and teachers.....	28	
Geo. Meuser and son.....	2	
Total.....	207	

The average number of children in the Orphanage during year.....

Employes.....	28
Geo. Meuser and son.....	2
Total.....	192

Cost per-capita per annum—

Food	\$54 43	
Clothing.....	15 63	
Care and attendance	27 18	
Total.....	\$97 24	

Fuel and light, officers' salaries, medical stores, school books and teachers' salaries, in addition, would add something more to the expense. But the *purpose* of this showing is to institute a comparison between *this* cost and the allowance made for pauper children in our various county homes, provided for by the law of 1881, which says of matron: "To provide the children committed to her care and custody with suitable and sufficient food and clothing, and to give them proper home training, the Commissioners shall pay to said matron not more than thirty cents per day, or \$109.57 per annum."

I am not surprised that a visitor should say, in writing to one of our monthly periodicals, speaking of some of our State charities: "Her Soldiers' Orphans' Home is of less importance than a respectable poor-house should be."

Ninety-seven dollars and twenty-five cents per annum for food, clothing and care of soldiers' orphans, and \$109.57 for food, clothing and care of pauper children. This is our argument in favor of increased appropriation for Indiana S. O. Home.

It will be observed that we have an increase of three over our number of last year. Hitherto, we have been enabled to place in homes, with good families, as many, or more than we receive yearly, but the demand for children this year was more than met. Since the organization of Grand Army Posts in various parts of the State, the needy and destitute are more generally sought out and sent to us by this organization of interested workers. While these children of Indiana soldiers are being cared for, there is still another class of orphans whose fathers did not serve in Indiana regiments, yet were none the less brave and heroic, and jeopardized their lives for the same flag, who, for a consideration, enlisted in other States, while they and their families were residents of this State, and whose children, if dependent, are now charges of Indiana, but under our present laws are denied the privileges of this home for that reason alone. And others, whose fathers have abandoned their helpless children, are sent to the almshouses of the various counties of the State, while the children of insane, and men who are in National military homes are refused, on the grounds that they are not orphans, because the father lives, though bereft of reason, broken in health, and probably unable to provide for his own. The law should be amended if the State purposes to care for the orphans of the nation's dead and dependent soldiery.

That our appropriation has been inadequate for our present population need hardly be said.

In 1881, when the appropriation was made for the Orphanage, there were in the Home department, as reported in October, 1880, 126 children, and there was appropriated \$20,000 for food, clothing, care-takers, schooling, school books, teachers' and employes' salaries, which sum proved barely sufficient; but with an increasing population, which has been gradual every year since, until now we have an attendance averaging 162—an increase of 46. Now estimating the cost at only \$100 per capita per annum you can see why we have unmatured bills, and why we were compelled to anticipate by borrowing a month's allowance in advance. The necessity was upon us, and we could not do otherwise than as we have done. We should have \$25,000, instead of \$20,000, to meet our annual expenses in the care of these bright and intelligent children.

It affords us great pleasure to say of our governesses in the Orphanage that they are all faithful and conscientious in the discharge of their various, responsible duties. While the schools are for the intellectual training of the children, the home life in the sitting-room, the social and moral influence there exerted is where the habits and characters are formed, and on this greatly depends the future career of these future men and women.

To our attending and consulting physician, Dr. J. C. Dillon, (who has been in charge since the resignation of Dr. J. A. Cole, in May,) we are under many obligations for his prompt attendance upon our sick, and many kindly suggestions in the hygiene and sanitary regulations of our great household. We have had no deaths in either institution during his attendance.

We are grateful to friends who have visited the institution during the year, and those who have kindly assisted in all our religious services, and to the members of the press who have so kindly spoken of the institution and the work, and most especially to you, gentlemen, for your manifest interest in the trust committed to your hands—for your valued assistance and counsel in directing the affairs of our Asylum and Home.

Respectfully,

J. W. WHITE.

REPORT FOR ORPHAN SCHOOLS FOR YEAR ENDING OCTOBER 31, 1884.

To the Superintendent and Board of Trustees :

GENTLEMEN:—Our work continues with the same corps of teachers as reported for October, 1883. The number of children in our school has been on the increase, notwithstanding the fact that many have been sent away to homes. The number of school children enrolled November 1, 1883, was 131. Number enrolled at close of October, 1884, was 146, located as follows : Grammar grade, 33; intermediate grade, 41; second primary, 33; first primary, 39.

The school building and grounds remain under the able management of Mr. Hazleton, who does all in his power to keep them neat and orderly.

Quite an improvement in the appearance of the children was noticeable, dating from the first of the school year, when the matron and assistant matron united with the teachers in impressing upon all the necessity of and benefits derived from a cleanly appearance.

The February visit of our Board of Trustees to the school, proved very profitable to us. As their inspection of our somewhat antiquated set of books and maps, and their keen insight into the advisability of modern improvements, led to an entire change, thus placing our school on a plane where it may well compete with others of like character.

I am gratified to say that the children have enjoyed more freedom this year than last and have had the benefit of several journeys to town, always going in charge of our Superintendent and Mr. Hazleton—the occasions being “the circus” or “managerie,” “lectures,” “decoration day,” church and Sabbath school. These trips have been quite an advantage to them and bring them nearer the standard in manners which we would like.

I scarcely deem it necessary to speak of "improvement in studies." The fact that we have charge of orphan children, possessing intellects as bright as any to be found in the land, together with teachers devoted to the work, is sufficient.

With our bright minds eager for knowledge, we find ourselves greatly in need of reading matter for our children. We have no library, and beyond one copy of "The Wide Awake," "Our Little Ones," and "Harper's Young People," we are utterly unable to meet their demands. Therefore, on behalf of our orphans, I would urge the good people of Indiana to remember our school.

List of Studies for the Several Grades.

GRAMMAR GRADE.

Science Reader—Monteiths'.

Fourth Reader—Barnes' National.

Language—Sills' English Language.

Penmanship—Eclectic.

Arithmetic—Barnes' Elementary and National.

Geography—Monteiths' Complete.

United States History—Barnes.

General History of the World—Swinton.

Spelling—Lessons given in readers, written and oral.

Civil Government—Townsend's Analysis.

Physiology—Steele's Fourteen Weeks.

Letter writing.

Children in this grade range from 12 to 16 years.

INTERMEDIATE—MISS CORA SHRUM.

Reading—Barnes' Third.

Arithmetic—Barnes' Elementary to fractions.

Language—Sills' Language, construction of sentences and parts of speech.

Geography—Monteiths' Intermediate.

Spelling—Lessons given in Reader. Diacritical marks and silent letters.

Penmanship—Eclectic.

Physiology—Oral complete.

Lessons in general knowledge.

Letter writing.

Range in age from 9 to 15 years.

SECOND PRIMARY—MISS CARRIE DEVORE.

Reading—Barnes' Second and Third.

Numbers—Grube Method to 20.

Arithmetic—Written and oral.

Drawing—Original Designs and Furbisher's No. 1.

Spelling—Lessons given in reader, written and oral; by sound and by letter. Also use of diacritical marks.

Penmanship—Eclectic Copy Book No. 1.

Geography—Oral. Indiana and neighboring States. Capitals of all the States.

Language—Formation of sentences, subject, predicate and copula.

Lessons in general knowledge.

Vocal music.

Letter writing.

Children range in age from 7 to 12 years.

FIRST PRIMARY—MISS LEORA WHITE.

Reading—Monroe's Chart and Barnes' First Reader.

Numbers—Grube Method, work on slates and board.

Spelling—Words given by teacher. Use of simple diacritical marks.

Penmanship—On paper with pencil.

Lessons in general knowledge.

Vocal music and free gymnastics.

Letter writing.

Children range in age from 5 to 11 years.

In the spring our girls enjoyed the advantages of an industrial department for two brief months. Miss L. Jacobson, teacher, was quite successful in her endeavors, endearing herself to all the young hearts by her gentleness and patience as well as teaching them the skillful use of the needle.

Although this department proved a very valuable addition to our orphan school, it was abandoned on account of a lack of funds with which to carry it on.

On the Sabbath day the children and teachers assemble in the chapel between the hours of nine and ten to enjoy the study of the Sabbath school lesson.

Again in the afternoon at two o'clock, the teachers in charge, take the children to the school building, where an hour is spent in reading to them or in telling some interesting story.

The "teachers' meetings" have been a source of pleasure and profit to us, and have done much toward continuing the feeling of good will among the workers.

It is comforting to both pupils and teachers to see our Superintendent and Trustees take such an active interest in us, and we can only trust you will continue in the good work so nobly begun. In the name of the children, and my fellow workers, gentlemen, I thank you.

Respectfully

Nov. 1, 1884.

SUSAN RAY WILSON.

PHYSICIAN'S REPORT.

To the Board of Trustees Indiana Asylum for Feeble-Minded Children and Soldiers' Orphans' Home:

GENTLEMEN—I have the honor to make my report—

“What custom wills, in all things should we do it.”

In both departments of the home the health of the children has been unusually good. No accident to life or limb has happened.

There has been as little sickness as among a like number taken from the surrounding country. This speaks volumes for the location of the home and its management.

Superintendent White is omnipresent and always ready with willing hands to forward any measure for the cure of the sick or to improve the sanitary surroundings for the benefit of the well. One case of typhoid fever and half a dozen cases of malarial fever is the sum of idiopathic fevers in six months.

When I took charge purulent inflammation of the eyes had broken out, but was speedily suppressed; a few cases of skin disease and several of chronic discharges from the ears were met and cured. One case of Potts' disease of the spine and one case of deforming rheumatism are on hand.

There are a few cases of partial paralysis that would be benefited by the intelligent use of electricity, and I urge that a first-class medical battery be supplied.

In the little room we honor with the name of hospital is the only place where the feeble-minded and orphans come together.

Hospital buildings, with a pharmacy at hand, are needed.

If this great charity lives the necessity for it will become more and more evident.

With thanks for the courtesy extended me by all officers and employes, I am,

Very respectfully yours,

J. C. DILLON.

REPORT OF MATRON.

To the Superintendent and Honorable Board of Trustees:

GENTLEMEN—In making my annual report for the fiscal year ending October 31, 1884, I regret to state, that, owing to the fact that my predecessor, Miss L. E. Boyd, omitted to keep any record or make any reports on the management of her departments during the months of November, December, January, February, March, of the current year, I am, therefore, unable to furnish you with any information concerning this department during those months. During my incumbency, I have had occasion to make but few changes, and these were made solely with the view of adding to the comfort and happiness of all concerned. In regard to the general health, happiness and surroundings of the children, the quantity and quality of food, clothing, bedding, etc., as well as the marked interest manifested in their moral and mental welfare by the Superintendent and his able corps of assistants, I can cheerfully testify that it is all that could be asked or desired, even by the most critical. The dormitories are in excellent sanitary condition, being well ventilated, and abundantly supplied with good clean beds and bedding. No labor is spared to keep these rooms scrupulously neat and healthful. The division and dining rooms and kitchen are kept in perfect order; and the food is abundant in quantity, excellent in quality, and is properly cooked and served. It affords me great pleasure to state, that at no time since I have been connected with the Home, has there existed greater harmony, and more universal co-operation between officers and subordinates, than at the present time. All the employes faithfully and conscientiously perform the duties assigned them; and thus aid in making the Asylum for the Feeble-Minded Children and Soldiers' Orphans' Home of Indiana, a home in-

deed, and an institution that reflects great credit and honor upon our State. Before closing this report, I desire to return my sincere thanks to the Superintendent and Honorable Board of Trustees for their continued counsel, direction and support; and to gratefully acknowledge my obligation to them for their uniformly kind and courteous treatment. The sewing-room reports garments made during the year as follows:

Dresses	123
Aprons	75
Pants	105
Skirts	16
Drawers	32
Waists	74
Towels	50
Shirts	186
Suits	22
Sheets	74
Pillow cases	20
Bed ticks	7
Pillow ticks	16
Napkins	72
Gowns	9
Stand covers	15
Bibs	60
Table cloths	9
Total	965

Very respectfully,

ALICE BRANDT,

Matron.

STORE-KEEPERS' REPORT.

To Superintendent and Board of Trustees of Asylum and Home:

The following is an itemized statement of the leading articles in daily use passing through my hands and store-rooms, from December 12, 1883, to October 31, 1884:

GROCERIES.

Sugar.....	7,426 lbs.
Coffee.....	1,423 lbs.
Tea.....	253 lbs.
Rice	1,203 lbs.
Hominy.....	1,519 lbs.
Cracked wheat.....	700 lbs.
Oat meal.....	177 lbs.
Corn grits.....	945 lbs.
Dry corn	155 lbs.
Can corn	365 cans.
Dry beans.....	1,424 lbs.
Corn starch.....	47 lbs.
Dry peaches	1,088 lbs.
Dry apples.....	1,196 lbs.
Prunes.....	1,248 lbs.
Raisins.....	64 lbs.
Currants.....	14 lbs.
Canned fruits	75½ doz.
Apple butter.....	64 gal.
Grapes	200 lbs.
Oranges.....	4 boxes.
Lemons.....	3 boxes.
Bananas.....	2 bunches.

Apples	7 bbls.
Baking powder.....	80 lbs.
Soda.....	3 lbs.
Cream tartar.....	6 lbs.
Cocoanut.....	40 lbs.
Tapioca.....	8 lbs.
Chocolate.....	50 cakes.
Macaroni.....	20 lbs.
Crackers.....	1,100 lbs.
Cheese	615 lbs.
Pickles.....	450 doz.
Tomatoes.....	320 cans.
Syrup.....	647 gals.
Kraut.....	57 gals.
Canned pumpkin	65 cans.
Sweet potatoes..	22 bu.
Peas	5 bu.
Beets.....	7 bu.
Radishes.....	35 doz.
Cucumbers.	10 doz.
Melons.....	29 doz.
Butter.....	2,800 lbs.
Lard.....	1,348 lbs.
Eggs.....	680 doz.
Oysters	8 gals.
Canned salmon.....	5½ doz.
Canned mackerel	5 doz.
Codfish	30 lbs.
Salt fish	175 lbs.
Dry beef.....	170 lbs.
Fresh beef.....	30,090 lbs.
Veal	98 lbs.
Fresh pork	2,184 lbs.
Sausage.....	428 lbs.
Hams and bacon	800 lbs.
Poultry.....	300 lbs.

CLOTHING AND DRY GOODS.

Boys' suits.....	50
Hats and Caps	382
Socks	140
Collars	35 boxes.

Ties	36
Suspenders.....	45 pairs.
Shoes	169 pairs.
Stockings	222 pairs.
Linen Collars	26
Cottonades	220 yds.
Cheviots.....	150 yds.
Gingham	1,125 yds.
Wosted dress goods.....	150 yds.
Heavy flannel.....	60 yds.
Drilling	60 yds.
Celicia.....	50 yds.
Nankin	40 yds.
Sheeting	350 yds.
Bleached muslin.....	180 yds.
Unbleached muslin.....	600 yds.
Jaconet muslin.....	20 yds.
Ticking.....	80 yds.
Calico	250 yds.
Shirting.....	440 yds.
Jeans.....	250 yds.
Linen goods	50 yds.
Linen toweling.....	50 yds.
Crash toweling.....	200 yds.
Table linen.....	4 bolts.
Napkins.....	7 doz.
Rubber sheeting.....	20 yds.
Bed spreads.....	32
Comforts	5
Dress braids	20 bolts.
Tape.....	15 bolts.
Pearl buttons	1 gross.
Dress buttons.....	6 gross.
Agate buttons	13 gross.
Coat buttons.....	4 gross.
Vest buttons.....	1½ gross.
Shoe buttons.....	18 doz.
Frill.....	13 bolts.
Indelible ink.....	30 bottles.
Needles	108 papers.
Darners	10 papers.

Shoe laces.....	20 gross.
Pins.....	60 papers.
Handkerchiefs.....	30½ doz.
Thread.....	55 doz.
Scissors.....	4 pairs.
Combs.....	7 doz.
Yarn.....	67 skeins.
Ribbon.....	6 bolts.
Lace.....	4 bolts.

MISCELLANEOUS SUPPLIES.

Laundry soap.....	3,540 lbs.
Bath soap.....	222 lbs.
Mineral soap.....	37 lbs.
Starch.....	16 boxes.
Sal soda.....	500 lbs.
Shoe blacking.....	146 boxes.
Shoe polish.....	10 bottles.
Shoe brushes.....	41
Scrub brushes.....	18
Hair brushes.....	6
Clothes brushes.....	6
Sopolio.....	34 boxes.
Whisk brooms.....	21
Brooms.....	20½ doz.
Shovels.....	2
Chandeliers.....	2
Lamps.....	14
Lamp brackets.....	8
Lamp flues.....	20 doz.
Lamp burners.....	20
Lamp wicks.....	9 doz. -
Reflectors.....	4
Shades.....	2
Lanterns.....	3
Lantern globes.....	4
Mirrors.....	4
Tin basins.....	12
Tin cups.....	32
Tin water sets.....	2
Dish pans.....	5

Coffee pots.....	5
Tin buckets.....	15
Coal buckets.....	6
Night buckets.....	5
Dust pans.....	39
Small ladles.....	18
Large ladles.....	3
Wooden buckets.....	4½ doz.
Wooden measures.....	4
Wash boards.....	2
Wash tubs.....	4
Oil cloth.....	7 bolts.
Oil cans.....	2
Cotton mops.....	2¼ doz.
Mop handles.....	3 doz.
Hatchets.....	5
Cuspidores.....	4
Matches.....	12 pack'gs.
Lye.....	124 boxes.
Clothes baskets.....	7
Scissors.....	4 pairs.
Flat irons.....	4
Wash bowls and pitchers.....	5
Knives and forks.....	3½ doz.
Cups and saucers.....	4 doz.
Bowls.....	12 doz.
Tureens.....	1¼ doz.
Sauce dishes.....	1½ doz.
Plates.....	30 doz.
Gravy bowls.....	4
Goblets.....	3 doz.
Spoonholders.....	4
Water pitchers.....	31
Cream pitchers.....	4
Butter dishes.....	3½ doz.
Vinegar cruets.....	7
Pepper cups.....	7
Salt cups.....	3½ doz.
Butter knives.....	2
Dessert dishes.....	6 doz.
Tablespoons.....	½ doz.
Teaspoons.....	5 doz.

I have endeavored to give an accurate account of the supplies that have passed through my hands from the three store rooms.

Respectfully,

MARY STOHIG.

Our farmer, Mr. James Dougherty, reports the following as farm products, saying the drought of the season has greatly injured and cut short his crops:

Beans.....	28 bu.
Beets.....	27 bu.
Green corn.....	46 bu.
Feed corn.....	700 bu.
Cabbage	2,176 heads.
Hay	25 T.
Lettuce.....	43 bu.
Milk.....	11,775 gal.
Parsnips.....	59 bu.
Peas	12 bu.
Peppers	66 doz.
Pork.....	4,900 lbs.gross
Potatoes.....	666 bu.
Radishes.....	193 doz.
Rhubarb.....	35 bunches.
Tomatoes	79 bu.
Veal	2,200 lbs.gross
Greens.....	9 bu.
Oats.....	1,000 doz.
Cherries.....	27 gal.
Apples.....	100 bu.

We have, also, 4 head of horses, 22 head of cows, 1 2-year-old colt; have fattened 20 head of hogs from the slops from kitchen, and slaughtered 3 beeves of our own raising, weighing 3,375 pounds.

FIFTH ANNUAL REPORT

OF THE

MINE INSPECTOR

OF THE

STATE OF INDIANA,

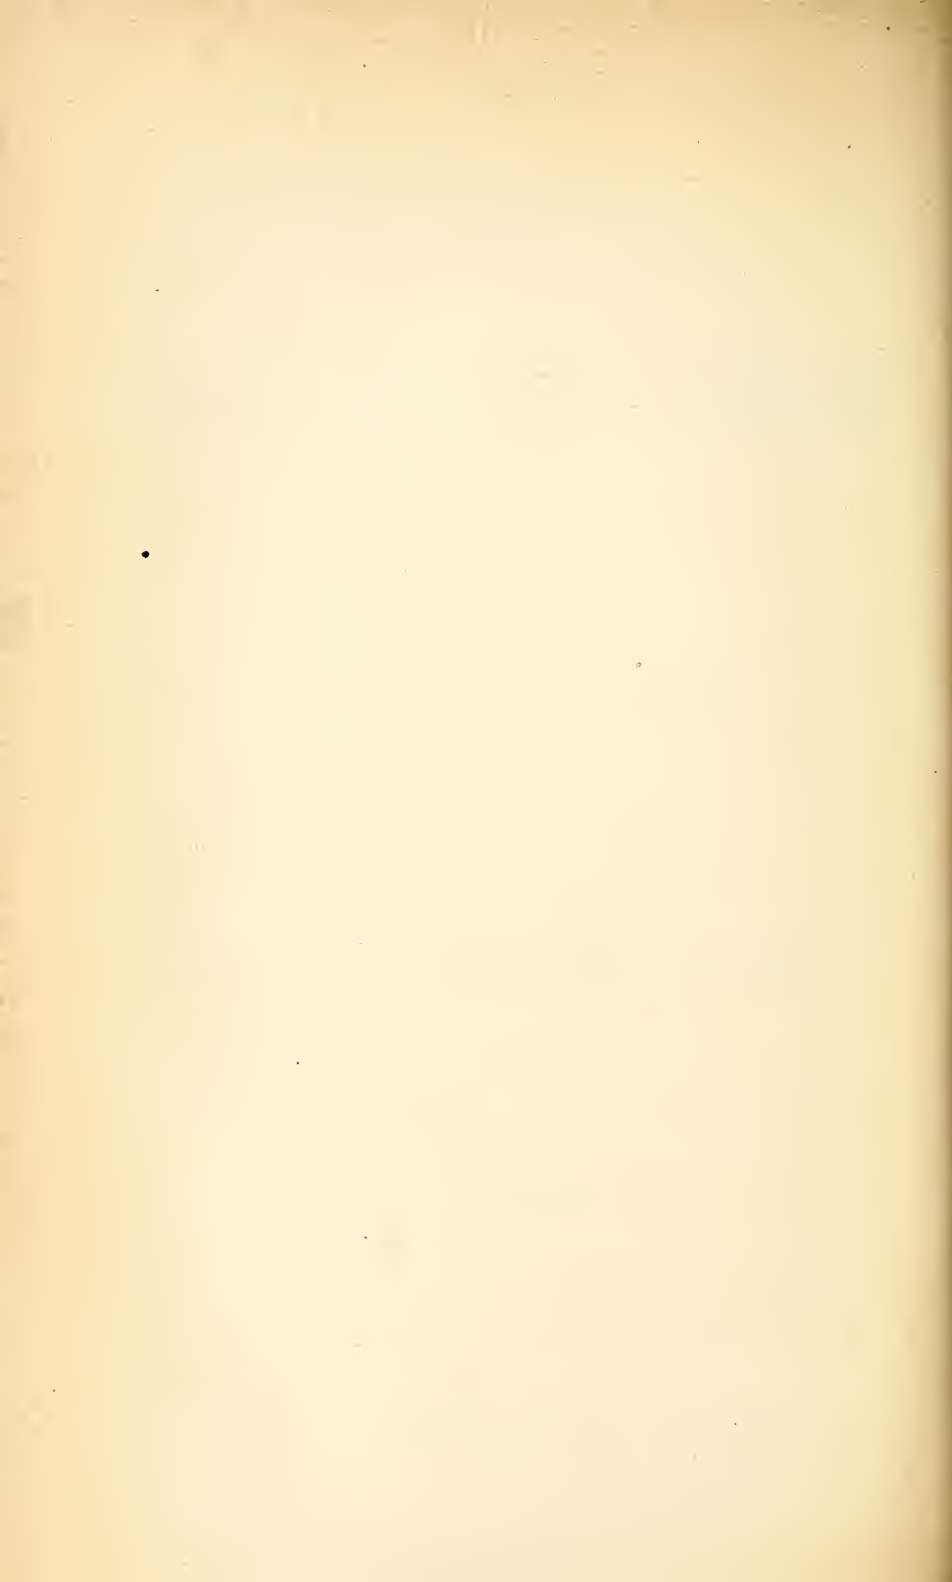

FOR THE

Fiscal Year Ending October 31, 1884.

TO THE GOVERNOR.

INDIANAPOLIS:
WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1885.

THE STATE OF INDIANA, }
EXECUTIVE DEPARTMENT,
GOVERNOR'S OFFICE. }

February 3, 1885.

Received and examined by the Governor and transmitted to the Secretary of State, to be published on the order of the Commissioners of Public Printing and Binding.

PIERRE GRAY,
Private Secretary.

Filed in this office February 14, 1885.

W. R. MYERS,
Secretary of State.

REPORT OF INSPECTOR.

WASHINGTON, IND., January 1, 1885.

To His Excellency ALBERT G. PORTER, *Governor of Indiana* :

SIR—In compliance with the requirements of the Act of the General Assembly entitled “An Act Regulating the Working of Coal Mines,” approved March 8, 1879, and of the Acts of 1881 and 1883, I have the honor herewith to submit my fourth annual report for the year ending the 31st day of December, 1884.

This report contains estimated statistics of the coal industry of the State, including all mines; the number of persons given is the average employed in and about the mines during the year; a brief description of the labors of the Mine Inspector; a short sketch of the new coal fields of the State; a list of the fatal accidents during the year; also, in my judgment, recommendations for the improvement of the mining law, including a copy of the law governing the working of coal mines of Indiana, and such other matters in connection with mines and mining as I have deemed of importance.

Respectfully submitted.

THOMAS WILSON, JR.,

Inspector of Mines State of Indiana.

I have never been able to furnish an accurate statement of the coal tonnage of the State, on account of an unwillingness of some of the operators to furnish the desired information on the first day of last year. Printed blanks were sent out for each of

them to fill out the statistics of their coal production in tons, and capital employed, but a large number of them, after three and four applications, were never answered. There was no effort made on my part the present year for the collection of them, consequently I have estimated them to the best of my knowledge and ability. The mining industry of the State is yearly growing in magnitude, more especially in the southern part of the State, since the completion of the Louisville, Evansville & St. Louis Railway; it has furnished an excellent outlet and markets for the southern part of the State. With the low stage of water in the Ohio during the present year, excluding the up river coals, for a few months of the year, our coal operators in the southern part of the State have built up a trade in Louisville, New Albany and Jeffersonville, with a fair price for coal the whole year (regardless of very high or low water in the river), a trade which they are going to control. There has been a slight decrease in the production of coal in Daviess county during the year owing to the great depression in business in the country. There has been an increase in the production of Parke county from the territory at Minshal station. There has been a large falling off from Clay county, caused from the great strike which lasted three months in the busy season of the year.

ANNUAL PRODUCTION OF COAL.

The following is an approximate estimate of the annual coal tonnage for the past six years:

1879.....	1,196,490 tons.
1880.....	1,550,375 tons.
1881.....	1,771,536 tons.
1882.....	1,990,000 tons.
1883.....	2,560,000 tons.
1884.....	2,260,000 tons.

In reference to the collection of our Mineral Statistics, it should be made compulsory on the operators' part to furnish the necessary statistics when application is made to them, or all efforts for the collection of them should be abandoned. These returns should be treated as confidential, and should only be published in the aggregate production of the State.

THE COAL PRODUCTION OF THE STATE AND MINING CASUALTIES FOR
THE PAST SIX YEARS.

The number of fatal accidents, which occurred in and about the mines during the year 1884, was nine. These have been noted during my visits to the mines; no provision being made by law for the operators to report them as they take place. I have examined the places these accidents have happened, and I find, after careful inquiry, that three-fourths of these accidents were due to carelessness and negligence on the part of the unfortunate ones themselves. Miners, as a class, the more experienced and older they are at the business the more careless they become, and the more they rely on their judgment in case they are working under a loose piece of slate; they think they know just when it is going to fall. In the year 1879 the coal out-put of the State was 1,196,490 tons; the fatal accidents were not reported; number of persons employed, 3,459. In the year 1880 there was no report made of statistics. In the year 1881 there was mined 1,771,536 tons of coal; average number of persons employed 4,567; there was during the same year ten fatal accidents in the mines. Number of tons of coal mined for each fatal accident 177,153, or one death for every 456 persons employed. During the year 1882 there was mined 1,990,000 tons of coal; average number of persons employed 4,952. During the same year the fatal accidents were nine; number of tons of coal mined to each fatal accident 221,111, or one death for each 550 persons employed. There was mined during the year 1883 2,560,000 tons of coal; total number of persons engaged in and about mines 5,403; number of fatal accidents attributed to mines, seven. There was one life lost for every 365,714 2-7 tons mined, making one to every 772 persons employed. The estimated tonnage produced in the year 1884 is put down at 2,260,000; average number of persons employed is 5,716; number of mine accidents were nine; number of tons coal mined to each life lost 251,111, or one life lost for every 635 1-9 persons employed. This is a creditable showing, as our annual coal production and number of persons engaged in mining is increasing. One of the accidents was a young man eighteen years of age, caused by falling down a shaft; another was with a premature blast, where a miner was tamping a blast of powder in the coal, the drill striking sulphur, which

ignited the powder; another was where a miner was carrying four pounds of powder in an open dinner pail, when a spark from the light he carried on his head dropped in the powder, the powder burned him so that he died two weeks afterwards. Most of the other accidents could have been avoided with a strict watch by the mine foremen over their employes, and I consider that they are responsible for three-fourths of the mine accidents in the State of Indiana.

MINING SUITS.

A number of suits have been filed during the year against some of the operators for neglect or refusal to comply with the requirements of the mining law. The cases have been placed in the hands of Prosecuting Attorneys, where they properly belong, but for some cause or other they have never been prosecuted. There has not been one violation of the law but what has been promptly informed on by myself, and the information put on record. I have met some opposition from a few operators, and also from miners, who violate the law themselves more than their employers do, especially in respect to the number of men to ride up the shaft on a cage, and leaving trap doors open. They will go through a door and leave it open, which cuts the air off from themselves and their co-laborers—then complain about bad air in their working places; and in going up the shaft on a cage, from ten to twelve persons would crowd on a cage, in direct violation of the law, and against the orders of the bank bosses. In the year 1883, the General Assembly, on my recommendation, provided sealed weights for the testing of scales used at coal mines, where the miners were paid by weight. The weights were purchased and audited by the Auditor of State, and paid out of the State Treasury; but they failed to appropriate for the transportation of them from one place to another. The weights, 1,500 pounds of them, were placed in the Auditor of State's office, and they are there yet. The miners, during the same session of the Legislature, introduced, through Hon. I. M. Compton, Senator from Clay county, a section, which was passed, giving them the right of selecting and keeping in the weigh office, or at the place of weighing the coal, a check weighman, or a person to watch the company's weigh boss; the check weighman to have the right to inspect

the weighing of coal so mined, and also to examine the books where the weight of coal is kept—the miners to pay the said check weighman. The miners soon got tired of paying for such right, and came to the conclusion that the weigh bosses were a pretty honest set of fellows, as at the end of the year I only found two check weighmen on duty in the whole State. In conclusion, I return my sincere thanks to some of the operators, mine superintendents and mine bosses for the courtesy and respect shown me by them. They have asked no favors, but were always willing to comply in anything reasonable that I might suggest, and I am under obligations to the conservative element of our miners for their advice, and it gives me satisfaction to know that I never betrayed one of them. As for the turbulent class, I have no favors to ask of them, and I am under no obligations to them whatever. I have tried faithfully to discharge the duties of the office without fear or favor, not being arbitrary with any one, but never failing to see that others lived up to the requirements as near as practical.

MINERS' UNIONS, STRIKES, ETC.

The miners of this State do not try to improve their opportunities to better their conditions in life. There are miners in every district, and in every mine in the State, of fine views, who possess intelligence and sound judgment, who might become with properly directed efforts, real benefactors to their fellow-men, and with their influence properly directed with the masses of miners make them respected and valuable citizens. In place of this, all their efforts seem to be directed to organization to keep the price of mining coal up to the highest point, regardless of the market price of coal. This is all wrong. Miners should carefully and calmly study and look at both sides of the question before coming to too hasty conclusions. Supply and demand will govern and regulate the price of mining. When there is more work to be done than there are workers to do it, the product of a certain labor will advance, and *vice versa*. There is no county in the State, no matter how well organized, can govern the market price of coal or the price of mining, nor a State organization, where the largest per cent. of their coal is marketed outside of the State. Saloons and intemperance are two of the greatest evils in a mining district.

Where the saloon element prevails there you can find the most trouble between miners and coal operators. Nine-tenths of all the strikes and mischief that is gotten up is proposed and concocted in saloons. In the latter part of the year 1883, two or three of the leading labor organizations of Clay county effected an organization called the M. A. and A. Association of Indiana, and called a delegate meeting to meet in Terre Haute, Indiana. Each mine was entitled to one delegate for every fifty miners employed and fractions thereof, four or five counties responding to the call. They were in session two days. They passed a large number of resolutions. One resolution was offered condemning some of the acts of the Mine Inspector, proposed by a delegate who did not know the meaning of the section of the mining law he offered the resolution upon. At the present writing he is a prominent applicant for the appointment of Mine Inspector. The fruits of this meeting brought on the great struggle of 1884, in Clay, Park, Vigo and Sullivan counties, which commenced on the first day of March, 1884, and lasting until the first day of June of the same year. Another object being to keep the price of mining at one dollar per ton, that being the price paid in the block coal districts. On the first day of March, the price of mining block coal was reduced to 75 cents per ton, and 70 cents for bituminous coal. There were about 2,000 minors lying idle who lost \$240,000 in wages. The operators lost considerable money and were at a large expense daily, in keeping their mines open, besides losing a large trade in Chicago, as that was their principal market, which during their idleness was supplied from the mines in Ohio and Illinois. Commissaries were established and aid solicited from all parts of the adjoining States wherever it could be procured, though principally from Ohio, from the mining districts that were supplying their Chicago trade with coal.

THE INTRODUCTION OF COAL-CUTTING MACHINERY IN THE STATE OF
INDIANA, AND SOME OF THE PRINCIPAL REASONS
WHY IT WAS DONE.

The Curriesville Coal Co. were the first operators to put in mining machinery. In the month of September their miners came out on a strike against a reduction of ten cents per ton—eighty cents was the price paid previous to the miners stopping

work. After the strike had been in progress some time, the operators tried to effect a compromise at seventy-five cents per ton, but failed. They then organized a stock company, purchased mining machines, and they are giving good satisfaction. About the 15th of September, 1884, the miners working for the Parke County Coal Company, at their No. 2 mine, Rosedale, Indiana, instituted a strike for ten cents advance per ton for mining; they were receiving at that time eighty cents. The superintendent, Mr. Joseph Martin, offered them seventy-five cents per ton, and a contract for one year. The miners declined the offer; the superintendent told them that if they did not accept the proposition the company would be compelled to put in mining machines, as they could not compete in the markets with other coal at present price paid. Machines were purchased, although against the wishes of the company and superintendent, at a cost of \$16,000. The machines are giving entire satisfaction, and have come to stay. After the miners found the company were in earnest, they sent their committee to the superintendent, offering to accept the proposition and sign a contract for one year from that date; but then it was too late. The company had purchased the machines on trial, and they were determined to establish and give them a fair trial before trying to make any agreement with the miners.

The following facts have been demonstrated by the strike:

First. That the market can be supplied with coal independent of Clay county.

Second. That the coal of Indiana can be mined successfully by machinery, a fact disputed by a large number of miners before machines were put in.

Third. That the price of mining in these counties in the future will be paid the same as that in the competing districts.

COAL CUTTING MACHINERY.

It is only a question of time, and not far in the future, when the largest per cent. of the coal mined in the State of Indiana will be undercut by machinery; that is, when the roof will allow of its being done. Coal cutting machinery possess great advantages, to the working miners, over hand mining; one being in the easy method of undercutting, as this is invariably done at the bottom of the coal seam. The miner is re-

quired to sit down on the floor of the mine, commencing to undermine; this is sometimes wet in the dryest of mines—is always damp, and in advancing with his work he is compelled to lie down on his side, oftentimes in the water. This is the most laborious and exhausting labor the miner is subject to, and besides is the most unhealthy, oftentimes bringing on rheumatism and kindred diseases. The mining machines are worked with compressed air, furnished by an air compressor stationed on the surface, generally adjoining the engine house at the hoisting shaft. The compressed air is conveyed into the mines from the receiver in a large pipe along the main entry, and branch pipes are used to convey the air from the main pipe into the rooms to the machines. A piece of hose is attached to ends of these branch pipes, and a valve is placed to cut off the air; a connection is on the other end of the hose to attach to the machine. The coal is cut, or undermined, in the bottom of the seam by means of a heavy bar of solid steel with a forked point for cutting underneath the coal. This drill, or pick, is attached to the piston, which works straight out from the cylinder with great force, and will strike two hundred blows per minute. The pressure of air for ordinary working is about 50 pounds. There is a skilled operator placed in charge of each machine, who in some cases are paid by the day, and others are paid by the lineal foot and a certain depth underneath. A laborer is employed with each machine to shovel away the dirt, who is generally kept very busy. Sixty-six lineal feet, five feet underneath, is an average day's work of ten hours with a Harrison Cutting Machine. The rooms are driven thirty feet wide, and when a room has been undermined across the breadth, the machine is put on a truck and taken into the next one, and so forth, until three rooms have been mined, which are reserved for each machine. After a room has been mined and vacated by the machine men, then comes the shooter and blasts down the coal, and next the loader who loads up the coal. These men are generally paid by the day.

Another great advantage consists in the increased purity of the mine atmosphere; the coal cutting being by compressed air, which being liberated at the working faces forms a discharge or return current, which carries off the noxious gases as fast as they are generated. The coal mined with machinery is supe-

rior and more desirable for the market than that produced by hand labor, as it comes out in larger pieces and does not slack up as much on exposure to the weather, and will yield a much larger tonage to the acre. The machines are only twenty-two inches in height, and are consequently adapted to any seam of coal of workable thickness. There has been opposition from the miners with the introduction of coal cutting machinery in the mines of Indiana, and I suppose always will be. A very bitter feeling prevailed at the time, and any person who expressed himself favorable to them was hooted at. But the impression is all wrong; no intelligent miner will oppose but will try and do the best he can along with them. Disputes may arise as they do with hand labor, but they will be easier settled, as there will not be as many men to deal with, as every machine will take the place of twelve miners. If coal cutting machinery can be made to reduce the cost of mining coal without reducing the wages, they will as surely supplant hand labor as labor-saving machinery has done in other branches of industry; and if they can not be made to reduce the cost of getting coal they will prove a failure, and be cast aside as worthless. The coal cutters are operated by compressed air, furnished with a 24-inch. Norwalk compound compressor, of the latest improved pattern. I have often heard miners say that it would be impossible to substitute machinery for their labor in cutting or undermining coal, and that their trade or occupation could not be interfered with by modern improvements and inventions. I can not understand why coal miners wish to monopolize their most laborious and dangerous employment, and I think any improvement or invention that will lighten their labors must prove a blessing to their families and themselves, instead of any injury.

TO OUR EMPLOYEES.

PARKE COUNTY COAL Co.,
ROSEDALE, INDIANA. }

To all Employes of Mines Operated by this Company:

All employes must observe the following Rules and Regulations while at work in or about the mines of this Company:

TIMBERMEN AND SHOOTERS

Must thoroughly inspect all rooms and entries each morning before any men are allowed to work in same, and properly secure all unsafe places and take down any loose coal or slate that may be found, and at once secure any dangerous places that may be reported to them during the day.

MACHINE MEN

Will carefully examine any place they may have to cut before commencing work, and see that the place has been made secure, and at all times keep a careful watch of the top or face coal, and ascertain by sounding, that everything is secure; and on finding anything unsafe to immediately report the same to his timberman, and have it secured at once, and under no circumstances is he to work or allow his shoveler to work under any coal or slate which is found to be unsafe, without same having been removed or made secure.

LOADERS

Will exercise great caution in loading coal where top coal, slate, or clog is hanging to roof after shooting, and must remove same or report it immediately to the Pit Boss, Mine Superintendent, or their Timberman, and have same properly timbered at once; and they must, as far as in their power, remove all loose or hanging coal, either top or face, when cleaning up a room or

entry before leaving the same, and at all times keep a careful watch of any coal or slate overhanging, which is considered safe, and by sounding know that same continues in a safe condition, and to immediately take down or have properly secured any place found to become unsafe since previous examination.

ALL EMPLOYEES

Are expected to use all possible precaution in the exercise of their duties, and report immediately to the Pit Boss, Mine Superintendent or Timberman any unsafe places they may see, whether in their own rooms or in any entries of the mine.

IT IS THE DUTY

Of the Pit Boss and Mine Superintendent to see that these rules are properly complied with, and that they shall at all times see that all precautions are taken against accident, and that timbers are provided and used whenever needed, and that all places reported to them be immediately examined and secured, and that their Timberman protect at once any unsafe place that may be reported to them.

IT IS EXPECTED

That all employes will carefully carry out these regulations, as it is their own safety we wish to secure.

By order of the Company.

JOSEPH MARTIN,

Superintendent.

After the great strike of 1884, which lasted three months from the first day of March, the miners in Clay county very reluctantly returned to work at seventy-five cents per ton for mining coal; but the price had to be reduced, although it was a big drop from one dollar to seventy-five cents. When the block or non-caking coal could be used for iron working and manufacturing purposes, it commanded a good price and the operators could afford to pay a good price for mining, but when the blast furnaces, rolling mills and manufactories commenced to shut down, owing to the great depression in business, it forced the block coal on the market in competition with inferior grades of

bituminous coal. The seams of the latter coal are a great deal thicker and can be mined and put on board cars much cheaper in every respect than block coal.

There are a number of companies now working under annual contracts, and others on a basis and sliding scale governed by the selling price of coal for the adjustment of wages in Clay county. The coal operators of Clay county that have no contracts made with their miners are governed by the contracts existing between the Drew & Wasson and Brazil Block Coal Companies.

MINING CONTRACTS, ETC.

The following mining contract was agreed upon between Drew & Wasson, and the miners under their employ :

"We, the undersigned committee representing the miners employed by the Drew & Wasson Coal Mining Company, on the behalf of ourselves and the said miners, do hereby agree and bind ourselves and the said miners to mine all coal for said coal company, from this date until the first day of May, 1885, for (80) eighty cents per ton of (2,000) two thousand pounds. We hereby agree not to demand or request any additional rate what ever during the said period, and the said coal company does hereby agree not to demand any reduction in the said rate of mining. In witness whereof, we have hereunto set our hand and seal this second day of October, 1884. This contract is in force from this day, and includes the Gartshire No. 1 and No. 2 mines." The contract system is becoming more in favor every year, both by operators and miners, this insures peace and good feeling between employers and employes, and enables operators to pay better wages, and insures the miners more work, because the coal companies can make yearly contracts and can always depend upon getting the coal to fill them.

ARTICLES OF AGREEMENT,

Made and concluded this 28th day of August, eighteen hundred and eighty-four, between the Brazil Block Coal Company, a corporation of the State of Indiana, and owning and producing a majority of the block coal mined in this district, party of the first part, and Maurice D. Gray, John Morgan, Noah Stephenson, William Lynch and Alexander Maxwell, a com-

mittee of miners appointed and elected in pursuance of a resolution passed at a regular mass meeting of the miners, of a large majority of the miners of the Brazil Block Coal District, of Clay county, Indiana, held on the 18th day of August, 1884, and to whom power was given by said mass meeting to make a yearly contract and fix up a scale of prices for mining block coal, party of the second part.

Witnesseth, That the party of the first part agrees to pay the party of the second part for mining block coal for one year from September 1, 1884, as follows: For the month of September, 80 cents per ton; for the months of October and November, 85 cents per ton, and this is based on a wholesale selling price for coal at the mines to large manufactories and large coal dealers at Indianapolis, Greencastle, Terre Haute, Chicago and Milwaukee, at the rate of \$1.60 per ton at the mines, with the price of coal at 85 cents per ton, and of \$1.35 per ton at the mines, with the mining price at 75 cents; and the party of the second part hereby agrees to accept this price for one year, on the following conditions, viz: It is mutually agreed that after the end of November, if the wholesale price of coal at the mines should be increased above \$1.60 per ton, that the price of mining should be increased 40 per cent. of such increase, and if the price should be diminished below \$1.60 per ton, the price of mining should be reduced 40 per cent. of such reduction, and so continue to increase or diminish in that proportion for the balance of the year, but the price of mining shall not be reduced below 65 cents per ton, let the price of coal at the mines be what it may.

The said parties of this agreement hereby bind the parties they represent to faithfully carry out all the provisions of this agreement for the term of time specified, and further, if either party desire to change this agreement after its expiration, they shall give thirty days notice of such desire and intention, in which case a new agreement shall be made, to take effect after this shall expire. It is understood that the above named committee are to act for the miners during the year covered by this agreement:

It is further agreed that a meeting of the above parties shall be held on the third Saturday of November, 1884, and every thirty days thereafter, to adjust the price of mining for the next month.

In adjusting the price of mining at any time, the statement as to the selling price of coal at the mines of G. R. Root & Bro., A. B. Mayer & Co., and A. M. Kuhn, Indianapolis; Greencastle Nail Works, Greencastle; E. M. Smith, A. Eaton & Co., and L. Mallowery, Terre Haute; O. S. Richardson & Co., A. C. Brackenbush & Co., C. B. Niblock, and North Chicago Rolling Mill Co., Chicago; also the Chicago and Industrial Works newspaper, Chicago; and R. P. Elmore & Co., Milwaukee, shall be taken as final, and if there is a discrepancy in the statements, an average shall be made of the prices named by them, and on this average the mining price shall be fixed.

It is further agreed that all new men coming into the district and engaging to work for said company shall sign an acceptance of complying with this contract.

In witness whereof the several parties have hereunto set their hands and seals in duplicate the day and year first above written.

Signed,

BRAZIL BLOCK COAL CO.,

By D. C. JENNE, Pres. [SEAL.]

MAURICE D. GRAY, [SEAL.]

JOHN MORGAN, [SEAL.]

NOAH STEPHENSON, [SEAL.]

WILLIAM LYNCH, [SEAL.]

ALEXANDER MAXWELL. [SEAL.]

In presence of H. R. Ireland, F. Welker.

BRAZIL, IND.....188...

I hereby agree to enter into the employ of the Brazil Block Coal Company at the mine, as a miner of coal, from date until September 1, 1885, upon the terms of the foregoing contract, agreeing also not to be absent without leave, except in case of sickness or other unavoidable contingency that would prevent me from work; also to abide by the Rules and Regulations established by the said Brazil Block Coal Company for the government and regulation of their different mines.

In witness whereof the parties have hereunto set their hands and seals on the day and year above written.

..... [SEAL.]

BRAZIL BLOCK COAL COMPANY,

By [SEAL.]

The Brazil Block Coal Company own and control the following named mines, viz: Blaine Shaft, Chicago Shaft, No. 3 Shaft, No. 5 Shaft, Briar Hill Shaft, Hancock Shaft, Bartlett Shaft, Campbell Shaft and Morris Shaft, aggregating eight hundred men that are under the employment of this Company; the miners named in this agreement and elected at the mass meeting are acting for the above mines.

The Crawford Coal Company and the miners under their employment have a contract similar to the one drawn up by the Drew & Wasson Coal Company and their miners; agreement entered into October 2, 1884, and expiring May 1, 1885.

The miners working for the Indian Creek Coal Company at Indian Creek Shaft, in Knox county, September 15, 1884, came out on a strike for an advance of ten cents per ton for mining; they were then receiving seventy-five cents per ton; after lying idle two weeks they returned to work on a compromise of five cents, making eighty cents.

The Lancaster Block Coal Company of Clay City, Indiana, after considerable trouble and loss of time during the year 1884, adopted a scale of prices according to the height of coal. At the time of my last visit to the mine in November they were working coal varying in height from three feet to four feet eleven inches; three feet four inches being taken as the standard, all coal three feet four inches and under, eighty-five cents, and all coal above three feet four inches seventy-five cents per ton was paid.

The miners working at the Sullivan Shaft, owned by the Shelburn Coal Company, instituted a strike on the 1st day of October, 1884, and a demand of ten cents per ton, the price paid at that time being eighty cents; after remaining out about three months they returned to work without any advance.

On the first Monday in April, 1884, the miners working at the Shelburn Shaft, owned and operated by the Shelburn Coal Company, declared a strike, which continued until the 1st day of September, 1884. They were receiving eighty cents per ton for mining. Caused by a notice posted up of ten cents per ton reduction. After the strike had been in progress some time the operators tried to effect a compromise at seventy-five cents per ton, but failed; after lying idle nearly six months they returned to work at seventy-five cents.

RECOMMENDATIONS.

Miners and other workmen blasting coal, slate or rock should be compelled by law to use five (5) inches of copper on the end of all drills and tamping-bars when tamping blasts of powder in coal or other hard substances ; this would prevent fatal and serious accidents, caused from the tamping-bars or drills striking sulphur and igniting the powder. This is a section in the mining laws of Illinois and some of the other States, and is having a good effect in preventing fatal and serious accidents.

Section 2, as it now is, gives the operator the right to employ as many persons as he sees fit, provided he has not fifteen thousand square yards excavated. This ought to provide that it shall not be lawful for an operator or operators to allow more than ten persons to work in any mine in every twenty-four hours after five (5) thousand square yards have been mined out. This would have our mines opened in a more practical manner. The practice with a majority of operators now is to crowd a large number of persons into a newly-suken shaft before their entries are driven any considerable distance, consequently the mine is practically ruined in the opening, as rooms are turned off too close to the bottom of the shaft, and the coal is worked out so near that it brings on weight from the superincumbent strata, and the shaft is never safe to work in afterwards.

Section 3 of the Acts of 1881, in reference to surveying and mapping of mines, should be amended so that before a mine or any part of a mine that adjoins other coal lands is abandoned, to have a survey made showing the farthest extremity of the entries or rooms worked in such mine towards the lines of adjoining lands, and also to have it properly staked on the surface. A map should be also required to be made and furnished to the Inspector of Mines, to be filed in his office for future reference. This I regard important, as when a mine is worked out and abandoned, and fills up with water, it becomes a very dangerous element in case a mine should break into it from lands adjoining. Again, a great expense and annoyance in approaching an abandoned mine where the extent of the worked out territory is not known. The survey and map should be made by a practical surveyor, so that the accuracy of the sur-

vey could be relied upon. When a mine is worked out and abandoned, all trace of it may disappear in the course of a few years, especially when the surface has been cultivated.

Section 8 of the Act of 1879 should be amended so as to compel operators to sink a third opening where a furnace is used for ventilating, and is situated at the bottom of the escapement shaft. Escapement shafts or outlets should be provided with safe and convenient stairs at an angle of not more than sixty degrees, and with landings at easy and convenient distances; or there should be kept proper apparatus erected on the top of every outlet or escapement shaft, available for use at all times. These escapements should not be allowed to be clogged or obstructed with machinery, pumps, or anything that would hinder persons from escaping in case of immediate danger. If the head gearing and engine house should take fire and burn down, when a mine has two openings and a furnace is used at the bottom of the air or escapement shaft for ventilating, the whole underground force would be suffocated to death. On account of the furnace being located at the bottom of the air shaft and being the upcast for the air, the main or hoisting shaft would be the downcast, and the smoke and heat from the burning building would be drawn into the mine until the fire at the main building should get to be the strongest. It would then produce an upcast of air, and the furnace shaft would be the downcast, and the smoke and heat from the furnace would be circulated through the avenues of the mine; consequently there would be no means of escape for the miners. If, however, fans were used for ventilating, placed at the top of the air shaft, stairways could be built in the shafts for the accommodation and escape of the miners. In case of accidents, the stairways would not interfere with the ventilation of the mine, and would not be in any danger of being burnt out. The fan would continue to run as long as there was any steam in the boiler; the air shaft would be the downcast, and consequently the air current would be in one direction as long as the fan continued to run. It would supply the miners with fresh air until they could be rescued.

This section provides that every such mine shall have ventilation affording one hundred cubic feet per minute for each and every person employed in such mine, which shall be circulated through the main headings and cross headings, to an extent

that will dilute and render harmless the noxious gases generated therein. The section should also be amended as to the manner of circulating in the rooms.

The law should also require breakthroughs in every room, at least every seventy-five feet. In this case, with rooms running parallel with each other, and the amount of air circulating on each entries passing each room, sufficient air would circulate through the rooms to thoroughly ventilate them. Some of the miners claim that the air current should be conducted into every room; but this could not be done, nor should it be demanded, as it would require a door at every room, and would be a continual and unnecessary expense to the operators. I hope at the next meeting of the General Assembly these important matters will not be overlooked. Mine owners or operators should be required by law to drive air courses parallel to all entries for the proper circulation of air in ventilating a mine, such air courses not to exceed seven feet in width, and sufficient pillar of coal left between them to secure the roof from falling on account of weight of the superincumbent strata forming the roof over the coal seams.

Section 10 of the act of 1879 enacts that no owners or agent of any coal mine shall place in charge of any engine used for conveying into or hoisting out of such mine persons employed therein, any but experienced, competent and sober engineers. Complaints have been made to me from miners that they have had to risk their lives in the hands of incompetent, drunken and careless engineers. Now, who is to be the judge in this matter. Not the Inspector, unless he should find an incompetent person in charge of an engine, or should see an unlawful act of an engineer while on duty, or have proof that others had. In any of these cases the Inspector should have the power to remove him at once. The law should define who shall be the judge in these cases, and by what rule he shall be governed. If it is to be left to the Inspector, then the person in charge of the engine should be required to produce a certificate of competency, showing that he has had charge of a hoisting engine for at least two years, or that he has served as an apprentice for at least that time, and it ought to be left to the Inspector to pass upon his competency.

An additional section should be added to the mining law for statistical purposes, to enable the Inspector to ascertain the

product of our mines. It should be compulsory upon operators to furnish the necessary statistics to the Inspector on application to enable him to make his annual report. The law makes it the duty of the Inspector to collect the coal tonnage and capital invested, but does not compel the operators to furnish the information. Provision should be made by law for the giving of this information, or all efforts in this direction should be abandoned. Four and five applications have to be made to some of them, and they fail to comply with the request. This is very unsatisfactory, and should be remedied.

Mine bosses should also be required to visit their miners in their working places at least once every day, where they employ from ten to fifty miners, and once every two days when they employ more than that number. It is the duty of the mine boss to put in his time amongst his miners and day hands, and the company that employs him expects him to do that, and pay him for that purpose. I have been told by miners that they do not see the bank bosses in their working places once a month, but can find them at the bottom of the shaft, or at one of the partings. Such men should be removed and their positions filled by men that will take an interest in the welfare of the persons that are in their employ, and look after their safety. Miners, as a class, become careless, more especially the experienced ones. They are often aware of the risks they take, but want to do something else before they secure the place, and think they know just when a loose piece of slate is going to fall. A large per cent. of our mine accidents happen in this way. One very seldom hears of a new hand, or greenhorn, as he is commonly called, getting killed or hurt, unless he is working with an experienced miner, and relying on his judgment of the latter as to safety.

Section 19 of the act of 1879 makes it the duty of the Mine Inspector to examine all machinery and boilers used for generating steam at all coal mines in the State. Some of the boilers in use look, from an external examination, as if they are in an unsafe condition. I am free, however, to confess that I can not tell whether a boiler is in a safe condition without going inside of it. All boilers used in generating steam in and about coal mines should be kept in good order, and the agent, owners or operator should have the boilers examined by a competent boiler-maker, or other competent person, as often as every

six months, or oftener if the Inspector deems it necessary. The result of such examinations should be certified in writing to the Mine Inspector. Our mining law should be made to apply to all mines in the State, as a man's life is just as dear to him or his family if he is working where there is only three or four men as if he was working where there is that many hundred, and he is entitled to the same protection.

Section 21 says that no boy under (14) fourteen years of age shall be employed to work in any of the mines of this State. This section of the law is being continually violated by the miners of the State. I am confident that sworn affidavits are furnished by parents and guardians of minor children, but the operators are not to blame for this. If they demand affidavits from parents, and receive them, they are doing their duty. Again, miners will take their children into the mines to help them, but will not demand cars for them from mine foremen. The law should read that no boy under fourteen years of age shall be harbored about or allowed to go into any of the mines of this State.

Whenever a mine or mining place is so situated that it can not be conveniently worked without a ditch or drain to convey the water away from such mine, which shall be necessary to pass over or through lands owned or occupied by others, the owner or operator of any such mine or mining place may enter upon such lands and construct a ditch of sufficient width and depth to convey the water that may be drawn, pumped or drained from such mine so as not to overflow said lands, and upon complying with the law in relation to the exercise of the right of public domain; but the owner, operator or leasees of any mine shall not injure or destroy any growing crops, nor unnecessarily interfere with anything upon such lands.

Again, I say there ought to be a section in our mining law in reference to the duties of Inside Bosses. A mine boss should be compelled by law to visit the working faces in his mine once every day. This would prevent a large number of accidents. Miners as a rule become careless, and should be compelled to secure their working places, when there is danger. Mine bosses should keep a careful watch over their employes, the ventilating apparatus, air-ways, traveling-ways, and the timbering, to see, as the miners advance in their excavations, that all loose slate rock, soap stone, or coal is taken down or secured,

so that no danger can occur from this source. Miners have to do timbering daily, and have loose rock, slate, or coal daily. Then the visits of an Inside Boss should be daily, in order that he may keep a strict watch over employes, and warn them of the danger that they are often subjecting themselves to. The State of Pennsylvania has a section in its mining law defining the duties of bank bosses, which has a good effect, and is giving general satisfaction. The mines of Indiana are not as dangerous as those of Pennsylvania, but our mines are becoming more extensive every year, our miners are increasing in numbers. We are sinking deeper into the earth in search of coal, gases will be met with, consequently the necessity of competent and experienced men in charge of the mines acting in the capacity of mine foreman. Men who do not know the science or theory of mining should never be placed in charge of mines. They do not know the extent of the injury and danger to which they are subjecting their men every day. An incompetent mine foreman will have a worse ventilated mine, will produce less coal per day at greater cost, and will take one-third less aggregate tonnage from the lease, and lose more men by accident than a competent foreman will with the same capital invested, and under the same conditions. The want of educated mining engineers, practically educated, is beginning to be seriously felt, but not appreciated. Waste surrounds us on all sides; our coal beds are so magnificent, and our coal fields so extensive that the waste is not now noticed, though it can not fail to be felt in the future. If we could see the thousands of dollars annually wasted, instead of the tons of coal that is annually buried from view and past recovery, we should then appreciate the want of skill and improvement, and the value of experienced men in charge of our mines.

A man, or a company of men, for instance, will lease or buy a tract of land for the purpose of mining coal. Being men, probably, of no experience whatever, they will sink a shaft and open up a mine on the clap-trap system of working to produce cheap coal, and they will crowd a large number of men into their mine before they have driven the entries any considerable distance from the bottom of the shaft; the coal is worked out too close to the bottom of the shaft and the mine is practically ruined. They hire a man to take charge of the inside workings who knows nothing about the ventilation or system of working

a mine, and the consequence is they can not circulate air through the workings of a mine. The miners thus suffer in health, caused from working in impure air, and the land owners lose to a great extent financially from it. We have some competent and very practical men in charge of mines in our State, and again we have some others that ought to be mining coal.

Another very important matter that will come before the Governor and members of the Legislature is the appointing of a Mine Inspector. The Inspector should possess the technical knowledge of a civil or mining engineer, the practical experience of a mine superintendent. He should be a man who had followed mining coal for a number of years; he should also possess a thorough knowledge of mechanical laws and appliances, and the chemical constituents of dangerous gases, a familiarity with legal methods, and sufficient force and intelligence to give weight to his rulings and a value to his reports; he must also recognize and act upon complaints which may be made to him, involving violations of the law, and, in brief, constitute himself the guardian or advisor of the mining population, so as to reduce as much as possible the numerous perils of their occupation. In order to give entire satisfaction in this matter the miners must act in conjunction with the Inspector, and report to him all violations of the law during his absence, and also on his regular visits to the mines, after personal examination of the different mines; and failing to discover or have pointed out to him by the mine foreman any failure of the operators to comply with the law, if the miners refuse or neglect to notify the Inspector, they are to blame and no one else. There is no man acting in the capacity of Mine Inspector, no matter how qualified or familiar with his duties and the underground workings of the different mines, can discover all deficiencies in the ventilation and the general safety of the mines. Some of the miners contend that an Inspector should make a personal inspection of all rooms in the different mines of the State; This would be a physical impossibility; besides the law does not require him to do so; that is one of the duties of the mine foreman. If the Inspector traverses the entries and air-courses of the different mines of the State, he is doing his duty, except his attention is called by any one to any room or rooms in the mine; it is his duty to examine such places, and if any deficien-

cies are found therein, have such places safely secured immediately. He should be capable, ready and willing to give advice when called for, advance new ideas when necessary, and, in brief, be a general instructor for all who need advice in reference to mines and plans of mining, and in his dealings with mine operators and miners' committees he must not be too arbitrary or too conservative in his decisions; he must not attempt to please every one, but must act in compliance with the laws, and see as far as practicable that every one else does the same.

Section 16 of the Acts of 1879, provides for the examination of ropes by some competent person every morning before the men are allowed to descend into the shaft; is a very good amendment, but I think it should be further amended by an additional safeguard, viz: That safety catches (appliances for stopping and holding the cage in the event of a rope breaking); these appliances should be attached to every cage where persons are lowered and raised into and out of the mines. The General Assembly, in the year 1883, passed an act prohibiting the use of hempen or grass ropes at coal shafts, where persons are lowered and raised up and down coal shafts, which was a very wise amendment. Apart from the question of safety to the lives of persons employed, and considered only in a commercial view, the investment would be an economical one for the operators, for the cost of these catches would be very trifling in comparison to the destruction of property in case of the breaking of a rope. The Winnenour's patent safety appliance is the best and most reliable safety catch ever invented for coal shafts, cages, etc. It is an absolute safety for the prevention of life and the destruction of property in the event of a rope breaking. This invention was gotten up principally for coal hoisting, cages, elevators, etc. Its object is to produce a hoisting cage or elevator in which, should the rope or chain break, the car and cage will be instantly and certainly stopped in its descent in the shaft guides, by a system of gravity brakes or levers, as applied to the platform. The platform is supported in hangers connected to the arms of the bail, and are connected at the upper ends by a cross-brace. Standards or upright pieces called jaws, with spaces between them to form the grooves for the slides in the shaft, are secured at the lower ends to the platform and are connected to the vertical jaws by wrought iron stirrups. The outer edges of the standards are

metal-faced and provided with pulleys, four in number, two for each standard, on axles at right angles to the edge faces of the standards. Rods traverse the underside of the platform transversely and are secured to the platform. The end of these rods project beyond the sides of the platform and on these projecting ends are pivoted weighted levers or dogs (four, two for each guide). The ends of the rods pass through the dogs near the front ends which are beveled so that they will bite into the guides when in contact therewith and stop the descent of the cage. Guard stops are provided, one for each catch, and each catch is also provided with a spring which holds its catch in position with the guide rail. Chains are attached to the outer heavy ends of the catches, which pass under pulleys, thence over pulleys which are provided with guards, to keep the chains in position and ready for action. As the cages are operated by the hoisting rope, the catches are out of action with the slides and are inoperative; but should the hoisting rope break, the catches instantly spring into action with the guide rails and stop the cage. The beveled sides of the catches biting into the guides, the more weight that happens to be on the cage in case the rope breaks the sooner it will be stopped and the firmer it will hold. This appliance is cheap, simple and durable, and is positive in its action. There is nothing about it that can get out of order excepting the ropes, which when broken will permit of no other damage, and may be easily replaced.

VENTILATION

Has received considerable attention the past few years. A majority of our coal operators now realize the fact that good air in a mine is one of the most important considerations to be looked at in the economical working of a mine, and they are studying the different systems and appliances for producing effective ventilation. Natural ventilation can not be relied on, and steam jet ventilation of sufficient power to air an extensive mine is entirely too expensive, as the excavations are extended with entries and rooms branching out in every direction. Natural ventilation amounts to nothing, as the atmosphere is alike on shafts of the same area and of the same surface level; consequently there is no circulation of air, more especially in

the hot and sultry seasons of the year, as when the atmosphere and the warm air of the mine are alike in density. In the cold seasons of the year, when the atmosphere is dry, frosty and light, it don't offer the same resistance to the rarified air of the mine. In these seasons of the year there will be a slight circulation of air. If, for instance, there are two shafts of different surface elevation and connected under ground, and of the same sectional area, the one on the highest elevation will be drawing upcast in the summer season and downcast in the winter.

Steam jet ventilation is still in use at some few shafts, but it is of no avail. A strong exhaust from a mine pump running constantly, or a strong blower situated at the bottom of a dry shallow shaft, where a mine is of small interior dimensions, where there are not many mines at work, it will ventilate. In case of deep, wet shafts, the exhaust steam condenses before it reaches any distance up this shaft, and condenses and falls back in the form of spray, which retards the column of air and produces no circulation.

Furnace ventilation is still in use by a great many of our mine owners, but recently fans are receiving a good deal of attention and are becoming the favorite appliance. I do not recommend the furnace, except in case steam power is not used for hoisting coal. In that case the fan would be as much expense as the furnace, as it would require an extra engineer and boiler, etc., to produce steam, and as much would be used as with the furnace. In case a fan is used the regular hoisting engineer can attend to both, as all he has to do is to turn on steam in the morning and turn it off at night. If a furnace is used it should be situated at the bottom of the ventilating shaft. Deep shafts are better adapted to this mode than shallow ones, as the principle of hot air ventilation is, the more heated column of air there is the stronger will be the volume of air, and consequently the more effective will be the ventilation. A furnace should have a sectional area fully as large as the air courses of the mine (side chambers). Spaces left between the furnace walls and pillars of coal, are beneficial to the ventilating current. They also prevent pillars from taking fire. In building a furnace it adds to its efficiency to elevate the bars about one foot in six until the upcast shaft is reached. The quantity of air would be, in a properly constructed furnace, about 5,000 cubic feet per minute for every foot in width of fire. The depth of

shaft, its freedom from water, the size of air courses in the mine, and the temperature of the atmosphere, all combine in determining the amount of air that can be circulated through a mine by furnace ventilation, but the principal object is in the proper laying off of the mine. It is no trouble and requires no skill or ability to produce a large current of air in a mine, but to properly conduct it to the extremities of the workings is the principal point in view, and to accomplish this thoroughly the mine must be laid off on the double entry system. Air will take the shortest course to the return airway, and will never fail to escape when there is an opportunity offered. There is a great advantage in splitting air currents of a mine into numerous splits. A much larger quantity of air can be propelled by a given power through air passages than through a single air passage, owing to the decreased velocity, and larger aggregate area of the air courses, and large air courses are essential to good and efficient ventilation.

STEAM FANS FOR VENTILATING COAL MINES UPCAIST OR DOWNCAST.

The latest and most improved fans, as well as the cheapest and most durable, are now being manufactured by William E. Cole, of Washington, Indiana. It has been clearly and satisfactorily demonstrated beyond a doubt that the most reliable and economical device yet obtained for ventilating coal mines is the fan driven by steam power. It is an established fact that the cost of a fan and engine combined, with the necessary casing, etc., exceeds but very little the first cost of a furnace to obtain the same amount of ventilation. The fan is driven by steam taken from the main boiler under charge of the hoisting engineer, and the cost of running is almost nothing, as the steam required is not missed, while the cost of keeping a furnace in operation will reach from \$300 to \$500 per year, or more than the entire cost of fan and engine complete. The ventilation by the fan can be varied to meet the requirements of the mine, which can not be done with a furnace; the fans are a great saving in case of shafts dripping water, as the volume of air can be reversed through the entire mine, no matter of what extent, in two minutes time; thus preventing hoisting shafts from freezing up and delaying the hoisting of coal, besides tearing out and destroying the guides in the shaft. By keeping the

fans blowing or forcing the air down, the air or fan shaft in extreme cold where shafts drip water, occasionally they will freeze up; then by reversing the air, and making the fan discharge the warm air of the mine will thaw the ice out in a few minutes; but not so with the furnace, it is a continual draw, and the main shaft is always the downcast, and the heavier the fire in the furnace the stronger will be the current of air down the main shaft. Say for instance, there is from twenty to thirty-five thousand cubic feet of frosty air per minute going down a shaft of from forty to sixty cubic feet of area makes it colder in the shaft, and consequently will freeze up sooner than it will in the open air on the surface.

QUESTIONS

Prepared by the Board of Examiners and put to applicants for the position of Inspector of Mines after the passage of the new mining law of Illinois, June 21, 1883:

Are you thirty years of age, and a citizen of this State?

Have you had a practical mining experience of ten years?

Are you interested as owner, operator, stockholder, superintendent or mining engineer of any coal mine?

What is the character and extent of the coal measures of Illinois?

What are the difficulties usually encountered in sinking and timbering shafts in this State, and how would you overcome them?

State particularly how you would lay off a coal mine so as to secure the best method of ventilation, and make a small diagram of the same, showing the location of ventilating apparatus, doors, air-splits, overcasts, and direction of air currents from inlet to outlet.

Explain the difference between long-wall and pillar and room-workings, and the advantages of each as to ventilation, and the relative amount of coal produced per acre by the two systems.

What are the relative merits of the fan, furnace, or other appliances for producing ventilation?

Give the dimensions and a description of a furnace required to circulate a lawful amount of air in a mine having 2,000 yards of airway—36 square feet of area—working 100 men and

the usual number of animals; and state what would be the kind and size of a fan to produce the same amount of air-current in such a mine.

How can you produce the same amount of circulation in such a mine by natural ventilation?

Describe the different gases encountered in mines, their compositions and characteristics and their effects on animal life.

Describe the kind of furnace you would use to ventilate mines where explosive gases are generated in large quantities.

How would you ascertain the ventilating power of a shaft by the difference of temperature?

Having two shafts, 5x5 feet and 120 feet deep, connected by an entry 50 feet in length, the temperature and the downcast being 32°, and at the upcast 122°, what would be the difference of the columns of air, and what would be the capacity of the ventilating shaft in cubic feet of air per minute?

What would be the horse power necessary to produce a similar current?

Describe particularly methods and instruments by which the velocity of air currents in mines can be measured.

Name the different kinds of safety lamps now in use, and the kind you regard the best, and why.

How would you apply the water guage in testing the power of ventilating apparatus? Give a rule for calculating the same.

If the water guage shows a depression of $\frac{5}{16}$ of an inch, and the quantity of air passing the same point is 37,000 cubic feet per minute, what is the horse-power expended in producing the same?

What kind of a hoisting engine do you consider the most suitable for a coal shaft?

How would you ascertain the horse-power of an engine with 12x24-inch cylinder?

(a) What load would it lift from the bottom if the drum were 10 feet in diameter?

(b) What would be the cage speed?

How would you calculate the breaking strain of a steel or iron wire rope, and what would be the working strain of each?

How would you calculate the safe working load of a $\frac{5}{8}$ -inch chain?

Describe some of the best forms of safety-catches, and their mode of action.

What kind of a steam boiler is best adapted to coal mining, and why?

How would you test a steam boiler to ascertain its safety?

What are the usual causes of fires in mines, and how would you prevent them or suppress them?

State what experience you have had in mine surveying, and name the different instruments in use for that purpose.

If the workings of a mine were approaching the abandoned workings of another mine filled with water, what precaution would you require to be taken to prevent accidents?

Thirty-four applicants were examined by the Board on the above questions, only four of whom passed a satisfactory examination and received certificates of competency.

As the mine inspection act provided for the appointment of five inspectors, a second meeting of the Board was subsequently held, and the following prepared questions were placed before the applicants, three of whom passed a satisfactory examination and received certificates of competency:

SECOND EXAMINATION.

Give a general description of the coal measures in Illinois, stating the number and depth of the various seams found.

State particularly how you would proceed to prospect for coal, and how you would overcome the difficulties that usually present themselves in sinking and timbering shafts in this State.

Describe the different systems of working coal in this State, and the most approved methods of ventilating mines.

State what is meant by air crossings, stoppings and regulators, and what is the best method of constructing the same.

What would you call a velocity for an air current in mines where explosive gases are given off in large quantities?

How many cubic feet of air per minute should be introduced to the working face of a mine in which are employed one hundred and fifty men and fifteen animals? What would be the dimensions of the air-ways in such a case?

What are the different methods of splitting air in mines, and what is the effect of the same upon ventilation?

If you have two air-ways, one with an area of 40 feet, the

other with an area of 30 feet, each being 3,000 feet long, with 20,000 feet of air passing, what would be the difference of friction in the two air-ways?

What is the practical use of the barometer and of the thermometer in mine inspection?

If you have a difference of pressure of three pounds per square foot between the upcast and the downcast, with a volume of 24,000 cubic feet of air per minute, what would be the difference of pressure with a volume of 48,000 cubic feet of air passing, other things being equal?

If you have an air-way with an area of 36 square feet, and a volume of 60,000 cubic feet of air passing, what would be the velocity, in feet, per minute?

What will be the motive column when the air in the downcast shaft has a temperature of 60° , and that of the up-cast shaft a temperature of 160° ?

If, by the expenditure of three-horse power you create a current of 40,000 cubic feet of air per minute, how many horse-power will it take to produce 90,000 cubic feet per minute?

With a difference of one-tenth of an inch of mercury (in barometer) between the down-cast and up-cast shafts, what would be the pressure per square foot, and what would be the motive column?

Describe particularly the methods and instruments by which the velocity of air currents in mines can be measured.

Describe the different kinds of fans and furnaces in use, and the method of calculating their capacity.

Describe the different gases encountered in mines, their composition and characteristics and their effects on animal life.

Name the different kinds of safety lamps now in use, and give their peculiarities, and state which you consider the best, and why.

In case of an explosion of gas underground, whereby the furnace doors, over-casts and air-stoppings are displaced or destroyed, what method would you adopt to restore such a circulation of air as would admit of the prompt rescue of men within?

What kind of an hoisting engine do you consider best for a coal shaft, and what is the rule for finding the horse-power of an engine?

If you have an engine of sixty-horse power, with a cage

speed of 600 feet per minute, what load will it lift from the bottom of a shaft, and what will it haul up an incline plane with a grade of one inch in three?

How would you calculate the breaking strain of a steel or iron wire rope, and what would be the working strain of each? Give a rule for calculating the breaking strain of chains.

Describe some of the best forms of safety-catches, and their mode of action.

How would you test a steam boiler to ascertain its safety?

What are the usual causes of fires in mines, and how would you prevent them or suppress them?

If the workings of a mine are approaching the abandoned workings of another mine, in which there is a head of water of one hundred feet, how much coal would you leave as a safe barrier between the two? and if you should tap it in a two-inch hole, what would be the number of cubic feet of water discharge per minute?

In case a mine were making fifty cubic feet of water per minute, and had a sump that would hold twenty hours' water, and a pump that would raise it in fifteen hours (the supply being cut off), how long would it take the same pump to exhaust the sump if the water was allowed to continue running into it at the above rate?

What would be the dimensions of a pump necessary to perform the work?

Questions prepared by the Board of Examiners, for the examination of applicants for the office of Inspector of Coal Mines, in the State of Colorado, under authority of an act approved February 24, 1883, to regulate the working and inspection of coal mines:

1. What is your age?
2. How long have you been a citizen of the United States?
3. Are you at present interested in the operation of coal mines, either as owner, partner, agent, manager or mining engineer?
4. What has been your occupation up to the present time?
5. How many years practical experience have you had in the workings of the coal mines of Colorado?
6. State particularly how you would lay off a coal mine, so as to conform most effectually with the provisions of this act,

and make a small diagram of the same showing, location of ventilating apparatus, doors, air-splits, overcasts and directions of air-currants from inlet to outlet.

7. What constitutes ventilation in a coal mine, and what are the methods by which a lawful ventilation can be produced?

8. Name and describe the methods by which artificial ventilation can be successfully produced in mines?

9. What are the causes affecting the natural ventilation in mines?

10. Give dimensions and description of a furnace, shaft and stack, required to circulate a lawful amount of air in a mine having 2,000 yards of air-ways, of 36 square feet area, working 100 miners, together with the usual number of mules and drivers; and what would be the kind and size of a fan to produce the same amount of air-current in such a mine?

11. How can you produce the same amount of circulation in such a mine by natural ventilation?

12. Describe particularly the methods and instruments by which the velocity of air-currents in mines can be measured.

13. What is the most reliable instrument or method by which air-courses can be accurately measured?

14. How much should the ventilating power be increased in order to double the quantity of air passing through the mines; and how much should it be increased in order to treble it?

15. What are the methods for splitting air-currents in mines, and what are the advantages to be derived from the same?

16. What size and width would you drive entries, gang-ways and rooms, and what size would you leave ribs and pillars for safety and economy?

17. Describe the kind of furnace you would use to ventilate mines when explosive gases are generated in large quantities; and in what part of the mine would you locate the same?

18. How can you increase the circulation of air in the mines without changing the ventilating apparatus?

19. Would you ventilate a shaft mine by using the hoisting shaft for either the up or down cast, and, if so, which would you prefer?

20. How would you supply the water guage in testing the power of a ventilating apparatus? And give a rule for calculating the same.

21. If the water guage shows one and one-half inches and the quantity of air passing the same point is fifty thousand cubic feet per minute, what is the number of horse-power producing the ventilation?

22. What is the size of a square air-way through which a current of 30,000 cubic feet of air is passing per minute, at a velocity of 500 lineal feet per minute; and what would be the size of two square air-ways to divide the same current into two equal splits, the velocity of each being the same?

23. Which of the last two arrangements would offer the least resistance, and why?

24. What instruments should an inspector have to enable him to discharge his duties under the "Mining Act?" and describe the particular use of each.

25. Should a syphon be placed in a mine with sufficient fall at the outlets, and on trial fail to work properly, what would be the probable cause?

26. To what height can water be lifted by a syphon?

27. What form and size would you make the hoisting shaft of a mine in order to have the necessary room for two cage-ways, ladder-way, and pumping and steam pipes; and what form and size should the other openings be made in order to conform to the law?

28. Describe some of the best forms of safety-catches, and their mode of action.

29. What arrangements should be made in shaft and drift mines for the protection and rescue of the miners in case of an explosion?

30. In approaching old workings that you have no map of, what method would you adopt to insure safety to life and property?

31. Name the different kinds of ropes used in slopes and shafts, and state what is the best.

32. What is the breaking strain of hemp, iron, and steel rope? and give a rule for finding the same.

33. What methods would you use in firing powder blasts, where there is much explosive gas present?

34. If, from any cause a mine should take fire, and the workings become thereby endangered, how would you deal with it?

35. Name the most frequent causes of serious accidents in coal mines, and your methods for preventing the same.

36. What advantage is there in piling gob against the sides of ribs and pillars?

37. Name and describe the various gases found in coal mines, by giving their composition, specific gravity, and their effects on the miners while working in the same.

38. Where are these gases generally found in the mines, and how can their presence be detected, previous to any serious results?

39. What has been your experience and observation in mines when dangerous gases are evolved?

40. What kind of a safety lamp would you recommend, and why?

41. At what depth does a fan and a furnace become equal as regards the amount of air propelled around the workings?

42. Make sketches showing the best methods of making and fitting timber for shaft, slope, and drift.

CHAPTER LXXXVI.

5460. MINES—MAPS.

3. At the request of the owner of any coal mines, the owner of the land, the miners working therein, or any other person interested in the working of such mine, the Mine Inspector shall cause to be made an accurate map or plan of the workings of such mine, on a scale of not less than one inch to the one hundred feet, showing the area mined and excavated, and the location and connection of the lines of all adjoining lands with such excavation of the mine, and the name of the owners of such lands, so far as known, marked on each tract of land. Such map shall show the complete working of the mine, which map, when completed, shall be sworn to by the Mine Inspector to be a correct map of the working of such mine, and shall be kept on file in the office of the Mine Inspector, for inspection at all times. The Mine Inspector shall be allowed a reasonable fee for making such survey, provided that he employs a surveyor to make the same, but he shall not be allowed anything for making the map of same. All expenses shall be paid by the party causing such survey and map to be made.

[1881, page 8. In force March 5, 1881.]

5473. MINE INSPECTOR—APPOINTMENT—OATH—BOND.

17. Within thirty days after this act shall take effect, the Governor, with the advice and consent of the Senate, shall appoint a Mine Inspector, who shall hold his office for two years, and until his successor shall be appointed and qualified. Such Inspector shall be a resident of the State of Indiana, and a practical miner in said State; and no person shall be eligible to hold the office of Mine Inspector who is or may be pecuniarily interested in any coal mine within this State, directly or indirectly. Said Mine Inspector, before entering upon the duties of his office, shall execute a bond, with sufficient surety, payable to the State of Indiana, in the sum of one thousand dollars, for the faithful discharge of the duties of his office, which bond shall be approved by and filed with the Secretary of State. He shall take an oath of office, which may be indorsed on the back of his bond.

5474. OFFICE—SALARY.

18. The Mine Inspector shall hold his office in some central part of the mining district, and for his services he shall receive the annual compensation of fifteen hundred dollars, to be paid on the first day of January, April, July, and October, of each year, out of any moneys in the State Treasury not otherwise appropriated.

[1881, p. 8. In force March 5, 1881.]

5479. TO WHAT MINES ACT DOES NOT APPLY.

3. Nothing in this act, or the act which this act amends, shall apply to any coal mine where there are less than ten men used in and about such mines.

5480. INSPECTION OF SCALES—NOTICE—PENALTY.

4. It shall be the duty of the Mine Inspector, in addition to his other duties, to examine all scales used at any coal mine in this State for the purpose of weighing coal taken out of said mine; and on inspection, if found incorrect, he shall notify the owner or agent of any such mine that the same is incorrect, and after such notice it shall be unlawful for any owner or agent

to use or suffer the same to be used, until the same is so fixed that the same will give the true and correct weight. Any person violating the provision of this section shall, upon conviction, be fined in any sum not less than ten dollars nor more than one hundred for each day or part of the day the same is so used.

CHAPTER X.

An act regulating the working of coal mines, and declaring a lien upon works and machinery for work and labor in mining coal, and for royalty on coal, and providing penalty for the violation thereof, and providing for the appointment and qualification of Mine Inspector, and prescribing his duties, and declaring an emergency. Approved March 8, 1879.

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That the term mine, as used in this act, includes every shaft, slope or drift which is used or has been used in the mining and removing of coal from and below the surface of the ground.

SEC. 2. Six months from and after the taking effect of this act, it shall not be lawful for the owner or agent of any coal mine operated, or which may be hereafter opened, worked by shaft, or slope or drift, within over fifteen thousand square yards have been excavated, to employ more than ten persons to work in such mine, unless there are, to every seam or strata of coal worked in such mine, at least two separate outlets, separated by natural strata of not less than one hundred feet in breadth, by which shafts or outlets, distinct means of ingress or egress are always available to the persons employed in the mine; but it shall not be necessary for the two outlets to belong to the same mine; and to every mine opened, after the passage of this act, and after fifteen thousand square yards have been mined out, it shall be unlawful for the owner or agent to employ more than ten persons to work in said mine in every twenty-four hours, unless there is two distinct outlets; also, in all slopes, drifts and main entries, a sufficient number of refuge holes shall be established.

SEC. 5. Upon the payment of the fees the Mine Inspector shall, within a reasonable time, make and deliver to the party so demanding the same, an accurate copy of any map or plan of the workings of such mine, that may be on file in his office.

SEC. 6. The original map or plan of any coal mine, or the copy filed with the inspector, or a certified copy, issued under the hand and seal of such inspector, shall be evidence in any Court of Justice in this State.

SEC. 7. The term owner, as used in this act, is hereby defined to mean the immediate proprietor, lessee, or occupier of any coal mine, or any part thereof, and the term agent is hereby defined to mean any person, other than the owner thereof, having the care and management of any coal mine, or any part thereof; and in case the mine is owned or occupied by a corporation, then any of its officers shall be deemed its agent.

SEC. 8. The owner or agent of any coal mine shall, within six months from the time this act takes effect, provide and establish a circulation of sufficient amount of pure air to dilute and expel therefrom the noxious and poisonous gases, to such an extent that the entire mine shall be in a fit state, at all times, for men to work therein, and be free from danger to their health and lives from said gases and impure air; said ventilation to be produced by any suitable appliance that will produce and insure a constant supply of pure air throughout the entire mine, but in no case shall a furnace be used at the bottom of the shaft in the mine where the hoisting apparatus and buildings directly over the top of the shaft, for the purpose of producing a hot up-cast of air. Every such mine shall have ventilation affording one hundred cubic feet per minute for each and every person employed in such mine, and shall be circulated through the main headings and cross headings, to an extent that will dilute and render harmless the noxious gases generated therein.

SEC. 9. When a place is likely to contain a dangerous accumulation of water or gases, the working, approaching such place, shall not exceed eight feet in width, and there shall be constantly kept, at a sufficient distance, not less than three yards in advance, at one bore hole near the center of the workings, and sufficient flank bore holes on each side, and where two veins are worked in the same shaft, the upper shall be so protected that no danger will occur to the miners working in the lower vein.

SEC. 10. No owner or agent of any coal mine shall place in charge any engine used for conveying into, or hoisting out of such mine persons employed therein, any but experienced, competent and sober engineers; and no engineer in charge of such engine shall allow any person, except such as may be deputed for that purpose by the owner or agent, to interfere with it, or any part of the machinery; and no person shall interfere or in any way intimidate the engineer in the discharge of his duties, and in no case shall more than six (6) men ride on any cage or cart at any one time, and no person shall ride upon a loaded car or cage when the same is being hoisted out of or being conveyed into the mine.

SEC. 11. The owner or agent of any coal mine operated by shaft or slope shall provide a sufficient cover overhead on all carriages or cages used for lowering or hoisting persons in and out of the mine, and on the top of every shaft an approved safety gate, also an approved safety spring on the top of every slope, and an adequate brake shall be attached to every drum or machine used for lowering or raising persons into or out of all shafts or slopes, and also a proper indicator (in addition to any mark on the rope) which shows to the person who works the machine the position of the cage or load in the shaft, and there shall be cut in the side of every hoisting shaft, at the bottom thereof, a traveling way sufficiently high and wide to enable persons to pass the shaft in going from one side to the other without passing over or under the cage or other hoisting apparatus.

SEC. 12. The agent or owner of every coal mine, shaft or slope, at the end of six months from the time this act takes effect, shall keep the top of every shaft or slope, and the entrance thereof, securely fenced off by vertical or flat gates covering and protecting the mouth of such shaft or slope, and the entrance of abandoned shaft or slope be securely fenced off, so that no injury can arise therefrom. The owner or agent, or either of them, violating the provision of this section, shall be fined in any sum not exceeding one hundred dollars for each day or part of day the same is violated.

SEC. 13. Any miner, workman, or any other person, who shall knowingly injure or interfere with any safety lamp, air-course, or with any brattice, or obstruct or throw open doors, or disturb any part of the machinery, or ride upon a loaded car

or wagon in any shaft or slope, or do any act whereby the lives or health of the persons, or the security of the mines and machinery are endangered, every such person shall be deemed guilty of a misdemeanor, and, upon conviction, shall be fined in any sum not exceeding ten dollars.

SEC. 14. The Mine Inspector, miners employed and working in and about the mine, the owner of the land, or other persons interested in the royalty or rental of such mine, shall, at all proper times, have full right of access and examination of all scales, machinery, or apparatus used in or about said mine, including the bank book in which the weight of coal is kept, to determine the amount of coal mined, for the purpose of attesting the accuracy.

SEC. 15. In all coal mines in this State the miners, and other persons employed and working in and about the mine, the owners of the land, or other persons interested in the rental or royalty on the coal mined therein, shall have a lien on said mine, and all machinery and fixtures connected therewith, including scales, coal bank cars, and everything used in and about the mine for work and labor performed within two months, and the owner of the land, for royalty on coal taken out from under his land, for any length of time not exceeding two months; and such liens shall be paramount to, and have priority over all other liens, except liens of State for taxes, and such liens shall have priority, as against each other, in the order in which they accrued, and for labor over that for royalty on coal. Any person, to acquire such lien, shall file in the Recorder's office of the county (where) the coal mine is situated, within sixty days from the time the payment become due, his notice of his or their intention to hold a lien upon such property for the amount of his claim, stating in such notice the amount of his or their claim, and the name of the coal works, if known, or any description, describing the location of said mine; and the Recorder shall record the said notice, when presented, in a book used for recording mechanics' liens, for which the Recorder shall receive a fee of twenty-five cents. Suit brought to enforce any lien herein created, shall be brought within one year from the date of filing said lien in the Recorder's office, and all judgments rendered on the foreclosure of such liens shall include the amount of the claim found to be due, and with interest on the same from the time due, and with

a reasonable attorney's fee, the judgment to be collected without relief from valuation, appraisement or stay laws. For all wages due the miner, or other person working in or about the mine, shall be due and payable on the second Saturday, month after month, in which the work was done, and all payments to be made in bankable funds of the State of Indiana.

SEC. 16. The rope used for hoisting and lowering, in every coal mine, shall be examined by some competent person every morning before the men descend into the shaft; and when gas is known to exist, there shall be a competent fire-boss whose duty it shall be to examine each and every place in the mine before the men are permitted to enter and work; and the said fire-boss shall be at the mouth or bottom of the mine each day to inform every man as to the state of his room or entry; said works to be carefully examined every morning with a safety lamp, by a competent person, before any workmen are allowed to enter.

SEC. 19. It shall be the duty of the Mine Inspector appointed under this act, to enter, examine and inspect any and all coal mines, and the works and machinery belonging thereto, at any reasonable time by day or by night, but so as not to hinder or obstruct the workings of such coal mines more than is reasonably necessary in the discharge of his duties, and the agent or owner of such coal mine is hereby required to furnish the necessary facilities for such entry, examination and inspection; and should the owner or agent fail or refuse to permit such inspection, or furnish such facilities, the owner or agent so failing shall be deemed to have committed a misdemeanor, and it is hereby made the duty of such Inspector to charge such owner or agent of such violation, under oath, in any Court of jurisdiction, and upon conviction the owner or agent, or either or both, shall, upon conviction, be fined in any sum not exceeding one hundred dollars for each offense.

SEC. 20. The Inspector, appointed under this act, shall devote his entire time and attention to the duties of his office; he shall make personal inspection, at least twice each year, of all coal mines in this State, and shall see that every precaution is taken to insure the health and safety of the workmen therein employed, and that the provisions and requirements of this act are faithfully carried out, and that the penalties of the law are enforced against all who willfully disobey its requirements;

he shall also collect and tabulate the following facts: The number and thickness of each vein or strata of coal, and their respective depths below the surface, which are now worked, or may be hereafter worked, the kind and quality of coal, how the same is mined, whether by shaft slope or drift, the number of mines in operation in each county, and the owner thereof, and the number of men employed in each mine, and the aggregate yearly production of tons from each mine, together with an estimate of the amount of capital employed at each mine, and any other information, relative to coal mining, that he may deem necessary, all of which facts, so tabulated, together with a statement of the condition of mines as to safety and ventilation, he shall freely set forth in an annual report to the Governor, together with his recommendation as to such other legislation on the subject of mining as he may think proper.

SEC. 21. No boy under fourteen years of age shall be employed to work in any of the mines in this State.

SEC. 22. Any person violating any of the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be fined in any sum not exceeding five hundred dollars for each offense.

SEC. 23. Whereas, there is no law now upon the subject of ventilation, and there is therefore an emergency for this act taking effect, therefore the same shall be in force from and after the 1st of May, 1879.

CHAPTER LIX.

An act to amend section 16 of an act entitled "An act regulating the working of coal mines, and declaring a lien upon the works and machinery for work and labor in mining coal, and for the royalty on coal, and providing penalty for the violation thereof, and providing for the appointment and qualification of Mine Inspector, and prescribing his duties and declaring an emergency," approved March 8, 1879, and to amend section 4 of an act supplemental to said act, approved March 5, 1881, being sections 5472 and 5480 of the Revised Statutes of 1881, and adding a supplemental section thereto.

[Approved March 3, 1883.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana*, That section sixteen of the above entitled act, being section 5472 of the Revised Statutes of 1881, be so amended as to read as follows: Section 16. The rope used for hoisting and lowering in every coal mine shall be a wire rope, and shall be examined by some competent person every morning before the men descend into the shaft. When gas is known to exist there shall be a competent fire-boss, whose duty it shall be to examine each and every place in the mine before the men are permitted to enter for work; said fire-boss shall be at the bottom or mouth of the mine each day, to inform every man as to the state of his room or entry. Said work shall be carefully examined every morning with safety lamps, by a competent person, before any workmen are allowed to enter.

SEC. 2. That section four of the above entitled act, being 5480 of the Revised Statutes of 1881, be so amended as to read as follows: Section 4. It shall be the duty of the Mine Inspector, in addition to his other duties, to examine all scales used at any coal mine in this State for the purpose of weighing coal taken out of said mine, the same to be tested by sealed weights, to be furnished to said Mine Inspector by the Auditor of State, the cost of which is to be audited by the Auditor of State, and paid out of any money in the State treasury not otherwise appropriated. And, on inspection, if found incorrect, he shall notify the owner or agent of any such mine that the same is incorrect, and after such notice, it shall be unlawful for any person or agent to use, or suffer the same to be used, until the same is so adjusted and the same will give the true and correct weight.

Any person violating the provision of this section shall, on conviction, be fined in any sum not less than ten nor more than one hundred dollars for each day or part of a day the same may be used.

SEC. 3. Whenever the mining of coal is paid for by the weight, the persons employed in mining the same, shall have the right of selecting and keeping in the weigh office, or at the place of weighing the coal, a check-weighman, who shall have the right to inspect the weighing of coal so mined by such miners; the miners to select and pay their said check-weighman.

For the benefit of persons unacquainted with mines and mining terms, I have inserted the following:

GLOSSARY OF TECHNICAL MINING TERMS.

Air-box—A wooden box used for taking air forward to the workings.

Air-course—A gallery or other passage-way used for the time for the passage of a current of air.

Air-crossing—A bridge or overcast where one current of air passes another without coming in contact with it.

Air-way—(See air-course.)

After-damp—Gas formed from the products of an explosion of fire-damp, composed mainly of carbonic acid and free nitrogen gas.

Air-shaft—A shaft used for ventilating mines; it may either receive or discharge the circulating current.

Air-split—The division of the main current of air into two or more streams.

Anemometer—An instrument for measuring the speed with which air moves in mines.

Anticlinal—An arch in the strata from which they dip in opposite directions.

Air-stack—The chimney on top of the upcast shaft.

Basin—A low place or hollow in the strata, from which the coal rises in opposite directions. A coal field.

Bad Air—Air contaminated with the noxious or poisonous gases of mines.

Bank—A coal mine, sometimes small.

Black Damp—Carbonic acid gas.

Black Band—Carbonaceous shale iron of a dark brown color.

Blower—A jet of fire-damp escaping from coal or its associate strata, which produces a hissing sound.

Bucket—A wooden box for raising rock in a shaft in course of sinking. The clack of a lifting pump.

Bell Mound—The cast of a tree found in the roof shale of a coal bed.

Bank Boss—(See Mine Boss.) Inside foreman of a mine.

Boss Miner—(See Mine Boss.)

Brasses—Iron pyrites found in coal.

Block Coal—A coal seam that mines in rectangular blocks without the use of gun-powder.

Butts—The end slips of the coal.

Blast—A discharge of gun-powder in coal.

Bearing In—Cutting under—undermining in the coal.

Billy Fairplay—A machine placed under a coal screen to receive and weigh the slack which falls through the screen bars.

Breakthrough—A narrow passage cut through a coal pillar for ventilation.

Butt Entry—An entry driven at right angles with the end slips of the coal.

Bone Coal—Hard slaty coal, unfitted for commercial purposes. It is often met at the bottom of the seam.

Blossom—The black coal stain found in the alluvial cover of a coal seam, indicating the existence of the seam.

Boundary Pillar—A pillar left between adjoining properties in mines.

Bear-in—(See undermining.)

Bonnet—The cover of a cage.

Bottom—The floor of the coal, the bottom of the shaft or slope.

Brettice—A partition made of plank to force air forward or prevent it from returning by the shortest route to the upcast.

Brettice-cloth—A trap door made of canvass or other heavy cloth.

Breeding Fires—Fires formed in the gob by spontaneous combustion.

Buntons—The cross timbers of a shaft which support the guides

Cage—That part of the elevator of a coal shaft for raising or lowering coal and men.

Catches—The fans or traps or levers placed on top of a pit upon which the cages rest.

Coal Bed—An extended deposit of coal.

Coal Seam—(See coal bed.)

Coal Field—A region of country in which coal is known to exist.

Coal Measures—The strata associated with coal beds.

Coal Cutter—A machine used for cutting coal.

Coal Miner—One who digs coal.

Coal Digger—(See coal miner.)

Crop Coal—Coal of an inferior quality near the surface.

Cartridge—A paper or other tube filled with blasting powder.

Crib—A pillar formed of wooden props laid horizontally.

Crush—The breaking or giving way of the superincumbent strata of a mine.

Creep—The heaving of the floor of mines.

Crab—An iron rod forked at one end, attached to loaded coal cars coming up out of a slope.

Cross-cut—(See breakthrough.)

Choke-damp—The gases formed by an explosion of fire-damp.

Colliery—Two or more mines operated by one company.

Coal-pipe—(See bell-mound.)

Circulation—The movement of the air-currents of a mine.

Check-weighman—A person employed by the miners to see their coal weighed.

Current—The moving stream of air of a mine.

Cross-entry—An entry running at an angle with the main entry.

Chain Pillar—The pillar between double entries.

Check—(See ticket.)

Cap—The crown-piece of a prop—the elongation of a light brought in contact with fire damp.

Car—Mine car.

Cave-in—A fall under ground reaching up to the surface.

Charge—(See Shot.)

Davy Lamp—(See Safety Lamp.)

Dead-work—The expense of operating a mine, less the cost of digging coal and royalty.

Dip—The inclination of the strata.

Dip-entry—The gallery of a mine following the line of greatest dip.

Draw Slate—A thin stratum of roof shale which falls with the coal, or soon afterward.

Downdrop—A slip in the coal strata which throws the coal down.

Drain—A ditch cut in the coal floor.

Drift—A level free mine, driven in a hill.

Dry-burning Coal—Non-coking coal.

Drill—An iron rod several feet in length, having a sharp chisel at one end for boring in rock or coal.

Double Entry—Two entries driven on parallel lines, separated by a pillar of coal a few feet in thickness.

Drum—A large cylinder around which the rope is wound.

Driver—A person who drives a horse or mule in a mine.

Downcast—The shaft or shaft compartment through which fresh air is sent into the workings of a mine.

Danger Signal—A signal consisting of a board, shovel or other material placed in front of a room or entry containing an explosive mixture of fire-damp.

Day Shift—Miners who work during the day in a mine, or portion of a mine which runs day and night.

Dump—(See tippie.)

Dump House—The building where the loaded mine cars are emptied into the chutes.

Dumb-furnace—A ventilating furnace, where the return current of air is delivered into the air-shaft without passing over the furnace fire.

Dumb-drift—The passage way in the upcast shaft for a return current of air.

Dip Heading—(See Dip Entry.)

Deputy—Under mine boss.

Engine-pit—A shaft through which water is pumped.

Entry—A narrow gallery or heading driven forward to open up the mine.

Explosion—The ignition of a dangerous volume of fire-damp.

Fall—A mass of shale fallen from the roof.

Face—A place in a mine where the coal is dug out—the end of a mine or other working place.

Face Slip—The front slip of a coal seam.

Face Entry—The gallery of a mine driven at right angles with the face slips of the coal.

Fan—A machine for blowing air into or exhausting air out of a mine.

Fault—The disturbed condition of a coal bed.

Feeder—A stream of water or gas issuing from the coal or incumbent strata.

Fire-damp—The explosive gas of coal mines.

Fire-viewer—A person whose duty it is to examine the workings of a mine with a safety-lamp.

Floor—The bottom of a coal seam.

Flue—(See furnace).

Furnace—A brick fire-place erected at the bottom of the upcast shaft for the purpose of creating a current of air.

Fresh Air—Air free from the presence of deleterious gases.

Fine Coal—(See slack).

Foreman—(See bank boss).

Gases—The deleterious air of mines.

Gob—The rubbish left in a mine.

Gouge—To work a mine without plan or system.

Guides—The rods placed in a shaft for guiding the cages in their ascent and descent.

Half-course—Working at half-angle across the slips of the coal.

Half-pitch—Dipping or rising eighteen inches to the yard.

Hauler—(See driver).

Heading—(See entry).

Heave—The creeping or rising of the coal floor.

Hitcher-on—The person employed at the bottom of a shaft or slope to put on loaded cars and take off empty cars.

Holing—Undermining the coal.

Hill—An arch or high place in a mine.

Horse-gin—A large drum fitted upon an upright axle and having a wooden arm, used in raising the debris of shafts in course of sinking, operated by a horse.

Hopper—The railway coal car.

Horseback—The saddle-like roll which rises in the floor of the mines for two or three feet in height. This fault is now indiscriminately applied to every mining trouble or fault by American miners.

Incline Plane—A tram-road having sufficient pitch for the loaded cars to pull up the empty ones by gravitation.

Indicator—A signal operated by the hoisting engine of a coal shaft, which warns the hoisting engineer of the position of the ascending cage in the shaft.

Intake—The current of air of mines moving toward the working places of the miners.

Ingoing Current—(See intake.)

Iron Pyrites—Thin layers of sulphur combined with iron, frequently found in coal.

Lease—The right to mine coal or other minerals in consideration of certain royalties.

Level—The line of stake of the strata.

Level Free—A mine that discharges water by gravitation.

Legs—The props of a bent of timbers.

Loaded Track—The track on which the full cars run.

Long Wall—The system of working away all the coal of a mine with leaving any pillars.

Long Work—(See Long Wall.)

Loose End—One side of a room having no pillars.

Landing—The top of a shaft or slope where the cars are taken off.

Lump Coal—Coal that has been screened; it is also called screened coal.

Manager—The officer having charge of the superintendence of mines outside and inside.

Manway—A passage way at the bottom of a shaft so that persons can pass from one side to the other without passing under the cages.

Measuring Day—The day of the month on which the mine boss measures the work of mines.

Mine—A subterraneous excavation from which coal or other minerals is extracted.

Miner—A digger of coal or other minerals.

Mining Engineer—A person skilled in the management and engineering of mines.

Mother Coal—Mineral charcoal.

Main Entry—An entry driven at right angles with the face slips of the coal.

Mitchell Tipple—An ingenious tipple for dumping mine cars.

Mouth—The opening or entrance of a mine, whether shaft, slope or drift.

Narrow Work—All working places driven narrower than rooms. Narrow work is generally confined to entries and air-courses.

Needle—A long, small rod used by miners in blasting.

Night Shift—Miners who work at night.

Nigger-head—A hard, round piece of rock, sometimes met in coal seams.

Nut Coal—The small coal which passes through the screen bars as the coal is being discharged from the mine cars into the railroad cars or hoppers.

Overman—(See bank boss.)

Overwind—To pull the cage up to the pulley wheels of the head frame.

Ostler—The person who feeds the horses and mules, and keeps the stable in order.

Outcrop—The coal near the surface.

Operator—Any party working a mine.

Outlet—The opening of a mine.

Pit—(See shaft.)

Pit Boss—(See bank boss.)

Pitch—The dip or rise of the strata.

Pay-day—The day on which miners are paid; usually the 15th of each month.

Parting—A switch or short double track in the mine to allow loaded and empty cars to pass each other.

Pillar—A column of coal left in the mine for the support of the superincumbent strata.

Pillar and Room—Working away a coal seam by leaving pillars between each room.

Post—A wooden prop for keeping up the roof of a mine.

Prop—(See post.)

Pick—The iron tool, with steel points, used by the miner in undercutting the coal seam. It is twelve to fifteen inches in length, sharpened at both ends, and has a handle twenty-eight to thirty inches long.

Pumper—A person employed to pump water in a mine by hand-power.

Pulley Wheels—The large wheels on top of the pit-head frame, over which the winding rope passes.

Powder—Blasting powder.

Regulator—A sliding door for the purpose of regulating the quantity of air passing to certain divisions of a mine.

Return—The air of a mine moving between the working places and the upcast shaft.

Roadman—A person whose duty it is to keep the roads of a mine in order.

Roll—A local depression in the roof of a mine.

Roof—The strata lying immediately above the coal bed.

Royalty—The rate per ton charged by the owner of coal or other minerals to the lessee of the mine.

Rib—A thin pillar of coal left between rooms.

Room—A working place in the mine.

Rib-shot—A shot in the rib side or pillar of a room.

Range—A lift or square of workings.

Road—The mine track.

Safety-lamp—A miner's lamp covered with iron wire gauze, having 784 apertures to the square inch, for the purpose of examining the workings of a mine discharging fire-damp.

Scraper—A long piece of iron flattened at one end and turned up, for the purpose of cleaning out the debris of a bore-hole.

Screen—A wooden frame, built at an angle of twenty-five or thirty degrees, having iron bars securely fixed in the frame, from three-eighths of an inch to two inches apart, over which the coal as it comes from the mine is passed, for the purpose of separating the nut and slack from the lump coal.

Shaft—A hole sunk in the ground to coal or other mineral beds or veins.

Shift—A days work when miners are working by the day.

Shot—A discharge of powder in a hole drilled to throw down coal.

Sinker—A miner who works in a shaft while it is in course of sinking.

Slack—Small or refuse coal which is unmerchantable.

Slip—A fault in the coal strata—the face and butt joints of the coal seam.

Slope—An angling shaft.

Strike—The cessation of work by miners or other laborers for the redress of some grievance, real or imaginary.

Sump—A reservoir or pond formed at the bottom of the pumping shaft of a mine for holding water.

Syphon—Pipes placed in a mine to discharge water over a hill.

Shutes—The slanting passage frame way from the tippie to the railroad hoppers in which the screen bars are placed.

Synclinal—A hollow or basin in the floor of the mine from which the coal rises in opposite directions.

Safety Gate—Automatic gates placed on top of a shaft to guard the entrance.

Safety Catches—Spring catches attached to a cage to prevent it from falling to the bottom in case the winding rope should break.

Swamp—A sinuous trough-shaped basin found in mines.

Squeeze—(See Crush.)

Shearing—Cutting a perpendicular groove in the coal seam.

Tip—(See tippie.)

Tippie—The table from which the mine cars are dumped into the chutes.

Tram-road—The railroad from the dump to the mouth of the mine.

Tubing—Hollow cast-iron segments placed in a shaft to dam back water or sink through quicksand.

Turn—The order in which empty cars are placed in the room of miners.

Timbers—The wooden structures planted in a shaft, slope or drift until solid ground is reached.

Track—The road for hauling coal.

Tracklayer—One who lays track in a mine.

Tunnel—An entry driven through rock in a mine.

Trapper—A boy employed to open and shut a trap-door.

Trap-door—A door to guide and direct the current of air in a mine.

Trimmer—The person who sorts the coal in the railway cars after it is dumped into them.

Tub—A box used for raising rock in sinking for coal or other minerals.

Trough—(See swamp.)

Ticket—The number which the miner puts on his loaded car to inform the weighmaster to whom the coal belongs.

Upthrow—A slip in the strata which throws a coal seam upward.

Upcast—The shaft or compartment through which the return air of a mine is delivered into space.

Undermining—Cutting a groove in the bottom of the coal bed.

Vein—A bed or seam of coal. This word is misapplied, but it has become so general a term for a bed or seam of coal that it is here inserted with its accepted meaning.

Ventilator—(See fan.)

Ventilation—The renewing of the circulating streams of air of mines.

Water Gauge—An instrument used by superintendents of mines for ascertaining the resistance or pressure that is spent in friction between two adjoining parts of an airway. It is a glass tube, bent like the letter U, with a scale of inches and parts of inches.

Washing Machine—A machine employed at mines for washing the slack or nut coal, in order to separate the impurities from the coal.

Water Level—A passage way for the discharge of water.

Wind-way—A narrow air-way.

Workings—The excavation of a mine.

Working-face—The place where the miner digs out the coal.

Working-place—(See working-face.)

Weighmaster—The person who weighs the coal.

White Damp—Carbonic oxide gas.

Waste—Abandoned workings.

Water Lodgment—(See sump.)

FATAL ACCIDENTS IN CLAY COUNTY.

July 15, 1884, Nathan Morris was killed instantly, in the Seelyville shaft. He was riding in with the mule driver, in a trip of empty cars, when a large piece of slate fell on him. The mule driver escaped with a slight bruise.

Sept. 12, 1884, John F. Osborn was instantly killed by a large piece of slate falling on him while at work in a room in the Campbell shaft, owned and operated by the Brazil Block Coal Company.

Sept. —, 1884, Amos Wright died from injuries received by slate falling on him while at work in a room in the Campbell shaft, owned and operated by the Brazil Block Coal Company. He lived about twenty-one days after receiving the injuries.

FATAL ACCIDENTS IN DAVIESS COUNTY FOR THE YEAR 1884.

Nov. 28, 1884, William S. Allen, aged 28 years, was instantly killed by a large piece of slate falling on him while at work in the mines of Thomas Critchlow, near Epson. The piece of slate that fell on him was ten inches in thickness by ten feet square.

May, 1884, George Nail died from the effects of a burn from an explosion of powder. Deceased was a miner, and was employed in the Buckeye Mines of the Buckeye Cannel Coal Company. Mr. Nail was preparing a blast and was carrying the powder in an open dinner pail, when a spark from his light ignited the powder which burned him so that he died the next day.

FATAL ACCIDENT IN DUBOIS COUNTY.

November — Henry Dull was instantly killed by falling slate in the Rose Bank mines, near Jasper. Deceased had gone into the room after a heavy blast had been fired, and while standing close to the face of the room, while the smoke was very dense, a large piece of slate, loosened by the effects of the blasts, fell on him.

FATAL ACCIDENT IN SULLIVAN COUNTY.

August 20, 1884, Isaiah Davis was instantly killed at the face of his own entry, by a large piece of slate falling on him while at work in the mines of the Lyonton Coal and Coke Company, at Buel City.

FATAL ACCIDENT IN PARKE COUNTY—PREMATURE BLAST.

Nov. 22, 1884, No. 3 shaft of Parke County Coal Company. John Towers died from the effects of injuries received from a premature blast. He was charging a hole with powder and was pushing it to the back part of the hole with a drill, when striking sulphur, it ignited the powder. Being struck with flying coal and from the effects of powder burns, he died two weeks afterward.

FATAL ACCIDENT IN PIKE COUNTY.

Sept. 21, 1884, Joseph Creiger, aged 17 years, was instantly killed by falling down the Whitman shaft of the Whitman Coal Company, on Sunday. The young man had been sent up on the tippie to switch some bank cars around the top of the shaft. He pushed one a little too far, and there being no safety-gates on top of the shaft, the car became overbalanced, and in trying to hold the car, it pulled him into the shaft and he fell a distance of sixty-five feet.

 AFFIDAVIT OF MICHAEL COCHRAN.

WASHINGTON, IND., Jan. 5, 1885.

I, Michael Cochran, do solemnly swear that my son, John D. Cochran, was born March 4, 1870, to the best of my knowledge and belief, so help me God.

MICHAEL COCHRAN.

Subscribed and sworn to before me, this 5th day of January, 1885.

EUGENE O'BRIEN,
Notary Public.

AFFIDAVIT OF ANTHONY KOCHER.

WASHINGTON, IND., Jan. 6, 1885.

I, Anthony Kocher, do solemnly swear that my son, Henry Kocher, was born September 11, 1870, to the best of my knowledge and belief, so help me God.

ANTHONY KOCHER.

Subscribed and sworn to before me this 6th day of January, A. D. 1885.

EUGENE O'BRIEN,
Notary Public.

AFFIDAVIT OF FRANK GIRARD.

WASHINGTON, IND., January 6, 1885.

TO WHOM IT MAY CONCERN :

I, Frank Girard, do solemnly swear that my son, Edmond J. Girard, was born July 29, 1869, to the best of my knowledge and belief, so help me God.

FRANK ^{His}(X) GIRARD.
mark.

Subscribed and sworn to before me, a Notary Public. Witness my hand and seal this 6th day of January, A. D. 1885.

EUGENE O'BRIEN,
Notary Public.

AFFIDAVIT OF ELLEN O'BRIEN.

STATE OF INDIANA, DAVIESS COUNTY :

This day personally appeared before me Ellen O'Brien, who being duly sworn, on her oath, says that she knows that Charles Dant was fourteen years old on the 8th or 10th of January, 1884.

ELLEN ^{Her}(X) O'BRIEN.
mark.

Subscribed and sworn to before me this 6th day of January, 1885.

B. T. MEREDITH,
Justice of the Peace. (SEAL.)

The following affidavits, taken and sworn to before a Justice of Peace, was ordered by the firm of Cabel, Wilson & Co. before a boy was allowed to enter the mines of this company:

STATE OF INDIANA, DAVIESS COUNTY, ss.:

This day personally appeared before me, B. T. Meredith, a Justice of the Peace in and for Washington Township, Daviess County, Indiana, George M. Trowbridge, who, being duly sworn, on his oath says that Joseph L. Trowbridge was born February 24, 1868, and George P. Trowbridge was born April 16, 1871.

GEORGE M. TROWBRIDGE.

Subscribed and sworn to before me this the 5th day of January, 1885.

B. T. MEREDITH, *J. P.* (SEAL.)

^{Her}
ELIZABETH (X) CARR.
mark.

Subscribed and sworn to before me this the 6th day of January, 1885.

AFFIDAVIT OF WILLIAM ROBINSON.

STATE OF INDIANA, DAVIESS COUNTY, CITY OF WASHINGTON:

To whom it may concern: I, William Robinson, do solemnly swear that my son, Charles Robinson, was born November 20, 1870, to the best of my knowledge and belief, so help me God.

^{His}
WILLIAM (X) ROBINSON.
mark.

Subscribed and sworn to before me this 8th day of January, 1885.

EUGENE O'BRIEN,
Notary Public.

AFFIDAVIT OF CATHERINE HALEY.

STATE OF INDIANA, DAVIESS COUNTY:

Catherine Haley, being duly sworn, on her oath says that Daniel Haley was fifteen years old December 10, 1884.

^{Her}
CATHERINE (X) HALEY.
mark.

Subscribed and sworn to before me this 7th day of January, 1885.

B. T. MEREDITH, *J. P.* (SEAL.)

AFFIDAVIT OF JANE WATSON.

STATE OF INDIANA, DAVIESS COUNTY:

This day personally appeared before me Jane Watson, who being duly sworn on her oath says: That Frank Watson, her son, will be fifteen years of age January 7, 1885.

JANE WATSON.

Subscribed and sworn to before me this 6th day of January, 1885.

B. T. MEREDITH, *J. P.* (SEAL.)

AFFIDAVIT OF MAHALA ABBOTT.

STATE OF INDIANA, DAVIESS COUNTY:

This day personally appeared before me Mahala Abbott, who being duly sworn on her oath says: That Alexander Abbott was fourteen years of age August 17, 1884.

MAHALA ABBOTT.

Subscribed and sworn to before me this 6th day of January, 1885.

B. T. MEREDITH, *J. P.* (SEAL.)

AFFIDAVIT OF ELIZABETH CARR.

STATE OF INDIANA, COUNTY OF DAVIESS:

This day personally appeared before me Elizabeth Carr, who being duly sworn on her oath says that Mayfield Carr is fifteen years of age January 10, 1885.

AFFIDAVIT OF ISAAC WHEELER.

To whom it may concern:

STATE OF INDIANA, DAVIESS COUNTY, CITY OF WASHINGTON:

I, Isaac Wheeler, do solemnly swear that my cousin, Charles Mason Boyles, was born February 10, A. D. 1869, to the best of my knowledge and belief, so help me God.

ISAAC ^{his}(X) WHEELER.
mark.

Subscribed and sworn to before me this the 6th day of January, 1885. Witness my hand and notarial seal.

EUGENE O'BRIEN,
Notary Public.

AFFIDAVIT OF CONRAD DAZIER.

STATE OF INDIANA, DAVIESS COUNTY:

This day personally appeared before me Conrad Dazier, who being duly sworn on his oath says that Clinton Dazier was born January 3, 1871.

CONRAD DAZIER

Subscribed and sworn to before me this 5th day of January, 1885.

B. T. MEREDITH, *J. P.* (SEAL.)

AFFIDAVIT OF JOHN KELLER.

WASHINGTON, INDIANA, January 6, 1885.

To WHOM IT MAY CONCERN:

I, John Keller, do solemnly swear that my son, Peter Keller, was born the 29th day of June, A. D. 1870, to the best of my knowledge and belief. So help me God.

JOHN KELLER.

Subscribed and sworn to before me this 6th day of January, 1885. Witness my hand and notarial seal this 6th day of January, 1885.

EUGENE O'BRIEN,
Notary Public.

AFFIDAVIT OF WILLIAM CAIN.

WASHINGTON, INDIANA, January 6, 1885.

To WHOM IT MAY CONCERN:

I, William Cain, do solemnly swear that my son, James Cain, was born the 6th day of November, 1870, to the best of my knowledge and belief. So help me God.

WILLIAM CAIN.

Subscribed and sworn to before me this 6th day of January, 1885.

EUGENE O'BRIEN,
Notary Public.

NEW COAL FIELDS OF GREEN COUNTY.

The Indianapolis & Vincennes Railway Company, during the month of November, 1884, completed the switch to the coal mines of the Yeoman or Island Coal Company. The switch is about six miles in length. It leads off from the main line between Dixon's Station and Switz City. The Coal Company have sunk a shaft to an excellent seam of bituminous coal, five and one-half feet in thickness. They have erected powerful machinery to handle the coal. They have also laid off a town and built a number of houses for the accommodation of their employes. They are making extensive preparations to mine and handle a vast amount of coal during the year 1885. There is an excellent roof over the coal seam, and the mines are reasonably dry, as the shaft is sunk on a rise of the seam, it being only sixty feet from the surface. The seam dips or inclines downward as it extends southwest, attaining a greater depth from the surface, and consequently will get into the main body of the seam, which will drain a large territory, and they will have a great amount of water to handle.

NEW COAL FIELDS OF VERMILLION COUNTY.

The firm of F. A. Bowen & Co., have opened a drift and commenced operations in the largest body of unbroken coal territory two miles northwest of Clinton. This company have leased four hundred acres of this territory; a side track has been built from the C. & E. I. Railway a distance of two miles reaching the mines. They are making preparations for a capacity of 1,500 tons of coal per day. The coal seam has an average thickness of five and one-half feet and is far superior in quality to any ever before mined in the county. There is an excellent roof over the seam, mines are dry and can be worked economical, as they are drift openings, easy of access; no machinery necessary as the coal seam crops out in the Bluff about twenty-six feet from the water level in the ravine. This will afford abundant drainage for the mines, thus saving the great expense of handling the water by machinery, and again in affording height for screening coal.

NEW COAL SHAFTS SUNK DURING THE YEAR.

CLAY COUNTY.

Church Hill extended to third seam during the year 1884. Owners and operators, Church Hill Coal Company.

Old Clay Coal Drift reopened. Lessee and operator, Thomas Watson. New shaft (Abby Mine) sunk on the same territory.

Shaft sunk two miles west of Carbon, on the Indianapolis and St. Louis Railway. Lessee and operator, Benjamin Simpson.

AIR AND ESCAPEMENT SHAFTS SUNK DURING THE YEAR 1884.

CLAY COUNTY.

Air shaft, accessible to the No. 3 shaft of the Brazil Block Coal Company.

Air and escapement shaft accessible to the Nickel-Plate Shaft of the Jackson Coal and Mining Company.

Air shaft to the Morris shaft sunk by the Brazil Block Coal Company.

PIKE COUNTY.

Drift opened by the Whitman Coal Company on the Air Line Railway.

FOUNTAIN COUNTY.

Air and escapement shaft sunk by the Union Coal Company of Yeddo.

KNOX COUNTY.

Coal drift opened by Mr. Job Freeman in the town of Edwardsport.

PARKE COUNTY.

Shaft sunk by the Brazil Block Coal Company, and also a drift opened by the Brazil Block Coal Company.

VANDERBURGH COUNTY.

Shaft sunk by the Evansville Coal Association.

VERMILLION COUNTY.

New Coal drift opened by F. A. Bowen & Co., three miles north of Clinton.

NEW COAL SHAFTS SUNK DURING THE YEAR 1884 IN DAVIESS COUNTY.

Shaft Union No. 2, sunk by the Union Coal Company, three-fourths of a mile south of Cannelburg, Indiana.

Traveling Ways.

Escapement and traveling way sunk by the Buckeye Cannel Coal Company, accessible to their Buckeye shaft at Cannelburg, Ind.

FOUNTAIN COUNTY.

New drift, opened by Habberman & Perry on Coal creek.

Bunker Hill No. 2, reopened by William Patterson & Sons on the Coal creek branch of the Chicago & Eastern Illinois railway.

GREEN COUNTY.

New coal shaft sunk by the Island coal Company, two and one-half miles south of Linton, Indiana.

KNOX COUNTY.

Air shaft, accessible to the White River drift, operated by Michael Adkins & Co.

PIKE COUNTY.

Air and escape shaft, sunk by Rogers Brothers, accessible to the Sandy Hook drift.

ANNUAL REPORT

OF THE

STATE INSPECTOR OF MINERAL OILS

OF THE

STATE OF INDIANA.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING.

1884.

STATE OF INDIANA, }
EXECUTIVE DEPARTMENT. }

Received January 7, 1885, examined by the Governor, and filed with the Secretary of State, to be preserved in his office and printed as may be directed by the Commissioners of Public Printing.

FRANK H. BLACKLEDGE,
Private Secretary.

Filed in this office, January 10, 1885.

W. R. MYERS,
Secretary of State.

REPORT OF INSPECTOR.

To His Excellency,

ALBERT G. PORTER,

Governor of Indiana:

In compliance with Section four of the act for the inspection of petroleum, passed April 11, 1881, I hand you herewith my annual report.

There has been quite a marked increase in the consumption of oil in the last year, and I am glad to say that it has not caused the loss of life or property for nearly three years; at least I have heard of no fires originating from the use of oil that has been tested. There has been several cases where gasoline and other lighter fluids were used for heating purposes, that has caused some disasters. I believe the law to be a good one and trust it may be continued. The trade generally look upon it with much favor, as it has been the means of shutting out much of the dangerous oils, and at the same time giving us a much better oil for illuminating purposes.

After the law of 1881 came into force I had a thousand copies printed at my own expense, and distributed them. I know that the law is well understood throughout the State. I also had several thousand circulars printed, and through the courtesy of the jobbing trade in the State, had them distributed. The circular reads as follows:

SPECIAL NOTICE TO THE TRADE.

The act of the Legislature of Indiana, passed and approved April 11, 1881, for inspecting coal oil, etc., provides among other things as follows:

1. Section 8, that any person who shall sell or keep for sale to be consumed within the State, for illuminating or combus-

tive purposes, any oils whatever, except sperm or lard oil, not duly inspected, etc., shall be liable in damages for any injury that may result from the use of such oils, in any court in this State, etc.

2. Section 7 provides that any person or persons who shall sell, or in any way dispose of an empty barrel, or cask, or package, which has been branded by an inspector, before the same is thoroughly cancelled or effaced, shall be guilty of a misdemeanor, and upon conviction be fined for each offense fifty (50) dollars, and may be imprisoned.

3. Section 6 provides that any person who shall knowingly use for lighting or illuminating purposes, any oil of any kind, except sperm or lard oil, before the same has been duly inspected, shall be deemed guilty of a misdemeanor, and upon conviction shall be fined not less than ten dollars.

4. Section 5 declares that any person or persons, or agent for any person, who sells or attempts to sell to any person in this State any such oils before they are inspected, etc., shall be liable to a fine of not less than fifty or more than three hundred dollars, and may be imprisoned.

I have heard of no attempt at an evasion of the law. By placing a Deputy at the larger distributing points, and in fact wherever I found it necessary, I believe all oil has been carefully inspected, and so far as I know have given satisfaction.

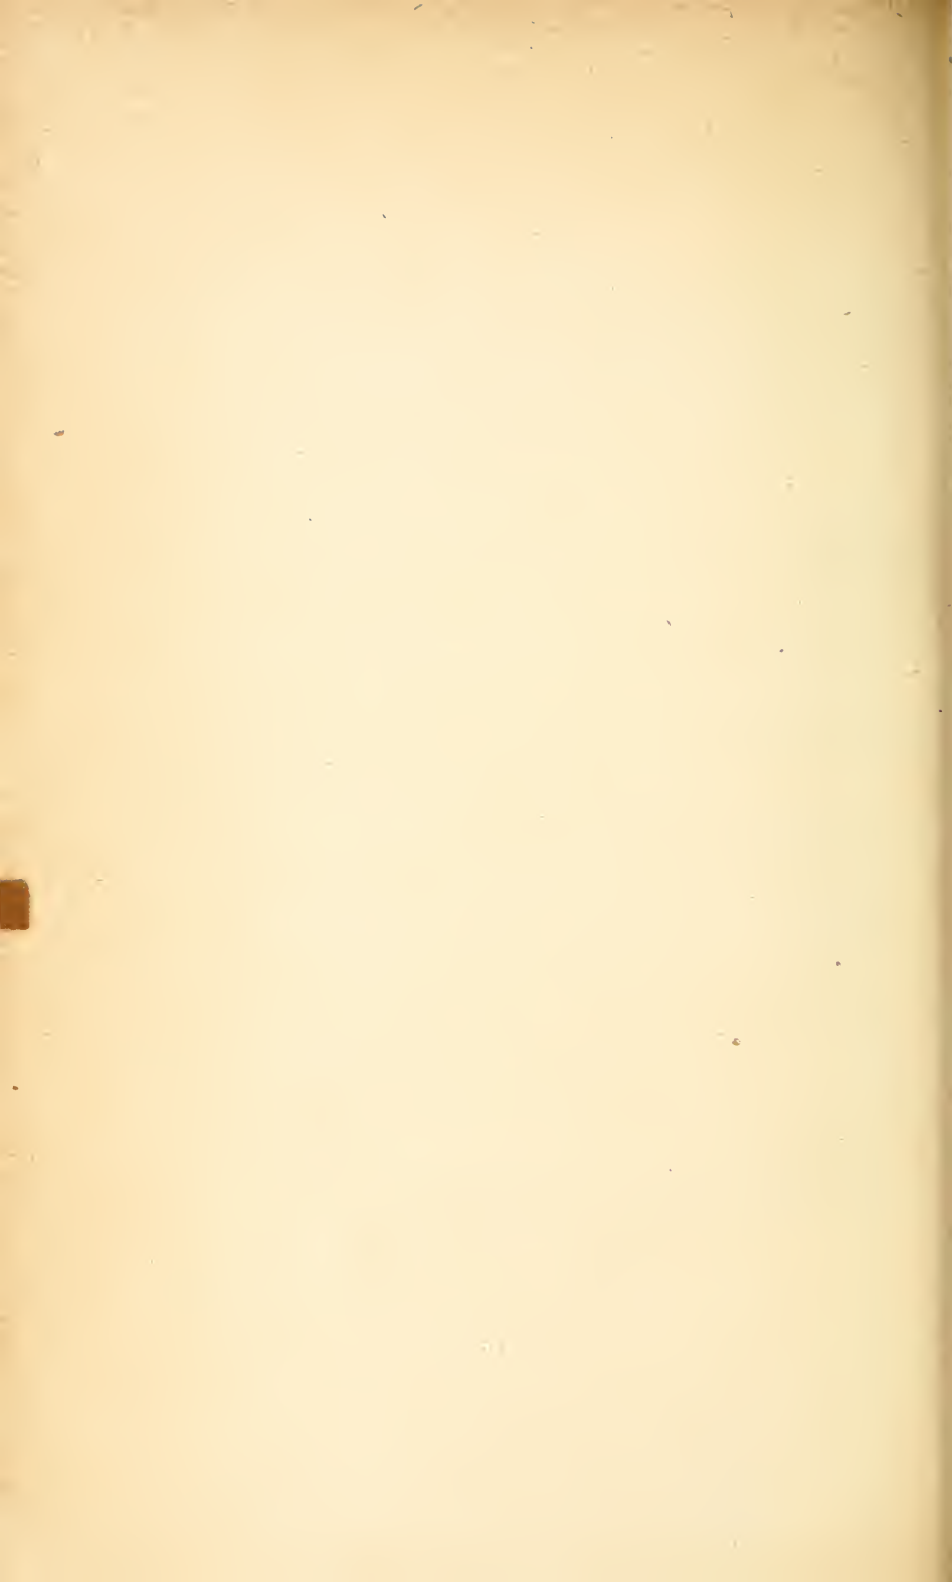

The Following Table Shows the Amount of Oil Inspected for the Year Ending December, 31, 1884.

	BARRELS INSPECTED.		Fees.
	Approved.	Rejected.	
State Inspector.	37,765	490	\$3,270 40
Wm. L. Hallock	6,770		529 71
B. M. Willoughby	2,500	60	302 62
S. E. Swayne.	6,385		638 50
Col. J. F. McQuiddy.	7,187		551 07
Thomas Bishop.	716	2	114 60
Robert B. Roe	5,931		439 93
Michael Fornoff	6,232		749 90
J. W. H. McGuire.	3,555		353 05
Louis Smithnight	17,080		1,724 84
S. F. Swayne.	10,834		620 02
Reuben Fancher.	360	2	116 80
Henry Weithoff	9,460		956 27

Walter L. Davis	1,634		199 40
Total	126,114	554	\$11,779 05
Office rent.	\$120		
Instruments, traveling, and other expenses.	\$495		\$615 00

All of which is respectfully submitted

E. H. SWAYNE,

State Inspector.

THIRTEENTH ANNUAL REPORT

OF THE

MANAGERS

OF THE

Indiana Reformatory Institution

FOR

WOMEN AND GIRLS.

For the Year Ending October 31, 1884.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1884.

EXECUTIVE DEPARTMENT,
INDIANAPOLIS, 1884. }

Received December 1, 1884, examined by the Governor, referred to the Auditor of State for verification of the financial statement, and filed with the Secretary to be preserved in his office, and published pursuant to the order of the Commissioners of Public Printing.

FRANK H. BLACKLEDGE.
Private Secretary.

Filed in my office December 2, 1884.

W. R. MYERS,
Secretary of State.

OFFICERS.

BOARD OF MANAGERS

ELIZA C. HENDRICKS, President, Indianapolis.

MARY E. BURSON, Muncie.

CLAIRE A. WALKER, Indianapolis.

SECRETARY.

MISS ANNA DUNLOP.

OFFICERS AND EMPLOYES.

SUPERINTENDENT.

ELMINA L. JOHNSON.

ASSISTANT SUPERINTENDENT.

MARTHA M. PRAY.

STEWARD AND CLERK.

EMMA A. WINSOR.

E. J. TARLETON, Matron, Penal Department.

RACHAEL McGRAIL, Matron, Reformatory Department.

MARY B. ZIMMERMAN, Housekeeper.

MARGARETTA S. SCOTT, School Teacher.

M. CURRIE, Sewing Teacher.

ELLA DEVEE, Laundry Teacher.

LAURA SHERIDAN, Caning Teacher.

SUE J. PRAY, Governess.

PHYSICIAN.

ALLISON MAXWELL, M. D.

ROBERT GRAY, Engineer.

THOMAS BARNETT, Watchman.

ROBERT PETRIE, Laundry Collector and Day Watch.

MANAGERS' REPORT.

INDIANAPOLIS, November 1, 1884.

To His Excellency, Albert G. Porter, Governor of State:

The Board of Managers of the Indiana Reformatory Institution for Women and Girls submit to your Excellency their Annual Report for the fiscal year ending October 31, 1884.

For detailed and specific information, they refer to the appended reports of the Superintendent, Steward and Clerk, and Physician, which are submitted herewith as a part of this report.

CONSTITUTION OF THE BOARD.

At the making of the last report the Board of Managers was composed of Eliza C. Hendricks, Mary E. Burson and Clara A. Walker, with Miss Dunlop as its Secretary.

No changes have occurred. Mrs. Hendricks has continued to act as President.

The stated meetings of the Board have been held at the Institution on the first Tuesday of each month, in which the business requiring attention has been carefully transacted.

Special meetings have been held when necessary.

OFFICERS AND EMPLOYES.

The severance of Mrs. Smith's connection, as Superintendent, came even earlier than we had expected when making our last report.

Continued ill health of herself and Mr. Smith precipitated the presentation of their resignations, and December 1st last these were received by the Board, and accepted, to take immediate effect, with the greatest regret and reluctance.

Their connection dated from the opening of the Institution, June 10, 1873.

After consultation with your Excellency, and with your approval, the Board appointed Mrs. Elmina L. Johnson to be Superintendent at the salary as previously fixed.

Before entering upon the discharge of her duties she gave a bond to the State of Indiana in the sum of ten thousand dollars, with ample security, approved by the Board, conditioned for the faithful performance of her duties as such Superintendent, and that she would faithfully account for all moneys, property and effects entrusted to her as such.

She also took and subscribed an affirmation to discharge the duties of her office with fidelity.

The bond and affirmation were filed in the office of the Secretary of State, and she assumed the responsibilities of the office December 9, 1883.

This appointment having vacated the office of Assistant Superintendent, Miss Martha M. Pray was appointed to fill the office at the salary as fixed.

Other subordinate officers were appointed as follows:

Mrs. Emma A. Winsor as Steward and Clerk, at a salary of \$400 per annum.

Miss Margaretta S. Scott as school teacher, at a salary of \$420 per annum.

Several vacancies have occurred during the year, and were filled by the appointment of Mrs. E. L. Tarleton as Matron of the Prison, at a salary of \$420 per annum; Mrs. M. Currie as sewing teacher, at a salary of \$300 per annum; Miss Laura Sheridan as caning teacher, at a salary of \$240 per annum.

The highest number of officers and employes resident, connected with the immediate supervision of the Institution, has been eleven, and of non-resident employes three.

The duties of the officers under the most favorable conditions are constant and trying, and can only be faithfully performed by those who have a true interest in the work.

Every thoughtful person will readily concede that prisons for women should be separate from those of men, and wholly in charge of female officers.

Nowhere else in the United States is this the case, we believe, but the beneficent results are apparent to the most casual observer who passes through our penal and reformatory departments.

PENAL DEPARTMENT.

There are now, October 31, 1884, in this Department fifty convicts.

During the year thirty-seven have been received, one returned who escaped in 1881, and twenty-eight have been discharged upon expiration of sentence. Two have escaped and not been taken. One has been pardoned.

We regret to note an increased number of re-commitments, six having been returned during the year—four upon a second, one upon a third, and one upon a fourth conviction.

Short sentences are responsible for these in all the above cases, as all were originally sent to us for but one year's imprisonment.

Through a mistaken sense of mercy, judges take off from the period of sentence whenever possible, whereas, it would be for the good of the sentenced, as well as of society, if they received the longest possible sentence, and could be held until at least the appetite for strong drink, opiates and other excesses had been successfully controlled.

They have the stigma cast upon them by the commitment, but not sufficient time given them for reformation.

The average number of inmates is greater than that of any previous year. The number received during the year was also more than double that of last year, and largely in excess of previous years. This Department has, therefore, been very crowded, as will be noted by the Superintendent's report.

The number of those who are fit subjects to be received into this Department seems to be increasing, and will, doubtless, continue so to do as our State increases in population and cities multiply.

— Convicts have been credited, since the passage of Senate Bill No. 136, by our last Legislature, with "good time," gained or lost as provided by its schedule, and have been discharged according to its provisions.

REFORMATORY DEPARTMENT.

There are now, October 31, 1884, in this Department one hundred and forty-two girls.

During the year forty-eight have been received on new commitments and six returned from ticket-of-leave; twenty have

been discharged; thirty-five have been released on ticket-of-leave; none have died. A number of escapes have occurred, but all have been retaken.

In the two departments the average number of inmates during the year has been one hundred and eighty-six.

The Superintendent's report shows sixty-three out on ticket-of-leave. Located as these are in various parts of the State, they have the advantages of home life in families, yet are not removed from our guardianship.

This system, early adopted by the Board, we consider one of the largest factors in working out reformation.

Some have been returned to us, partly on account of their own imperfections and partly from lack of proper supervision and control.

The girls come from wretched homes, many of them with vile habits, ill health, ignorant, dirty and untrained.

Cleanliness, wholesome food, regular habits, exercise and discipline soon change them into cleanly, healthy and useful girls, as will be shown by the labor statistics in the Superintendent's report.

Our system of classification is necessarily imperfect from the peculiar construction of our building and the large number in very limited quarters.

We are daily made to see the disadvantages of the congregate system in this Department.

The very large increase in the number of prisoners received during the year seems to point to a near future when increased facilities and enlarged quarters will be required for the Penal Department.

We trust it will then seem wise and expedient to the legislative authorities to provide separate accommodations for the reform school on the cottage plan, giving up the present building to the prison.

What to do with the the idiotic and epileptic is one of the most distressing problems before the Board. No reformation is possible for them. The Feeble-Minded Institution does not receive them; the Insane Asylum harbors them but for a short time, and then they go out to fall the easy prey of depraved characters. Yet it is manifestly improper that they should be kept in the midst of the other children.

SCHOOLS.

The schools, as prescribed in section 38 of the act governing the Institution (R. S. 6198), are kept up throughout the year in the Reformatory, and during the winter, in the evenings, in the Penal Department.

HEALTH.

During the year the health of the inmates has been fair. No deaths have occurred.

Our facilities for caring for the sick are very limited. The rooms in the Reformatory used for hospital purposes being small, illy adapted and not shut off from the rest of the house, and any contagion might become an epidemic in our midst. We have no room in the Penal Department which we can set aside solely for hospital uses.

An external, separate building, for hospital purposes, such as was suggested by Dr. Parvin, in his report two years ago, is one of the needs of the Institution.

INDUSTRIES.

We have received during the year, from work of inmates, \$3,437.56, and expended for material, \$2,412.83. Net earnings up to October, \$824.98, have been paid into State Treasury, together with board of United States prisoner, \$94.80.

We can never hope to materially lessen the heavy expense which this Institution must always be upon the State by the earnings of inmates.

In the Reformatory, where the average age when received is thirteen years, the girls are divided into two sections. One class is in the school room in the forenoon of each day; the other is at work in the laundry, caning-room, kitchen or elsewhere, as occasion requires. In the afternoon this latter class goes into the school-room and their places are taken by those who were in school in the forenoon.

In the prison the women, many of them old, worn out, or entirely untrained, are kept more closely at allotted tasks, though these are lightened and changed whenever health and training seem to require.

We would call attention to the fact that no money is expended in wages for servants. All the work is performed by the inmates.

ESTIMATE OF EXPENSE REFORMATORY INMATE.

As required by section 31 of the act of May 13, 1869 (R. S. 6192), the Board has estimated and determined the "actual expense per annum of clothing and subsisting an infant committed to the Reformatory Department of the Institution," and has fixed the amount thereof at \$136.

The collections made from counties by the Treasurer of State, on account of this Institution during the past year, amounted to \$8,906.72.

SEWER.

It is with gratification that we report the settlement of this vexed question of sewerage. By the completion of the State sewer, constructed under the supervision and control of your Excellency, the management has been relieved of a troublesome and annoying problem which has harassed it since the organization of the present Board, in 1877. The sewer, as contracted for, ended inside the grounds at the east end of our west laundry building. After consultation it was decided to continue the main sewer 123 feet east, to east line of main building, so that all soil pipes would be carried to it in straight lines due north from starting points. Also, to put in new soil pipes from laundry buildings and bath-rooms. All of which was done by Messrs. Whitsit & Adams, sewer contractors, at an expense of \$661.

REPAIRS AND IMPROVEMENTS.

There has been expended for repairs and improvements during the year \$3,871.71, about the amount expended during the previous years.

In addition to the sewer extension reported above a number of changes were required in the several bath and water-closet rooms, which had been delayed until such time as the sewer should be completed. All of these are described in the superintendent's report.

Very general carpentry repairs were found necessary, one very large item being the relaying of all floors in both laundries and necessary plumbing-work changes in them.

We have no especial repairs in view for the coming year. The wood work, outside and in, will probably need repainting, and, with the minor repairs sure to arise, we may expect that the expenditure will about equal that of the two years just past.

FURNISHINGS.

No very material additions having been made to interior furnishings since the original estimates of 1873, we found it necessary to refit in many places, notably the parlor and dining room of officers' building, dining rooms and kitchens of family, and dormitories.

Also to supply the chapel with chairs and organ.

EXPENDITURES.

At the close of the last fiscal year, our appropriation for the year 1883-84 having been exhausted, and no special appropriation having been fixed for the current year by the Legislature, after consultation with your Excellency and the other members of the Board of Audit we returned to the permanent appropriation as authorized by the 3d section of the supplemental act of February, 1873. (R. S. 6200.)

As required, an itemized statement in writing of the amount required to meet the current expenses of the Institution during the month, setting forth the number of inmates in each Department, and also the number of officers and employes on the first day of the month, was prepared by the Secretary and verified by affirmation of the Superintendent.

These several estimates were presented to the Auditor of State, and by him submitted to the Board of Audit, consisting of your Excellency, the Secretary of State and the Treasurer of State, and were by it approved and allowed, the Auditor of State, being directed in writing so to do, drawing his warrant in favor of the Superintendent for the amount thereof, and the Treasurer paying the same to the Superintendent.

The expenditures, including all salaries, repairs and improvements, have been \$27,068.09.

Total amount drawn from State Treasury	\$27,068 09
Deduct amount expended in repairs.....	3,871 78
Leaves the cost of support, salaries, etc	\$23,196 31
Deduct from this the amount paid into the State Treasury, net earnings and board.....	\$919 78

And the amount paid into the State Treasury by the counties for clothing and subsistence of girls committed to the Reformatory Department..... \$8,906 72

Total..... \$9,826 50

And we have the total expense of the Institution to the State for clothing, support and care of 186, average number of inmates for the year... 13,369 81
Or \$72.95 each per annum.

The cost of the Institution for provisions, salaries, clothing, fuel, light, general expenses, medical attendance and discharge gratuities has been for each inmate for the year \$124.71, being per week \$2.39, and per day 34.1 cents.

We have been anxious to keep the financial standing of the Institution above reproach, and have succeeded fairly.

But our first aim and desire has been and is to make this a reformatory institution in fact as well as in name.

The Superintendent's report shows that industry, education and religion are working out the great problem of reform for which this Institution was established.

We are painfully aware that there are persons discharged from the Institution who doubtless would continue in well doing but for the fact that they have no means of support. Few of those discharged have any place worth the name of a home to return to. Could suitable homes always be secured, a very much larger percentage would be saved, but this is no easy task to accomplish.

Just closing, as we are, the twelfth year of operations, those who have watched the progress of the work can look back with a renewed and gratifying assurance of its usefulness.

By a careful computation we feel justified in placing the figures of those who have become useful and orderly members of society at 80 per cent. in the Reformatory and 76 per cent. in the Prison.

The value of the work, however, can not be represented by figures. The investment can not be treated by the ordinary rules of profit and loss, but we may confidently state that the work is needful for the welfare of society, and after careful observation, that it has been reasonably successful in improving the moral and material interests of the State.

The managers feel indebted to your Excellency for the interest you have manifested, and the support you have given us.

We trust that by means of this and our former reports, and the suggestions which your Excellency may be pleased to lay before the Legislature, the Institution will be given that prominent place in the minds of the people of the State which its mission demands.

Respectfully submitted,

ELIZA C. HENDRICKS,

MARY E. BURSON,

CLAIRE A. WALKER,

Board of Managers.

RECOMMENDATIONS.

For general expenses 1884-85, 1885-86 (current ex-	
penses and repairs each year).....	\$30,000 00
For hospital cottage.....	3,000 00

SUPERINTENDENT'S REPORT.

•

INDIANA REFORMATORY INSTITUTION,
INDIANAPOLIS, November 1, 1884. }

To the Board of Managers:

LADIES—In presenting the thirteenth annual report of this Institution, and my first as its Superintendent, I desire to acknowledge my appreciation of your constant kindness, support and direction.

It has been my earnest desire that the Institution under my charge should be so conducted as to reflect credit upon its management; that its discipline should be upon correct and elevating principles, and its industries so conducted as to secure the best results, not only financially, which we can but consider of minor importance, but in the education of every one connected with it in such manner as to insure their success, capability and respectability after leaving our care.

RELIGIOUS SERVICES

Have been conducted as formerly; Sunday school in the morning, taught by the various officers, using the International Lesson Leaves; in the afternoon both women and girls going to the chapel, where service is carried on by different persons interested in home missionary work. The burden and pleasure of this has principally fallen upon Brothers Wilson Marrow and John W. Ray.

The good they have accomplished in our midst entitles them not only to the gratitude of those connected with the Institution, but of all persons interested in the elevation and redemption of fallen humanity.

WORK OF REFORMATION.

If all our hopes have not been realized in our reformatory work, enough has been done to encourage us. Experience of many years has shown us how great are the difficulties to be overcome by those most earnestly wishing to reform.

REFORMATORY DEPARTMENT.

Under direction of Miss Pray, Assistant Superintendent, the progress in every respect has been marked.

The schools are ably cared for by Miss Scott, whom you appointed a year ago, and who, by conscientious devotion to her work, has made her influence for good felt among the girls.

The younger girls, under the fostering care of Miss Sue Pray, give evidence of her care and interest.

Of one hundred and forty-two girls in the Reformatory one hundred and thirty-seven are in school, four do not attend on account of imbecility, and one is detailed for nursing, the average attendance being one hundred and five. The course of study is shown in table No. 15.

The sewing department is under the charge of Mrs. Currie, who is a practical dressmaker. Here we notice great improvement in the girls dresses and in the interest they manifest to become neat sewers.

When it was proposed to send a specimen of their handiwork to the New Orleans Exposition, many were anxious for the distinction; and willing, if not nimble fingers stiched, stiched stiched. Eager eyes watched the garments grow, and young hearts beat quick with prospect of success. The result was not a garment to compare with our French imported clothing, but one which did credit, all things considered, to the one who made it.

The number of articles made by girls in this department as shown in Table No. 17, is proof of the application and perseverance on the part of the girls, and the watchful care of those in charge.

The laundry, under Miss DeVees efficient management, has yielded a satisfactory return financially, and in most cases given satisfaction to our patrons by the quality of work done. The force here varies in number, the average being fourteen girls, one set in attendance in the morning, another in the afternoon.

The caning department has been under Miss Sheridan, a practical caner, and they are doing good work.

Here the small children are occupied during the half day out of school, and are taught to do that which may be a means of livelihood in after years.

After paying all expenses, we have turned net profits of this industry into the State Treasury, \$136 76.

One of the girls, twelve years old, has caned a small chair for the Exposition Exhibit, and it is beautifully done.

The general housework is under the direction of our capable house keeper, Mrs. Zimmerman, and matron, Mrs. McGrail. Thirty-nine of our girls are employed each half day in learning to cook, bake, sweep, scrub, make beds, and, in fact, everything relating to general housework, two having charge of the milk room.

They take great pride in this work and it is always a pleasure when showing visitors through the house to hear their constant exclamation of "How do you keep things so clean?"

The hospital is under the direct supervision of Miss Pray, who details one or more of the trusty girls to take charge of the sick. These positions are regarded as posts of honor, and are invariably well and faithfully filled.

During the latter part of last winter a peculiar disease made its appearance which created much alarm because of its similarity to small-pox in appearance. After a few hours of anxiety and suspense, we were much relieved to have it identified as febrile-lichen.

Since that time there has been little sickness. Dr. Maxwell has been eminently successful in his treatment of diseases in our Institution, not a death, we are thankful to state, having occurred during the past year.

ESCAPES.

It is remarkable that with an average of 136 girls, all of whom are given great freedom of out-door exercise, only three have attempted to escape.

Two of these were aged respectively 13 and 14 years. They got as far on their pilgrimage as Oakland, a little village ten miles away, when becoming tired and discouraged, they confessed where they belonged and were brought back, much to

their and our satisfaction. A colored girl, with whom to run away has become a mania, was gone three days when returned without cost.

Forty-eight girls have been received during the year, a larger number than we have received in any one year, except 1882.

The close of the year finds us with one hundred and forty-two enrolled, from seven to those who will soon be eighteen years of age. Most of them are contented and doing well.

We endeavor to keep a watchful eye over our discharged and "ticket-of-leave" girls.

Since the opening of the Institution, we have received 574 inmates of all ages, under eighteen, of all sizes, colors and classes. Of this number we know that 328 are doing well, and that 82 of that number are married; 70 are known to be not doing well; 20 are dead, and of 14 we can learn nothing, showing that 80 per cent. are leading orderly lives.

As an evidence of how the girls regard the Institution after leaving, it may interest you to hear a few quotations from their letters.

One writes: "You don't know how your letter has helped me. It has saved my character, and I am proud that I have the name of being a reform school girl."

Another: "I am trying to be a good girl, and do what is right. I intend to always be a comfort to my mother. I am truly thankful for ever having been there, and will obey your teachings."

The husband of one of our girls writes: "I am well pleased with my choice, and believe she will make a good and faithful wife. Allow me to express to you my thanks for your labor with the girl while there."

I could give many extracts from letters received from those who have gone from our care, but time and space forbid.

REPAIRS AND IMPROVEMENTS.

One of the most important and satisfactory of the many pieces of carpenter work and repairs in the Department, was the walling up of the windows in the hall-way leading to bathroom, which faced the prison court-yard, affording ample opportunity for interchange of words and notes between prisoners and girls, one of our most troublesome annoyances. A sky-

lign took the place of windows in the room itself, and windows were cut in the opposite wall of passage, opening into Reformatory court-yard. The entire plumbing was taken out, a new floor laid, and new pipes, closets and baths, with direct waste to sewer, put in.

A fitting room was partitioned out of sewing-room and storage-room in caning-room.

A much needed repair was made in taking up the floor and sleepers decayed in ironing room and replacing them with new.

A new floor was laid in kitchen, sink and cupboard put in, and several rooms were papered.

Many other small but substantial improvements in the way of doors, locks, etc., have been made, too tedious to enumerate.

THE PRISON AND ITS DISCIPLINE.

Prison discipline has been maintained without any undue recourse to punishment.

It is not to be expected that women who come to us only because the iron hand of the law compels them, will at all times be quiet and tractable and obey the rules of the Institution.

In cases where punishment has been necessary, if the offence would allow, they have been simply locked in their own cells. In cases requiring severer discipline the basement cells have been used.

It has been found in all cases that solitary confinement and self communion are a sure antidote for rebellion, some being brought to submission in a single day, the most stubborn cases holding out sometimes one or two weeks, but surely yielding at last, and in many cases these become our most obedient women.

Corporal punishment is rarely resorted to; it seems better to inspire these women with respect for themselves; blows would reduce them to outward quiet, but leave the heart filled with bitterness and revenge, for even a criminal feels that a lash puts them on a level with the brute, and the cry of "struck like a dog" springs readily to human lips.

A prison is not only a place of confinement, where a bad and dangerous class must be kept, but a school for the education of character. Our aim is that they may go out from us better, truer women.

We know what temptations and surroundings these women

have had, and that great patience, great love and constant prayer for direction in our intercourse with them are required to secure any hold upon them. I say from my heart, "God pity the criminal class."

Mrs. Tarleton, appointed a year ago, has been very successful in her management of this Department.

SEWING ROOM.

We have a total of ten sewing machines in use on overall and shirt work for Messrs. C. B. Cones' Son & Co. See Table No. 16 for amount of work done during the year.

If there is any truth in the Spanish proverb that "The devil tempts the wicked men, but idle men tempt the devil," we must concede that our sewing women have no spare time for tempting the devil. This department has given us much satisfaction during the year. Besides giving eighteen of our women employment it has been a source of revenue, \$517.06 having been paid into the State Treasury from this industry.

A sample of overalls and shirts will be on exhibition at the Exposition.

LAUNDRY.

This is not a favorite branch of industry, and we have more sudden illnesses to encounter here than in any other department, but from the number of pieces handled it will be seen that the (average) eight women have applied themselves faithfully to their work.

KNOWLEDGE OF DISCHARGED PRISONERS.

It is a pleasure to us that many of the women, after leaving, keep us informed from time to time of their movements.

We are able to state that, of the 285 received since the opening of the Institution, 127 we know are doing well, 75 are not doing well, 33 are unknown, and 50 are with us.

We are not disposed to find fault at the large number who are doing badly, but feel thankful that so many are leading useful and virtuous lives.

A few weeks since I received a letter from the daughter of one who had received a three years sentence, and who was pardoned by the Governor one month prior to the expiration of

her sentence on account of failing health. She says, speaking of her mother, "She has that patience that makes a Christian stand all without a murmur. O God! If I could take hold of God's promises like her, what would I not give. It seems you taught her to take hold of religion in some way I don't understand."

A letter of this kind is the "cup of cold water" that keeps us from despairing on the way.

LONGER SENTENCES.

Short sentences are comparatively useless; reformation requires time. Of the eighteen returned since the opening, four of these belong to the same woman. In each case she has had one year's sentence, until a few days ago when she came to us for eighteen months' imprisonment. As her conduct while here is exemplary she will gain six weeks "good time," and will only serve sixteen and a half months for her fifth conviction.

Liquor is the cause of her downfall, as it is that of many who find their way here.

ESCAPES.

It would seem strange in a family of this kind if all were perfectly resigned and happy. In spite of the utmost vigilance on the part of all, four have escaped during the year. Two have been returned of these, and one who had been away three years.

It has cost us \$100 for rewards and expenses incurred for the return of these women, but it has been of great benefit to us in showing those here how useless it is for them to attempt to evade the law

BIRTHS

If a "baby in the house is a well-spring of pleasure," how doubly true it is of a prison.

Two have been born in the prison this year, and never in tender homes of wealth and refinement have children met a warmer welcome and had more love and attention than our little ones receive in their red flannel skirts and calico slips.

It is a pathetic sight to see black and white asking for a turn just to hold baby, mothers who have been separated from

their children for years rocking and fondling them while the tears roll down their cheeks. Our mother hearts melt with pity, and we can only say, "God help them."

EVENINGS.

All come together in the sewing room, where we have reading by either Mrs. Tarleton, Mrs. Winsor, or myself. The women knit, crochet, or do any light work they desire, or if they prefer to do nothing they have the privilege, as the evenings are regarded as a well-earned time of rest.

After reading we have singing and prayer. Sometimes we vary the reading with games, which the younger women enter into with hearty good will, and the older enjoy in seeing others happy, and living over again their own young days.

REPAIRS IN PENAL DEPARTMENT.

The change of the bath and water-closet room from the basement in the center of the building to the detached room adjacent to the wash-room, originally built for a clothes-reception room, has proven most satisfactory.

A storage closet for clothes has been made under the stairs leading from the ironing-room to the wash-room.

New drain-pipes were put in from the bath, and also from the laundry waste; also, the entire plumbing and connections have been thoroughly overhauled and replaced by new where worn out, so that we for the first time feel that our arrangements in this line are in good and perfect order.

New floors and ventilators underneath were put in the wash-house; floors were repaired in kitchen and dining-room; a partition and door were placed at the head of the stairway leading from first to second story; an iron door was put in the hallway leading to water-closet, and innumerable little things have been done which have added much to our convenience and comfort.

SUGGESTED IMPROVEMENTS.

You are aware that in many instances two prisoners occupy one cell, as we have not room to give each one, besides the two large dormitories, which contain from sixteen to eighteen beds.

When any of the women in these dormitories are ill, you can readily see how hard it is, not only on the sick, but the well, also, occupying the same room.

It would add greatly to our well-being if we could have a hospital, or room set apart therefor.

REPAIRS IN FRONT BUILDING.

Here many improving repairs and changes have been made. The dining-room has been enlarged by removing the partition between it and the bath-room; it has been frescoed and wainscoted, and a new ash and walnut floor laid. An entirely new bath-room for officers has been built, opening under the front stairway, wainscoted and well finished.

The entire roof, gutters, slate and cornices have been thoroughly repaired by Messrs. McOuat & Walker and Shover & Christian.

FURNISHINGS.

The parlor has been newly furnished throughout, and now presents a most homelike appearance. In the office a new carpet, shades, a chair and chandeliers have been a much-needed improvement. A larger table, sideboard and shades have added greatly to our comfort in the dining-room. The hall has a much-needed hat-rack, chairs and hanging lamp. Radiators have been put into the parlor, hall, office and dining-room. Some new furnishing has been done in the officers' rooms. Over one hundred wooden chairs have been purchased for chapel and children's dining-room. The old organ, which rasped our nerves for so many years, has given place to a new one.

The forming of a new dormitory made necessary the purchase of eighteen single beds.

The furniture from the front has been of great utility in making the back offices more comfortable.

In making purchases I have been assisted by Mrs. Winsor.

All goods, of whatever description, are received by the Steward, and by her made over to the Assistant Superintendent, from whom she takes a receipt.

The Assistant Superintendent issues to the different officers of the various departments as they call upon her for supplies, keeping a book by which can be readily seen just what she has received, given out, and has on hand.

LIVE STOCK—HORSES.

Our tried and trusty "Frank" and "William" have been sold, on account of old age. "Prince" and "Jasper" take their places, and give promise of being what we need.

One of our best cows died during the early part of the year, leaving but two to furnish milk for our large family. One of these we sold in exchange for a fresher and younger one. Two others have been bought, making four now, giving milk. All the children are given milk twice a day, and the sick on both prison and reform sides, have all they require.

We have thirteen pigs, six old and seven young ones. Forty hens and two dogs complete the list of live stock on hand.

GARDEN.

Owing to the poor quality of the soil, I had the ground thoroughly manured and plowed before beginning our spring work.

Mrs. Kuntzler, a life prisoner, and six Reformatory girls, through persistent work and fine use of spade, hoe and rake, raised sufficient lettuce, radishes, peas, beans, tomatoes and cabbage for the entire family to have many enjoyable meals during the summer.

The corn, owing to the dry weather, was a failure.

The flower garden, although a disappointment in beautifying the grounds, gave a great deal of pleasure to the inmates.

Two automatic Baker gates were put in the two west entrances. These were highly recommended to us, but do not give entire satisfaction.

COAL.

A contract has been closed with Messrs G. R. Root & Bro., for delivery of coal during the year beginning November 1, 1885, said coal to be best quality Brazil Block, at \$2.45 per ton.

The funds which have come into my hands during the year, have been promptly paid out, as per bills and vouchers on file in Auditor's office, and no outstanding accounts remain unpaid.

Respectfully submitted

E. L. JOHNSON,

Superintendent.

PHYSICIAN'S REPORT.

INDIANAPOLIS, November 1, 1884.

To the Board of Managers of the Indiana Reformatory Institution:

LADIES—The sickness among the inmates of the Reformatory during the year drawing to a close, has been less than the previous year, and it is a matter of congratulation that there has not been a death in the Institution this fiscal year.

In the Penal Department there were twenty cases of dysentery, several of which were severe.

In the Reformatory Department there were forty-five cases of febrile lichen, not serious, but very troublesome.

Besides the above sickness there were many cases of ague, but less than previously.

There were three cases of confinement in the prison, and one girl in the Reformatory Department gave birth to twins.

Very respectfully,

ALLISON MAXWELL,

Physician.

STEWARD AND CLERK'S REPORT.

OFFICE OF THE
INDIANA REFORMATORY INSTITUTION FOR WOMEN AND GIRLS, }
INDIANAPOLIS, November 1, 1884.

To the Board of Managers:

LADIES—I herewith hand you a statement of all moneys received and disbursed by me, as Steward, during the fiscal year. Also, a full statement of the financial operations of the Institution, with statistical tables comprising everything pertaining to the general condition of the inmates up to the close of the fiscal year.

Respectfully submitted.

EMMA A. WINSOR,
Steward and Clerk.

STEWARD'S REPORT.

Showing the Amounts of all Moneys received and disbursed during the fiscal year.

MRS. AMELIA J. TAYLOR,

In Charge of Ironing Department.

NOTE.—The above list of employes does not include day laborers employed at times when needed, but only the regular corps of officers who are continuously in the service of the School.

COMMISSIONERS' REPORT.

To his Excellency, Albert G. Porter, Governor of Indiana:

In conformity to the requirements of the Statute, the Commissioners of the Indiana Reform School for Boys, beg leave to submit this their Eighteenth Annual Report for the year ending October 31, 1884.

In doing so they take pleasure in referring to the continued prosperity and growing usefulness of the Institution. And at no time have so many gratifying assurances been received of the thoroughness and efficiency of its work as during the past year. The boys have entered upon their new fields of labor after leaving the Institution in every way greatly improved and are giving promise of lives of usefulness.

This is extremely gratifying to the Board of Control, the worthy and efficient Superintendent, and his corps of faithful officers, and we sincerely hope that the efforts of all connected with the Institution in its behalf, may meet with your approval, and satisfy the reasonable demands of the public.

It will not be expected of the Board to give the details of the government and management of the Institution, but they refer your Excellency to the full detailed report of the Superintendent to the Board, which is submitted herewith and made a part hereof.

We feel thankful to a kind Providence for the continued good health of the inmates. There has been comparatively but little sickness, but two fatal cases from disease, and one by accident. The boys take plenty of exercise in the open air, bathe once every week in pure clear water, and are furnished plenty of good wholesome food, and the dormitories are kept scrupulously clean and well ventilated. For further and full particulars of the sanitary condition we refer you to the report of Dr. Amos Carter, the attending physician, which is filed herewith.

For several years (prior to the past) the crowded condition

of the Institution has been a source of anxiety. In order that all might properly be accommodated, who are committed to the guardianship of the Institution, the last Legislature generously and properly appropriated twenty thousand dollars to be used in the erection of family buildings. Ten thousand dollars were used last year in accordance with the provisions of the appropriation, and ten thousand this past year; with the ten thousand drawn last year two beautiful and commodious family buildings were erected, an account of which was given in our last report.

With the ten thousand drawn this year, two more family buildings, exactly like the two first erected, are now almost completed, and we hope soon to have them ready for occupancy. As the buildings now in process of construction are similar to those erected last year, and the work thereon is only a repetition, we quote from last year's report that part concerning the erection of two family buildings.

"They are each 52 feet in length by 30 feet in width, with an officer's room in front 28 feet in length by 16 feet in width, and a basement under the main room. The first story of the main building to be used by the boys for their family room, the second for their dormitory, and basement for a gymnasium; the first story of the front to be used by the officer of the family for a sitting room, and the second story for a bed room. The whole building heated by a furnace in the basement. They are built in the best and most improved style, the family rooms and dormitories are of good height and ventilation perfect. The work has all practically been done by the officers and boys, with the assistance of one brick mason and one carpenter. The bricks were made and burned by the officers and boys, except a foreman during the making and burning of one kiln and one man to superintend the burning of the second kiln. So at the close of the season we had boys who were experts on the brick yard, and a number who can go out and command good wages with the trowel, and some who are fair carpenters. Officers and boys worked faithfully, both in the construction of the buildings and on the brick yard, and the Board desires to commend them for their energy, industry and interest that they have taken in their respective trades. By utilizing the labor of the boys we think that the two buildings can be erected for the amount appropriated for that purpose,

while, if the work had been let to a contractor, would have cost the State \$14,000 to \$15,000. Not only have the boys been benefited by their experience in making brick, and by learning to be good brick masons and fair carpenters, but there has been a saving to the State of about one-third the actual value of the buildings, and then, doubtless, better buildings have been procured than would have been under the contract system."

The last Legislature also generously appropriated \$3,000 to put in gas, which work at the close of last year was in process of construction, as we stated in our last report. With this money and the labor of the boys, we have erected the proper building of the following dimensions:

1. Retort house twenty-five feet wide and twenty-eight feet long and twenty feet high, covered with a roof of corrugated iron.

2. Just east of the retort house and on the first story is the coal house, twenty-eight feet by sixteen feet; from this room there is a stairway ascending to the second story where there are two good rooms, one for the man in charge of the works and the other for the two boys who are to assist him; east of the coal room is the lime room, so constructed as to preserve the lime from slacking; adjacent to the retort house and on the opposite side is first the condensing room, adjoining this is the purifying room, sixteen feet long and fourteen and a half feet wide, under this room is the cellar eight feet deep, and adjoining the purifying room, and twenty feet distant is the gasholder thirty-four and a half feet in diameter, and twelve feet deep. The wall of the holder was built of brick and cement and is not less than three feet thick. The iron work, holder and roof, were all made by Kerr, Murray & Co., of Fort Wayne, Indiana, they being the lowest bidders, their bid being \$4,025.

We have purchased \$919.79 worth of large gas pipe. All the work, making and burning the brick and erection of the buildings, was done by the officers and boys. Everything connected with the work will be sufficient to meet the future needs of the Institution. To complete the works so they can be used will require an appropriation of \$2,000. We respectfully ask the legislature to make the above appropriation to complete the much needed work already begun.

There have been admitted to the guardianship of the Institution since the opening, two thousand and fifty-seven boys.

There were received during the year one hundred and eighty-two boys.

The general average for the year was three hundred and ninety-five. There were at the close of the year four hundred and thirty-seven, being forty-seven more than were in the Institution at the close of last year.

There were released on "Ticket of leave" one hundred and eighty-two boys.

Forty-four boys who were out on leave, became indolent, or were unable to furnish satisfactory certificate of character from their employers as the law directs, and their tickets of leave were revoked, and they themselves returned to the Institution.

Homes were procured for thirty-eight homeless boys.

Realizing that the first duty the State owes its wards is to have them properly educated. Special effort has been made to retain the high standard of the schools that they have heretofore attained. Every boy is in school one-half of each day, except during the warm summer months, and then only the primary grades are in session. In addition to the grades during the day the Superintendent has a class in history or geography on Saturday evening in the chapel, composed of all the inmates. Many of the boys when committed have never taken advantage of any opportunity offered them to procure knowledge of books, and it can not be expected that those who have never gone to school any whatever can become very proficient the length of time they remain in the institution; yet their advancement is very rapid, and will compare favorably with that of our public schools.

The farm consists of 225 acres, but there is so much of it waste land along the creek and taken up by buildings and play grounds, there remain only about 145 acres for cultivation and pasture. The yield of the cultivated land was most excellent, except a part of the land that was in Irish potatoes.

The farm is in a high state of cultivation with the exception of some of the upland that needs additional drainage. During the past year about 500 rods of tile were placed in the ground, and as much more is needed before the drainage will be perfect.

The farm is entirely too small. The boys can not engage in any labor better for them and more profitable to the State than that of the farm. The knowledge of farm labor often assists boys to procure a home.

The Board most earnestly recommends the purchase of additional land, if it can be obtained for a reasonable price.

The inmates are divided into ten families, of forty to forty-five boys to each family. To accommodate these ten families, there are ten family buildings, and when the two new buildings are completed, there will be twelve. Each family is in charge of an officer called "house father," who is responsible for the discipline and condition of his family.

The family buildings are all in good repair.

The barn is old and very much out of repair. To prevent its falling and spreading apart, it became necessary to prop on one side. A new barn is absolutely necessary.

We most respectfully ask an appropriation of \$4,000 for the erection of a new one.

The law as amended by the last Legislature that when a boy is released on "Ticket of Leave," he must at stated intervals report his conduct to the Superintendent and furnish certificates of good behavior before he shall have his leave extended, and, making it the duty of the Superintendent to recall any boy who is not conducting himself properly, or has not a suitable home, is much better than before amended, yet we find it impossible for the Superintendent to acquaint himself with the exact condition of every boy. To remedy this, the Institution should have a visitor whose duty it shall be to visit the boys in their homes, examine into their surroundings and conduct, and when he finds a boy who is not properly treated and cared for, or has bad associates, to procure another home for him, where he will be properly treated and educated, giving him an opportunity to become a useful and honest citizen, and if his conduct is not good to return him to the Institution.

The visitor should also while looking after released boys, procure good homes for the homeless boys now in the Institution. In that way good homes can be procured for every homeless boy. Many boys fail after going out and have to be returned, more by reason of their miserable surroundings than on their own account. We most earnestly urge the Legislature to make some provision for the appointment of a visitor; those States that have provided for such an official have obtained most satisfactory results from his labors.

On account of our rapidly increasing numbers and of the small appropriation, it has been with great difficulty that we have been

able to maintain the Institution. A partial failure of our crops would have compelled a large reduction of the numbers.

The number of inmates at the close of the year preceding the Legislature that made the last appropriation was three hundred and forty-seven, while the number at the close of the past year was four hundred and thirty-seven. In view of the large increase in numbers, it will be necessary to make an appropriation of \$10,000 to supply the deficiency that will exist the coming year.

We shall need for next year \$60,000 appropriation for current expenses which is itemized as follows:

Support.....	\$22,000 00
Boys' clothing.....	6,000 00
Furnishing goods.....	1,200 00
Fuel and lights.....	4,500 00
Agricultural implements.....	300 00
Live stock.....	500 00
Officers' salaries.....	12,000 00
Contingent expenses.....	8,000 00
Books and stationery.....	300 00
Repairs.....	4,800 00
Drainage.....	400 00
Total.....	\$60,000 00

The above estimates are based upon a careful calculation of the actual expense under the different items heretofore expended.

As required by section 12 of the act governing the institution, the Board estimates the cost of keeping and caring for each inmate for the ensuing year at \$120.

The following indicates the receipts and expenditures for the past year:

Receipts.

Cash from State Treasury for maintenance, support, etc.....	\$45,000 00
Cash on hand of the gas fund, per last report	163 76
Total	\$45,163 76

Disbursements.

Expenditures for maintenance, support, etc.....	\$45,000 00
Expenditures for putting in gas.....	163 76

Totals	<u>\$45,163 76</u>
--------------	--------------------

Drawn from State Treasury for maintenance, etc...	\$45,000 00
Deduct amount due from counties and reported to State Treasurer.....	<u>\$23,661 59</u>

Total charge of the institution on the State Treasury.....	<u>\$21,338 41</u>
---	--------------------

The items of these expenditures are more fully shown in the report of the Superintendent herewith submitted.

In conclusion, the Board desires to commend the Superintendent and Matron and their assistants in each department, and the worthy Chaplain, John G. Blake, for the earnestness and zeal they have shown in their work in behalf of the wayward and unfortunate wards of the State.

Respectfully submitted,

L. H. BARNETT,

Pres't. Board.

LEWIS JORDAN,

H. N. HELMS,

Commissioners.

INDIANA REFORM SCHOOL FOR BOYS, November 10, 1884.

REPORT OF SUPERINTENDENT.

To the Board of Control of the

Indiana Reform School for Boys:

In this my Fifth Annual Report, and in connection with our Eighteenth Annual Report of the Reform School for Boys, it will not be inappropriate to briefly review the early history of the school.

By the act of March 8, 1867, the institution was established. Hon. Conrad Baker was then Governor of the State, and it was upon his urgent recommendation that the Legislature passed the act above referred to. The first Board of Control consisted of Hon. Charles F. Coffin, of Richmond, Hon. A. C. Downey, of Rising Sun, and Joseph Orr, of Laporte. This Board entered upon its duties April 23, 1867, and in July of that year took possession of the farm that had previously been purchased by the Governor for the use of the school. The erection of the first buildings was at once begun. In October of that year the first Superintendent, Frank B. Ainsworth, entered upon his duties.

January 1, 1868, the Institution was ready for inmates, but none came until January 26, at which time Hendricks county furnished the first inmate. On the 30th of January ten boys were received from the Northern Penitentiary, and on the same day Marion county sent *four* boys as inmates. Thus the Reform School entered upon its work.

LOCATION.

A more suitable site could hardly have been selected. Situated on a beautiful upland nearly a mile southwest of the village of Plainfield, Hendricks county, Indiana, and fourteen

miles west of the State Capital, on probably the best watered tract of land in the State. The school enjoys many privileges which are denied other public institutions.

It may be of some public interest to note the growth of the Institution as indicated by the number of boys present *at the close* of the various years.

First year.....	112 boys
Second year.....	118 boys
Third year.....	217 boys
Fourth year.....	196 boys
Fifth year.....	191 boys
Sixth year.....	216 boys
Seventh year.....	265 boys
Eighth year.....	328 boys
Ninth year.....	324 boys
Tenth year.....	339 boys
Eleventh year.....	383 boys
Twelfth year.....	330 boys
Thirteenth year.....	347 boys
Fourteenth year.....	330 boys
Fifteenth year.....	372 boys
Sixteenth year.....	393 boys
Seventeenth year.....	437 boys

There is one peculiar feature about our school, and it is this: That while the number of inmates has greatly increased the *means* to care for them has been greatly lessened. Below I give the expenditures for the first ten years successively, beginning with the year closing January 1, 1869:

First year.....	\$61,030 65
Second and third years.....	114,182 31
Fourth year.....	42,770 30
Fifth year.....	46,056 61
Sixth year.....	56,244 76
Seventh year.....	57,002 58
Eighth year.....	66,690 51
Ninth year.....	49,879 26
Tenth year.....	57,069 39

During the last of the above years the end of the financial year was changed to October 31, and several thousands of the last amount was to pay debts incurred in former years.

With the above retrospect I come to the year closing with October 31, 1884. Like its predecessor it has been one of great prosperity to our school. The health of the boys has never been better, the work of reformation has never been more thoroughly done, and the industrial features of the school have never been so satisfactory. We have been especially favored with excellent crops; our extensive improvements have been successfully completed, and the year closes with every plan carried out, every hope realized and every one satisfied.

Since the organization of this school 2,057 boys have been admitted. Most of these were committed for criminal offenses, although some were committed simply to give them a home.

CAUSES OF CRIME.

First and foremost among the causes that mar and blast the lives of the young is Intemperance, which like the mighty car of Juggernaut, is annually crushing thousands of the children of our land. If its baneful effects were felt only by the drunken parent the damage would not be so great, but they extend much further. A drunken father drags his offspring with him to ruin. Drunkenness brings squalid poverty and want. Want, resulting from such causes, brings moral weakness and crime. Children of drunken parents are in danger of becoming criminals, and those who are preserved are exceptions. This is the prime cause that fills our prisons and reform schools. But the loss by death of one or both parents is another cause of moral wreck to the young, as the following expressive table will indicate:

Number of boys whose parents were both dead when committed here.....	623
Number of boys whose fathers were dead when committed here.....	326
Number of boys whose mothers were dead when committed here.....	185
Number of boys whose parents were living when committed here.....	923
Total.....	2,057

Table showing the number of boys admitted each year since the opening of the Institution:

During the year 1868.....	112
During the year 1869.....	29
During the year 1870.....	142
During the year 1871.....	37
During the year 1872.....	64
During the year 1873.....	95
During the year 1874.....	113
During the year 1875.....	153
During the year 1876.....	129
During the year 1877.....	117
During the year 1878.....	145
During the year 1879.....	107
During the year 1880.....	149
During the year 1881.....	157
During the year 1882.....	177
During the year 1883.....	149
During the year 1884.....	182
Total.....	2,057

Total number released .	1,566
Total number died.....	54
Number remaining in school.....	437

October.....	24	11
Totals.....	<u>182</u>	<u>182</u>

Number of boys returned to the Institution during the year for doing badly while on ticket-of-leave.....	44
Average number present during the year.....	395
Number of boys present at close of last year.....	385
Number present at close of present year.....	427

Now, as our new buildings are completed, thus giving us an increased capacity for one hundred more boys, it is probable that the increase of commitments will be greatly increased during the coming year.

The following table shows the number of boys and their different ages, at the time of their admittance during the past year:

<i>No. of Boys.</i>	<i>Ages.</i>
5.....	9
17.....	10
17.....	11
18.....	12
31.....	13
25.....	14
40.....	15
19.....	16
6.....	17
3.....	18
1.....	19

Total, 182

The average age of these boys when committed was thirteen and a half years old; while the average time that boys are detained at the school is twenty months.

Number of white boys admitted during the year.....	160
Number of colored boys admitted during the year.....	22
Total.....	182

Number of white boys released during the year.....	161
Number of colored boys released during the year.....	21
Total.....	182

The following is a list of deaths during the year:

	<i>Deaths.</i>
Typhoid Fever.....	2
Consumption.....	1
Accidently killed by falling tree.....	1
Total.....	4

The accompanying report of Dr. Amos Carter, our excellent physician, will explain minutely the above table. In reality there were but two deaths in the school resulting from disease. The case of Charlie Taylor, the little consumptive, hardly belongs to this report, inasmuch as he was sent for and brought home to die, where he would receive better treatment in his last hours. The death by accident took place some miles from the school. I had a coroner's inquest held and the report thereof spread on the minutes of the Board.

In this connection I desire to return my thanks to Dr. Carter for his untiring efforts to preserve the health of the boys. His success has been very marked.

There were remaining in the Institution at the close of the year:

White boys.....	378
Colored boys.....	59
Total.....	437

THE SCHOOLS.

In our school there are three distinct departments: The schools, the manual labor department, and the family instruction. The schools are conducted on the half-day system—the boys who work in the forenoons attend school in the afternoons, and those who attend school in the forenoons engage in some kind of labor during the afternoons. I like this system better than any other that could be devised. It is the only system by which the education of the boys is not neglected.

Our schools are all graded upon the same basis as graded public schools, and our teachers teach two schools each day. Only the common branches are taught, but compulsory attendance enables our schools to secure better results than are attained elsewhere. The primary grades are continued throughout the year. A summer vacation is given to the higher grades only.

REPORT OF FARM AND GARDEN.

Asparagus.....	39 bushels.
Beets.....	505 bushels.
Cabbage.....	18,913 heads.
Carrots.....	50 bushels.
Corn (sweet).....	1,850 dozen.
Corn (field).....	10 acres.
Cucumbers.....	106 bushels.
Cucumbers (pickled).....	72½ barrels.
Celery.....	9,256 bunches.
Crabapple jelly.....	85½ gallons.
Crabapple butter.....	15 gallons.
Crabapple preserves.....	13 gallons.
Gherkins.....	5 barrels.
Kraut.....	21 barrels.
Lettuce.....	110 bunches.
Melons (musk).....	12,880
Melons (water).....	1,721
Mango (pickled).....	100 dozen.
Mango (pickled).....	15 gallons.
Onions.....	450 bushels.
Onion sets.....	21 bushels.
Peas.....	102 bushels.
Potatoes (Irish).....	2,500 bushels.
Potatoes (sweet).....	300 bushels.
Parsnips.....	186 bushels.
Pumpkins.....	50 wagon loads.
Popcorn.....	12 bushels.
Radishes (early).....	37 bushels.
Radishes (winter).....	60 bushels.
Rhubarb.....	1,500 bunches.
String beans.....	409 bushels.
Salsify.....	615 bunches.
Small cucumbers, pickled.....	60 quarts.
Sauce (Chili).....	22 quarts.
Tomatoes.....	505 bushels.
Tomatoes (canned).....	60 quarts.
Tomatoes made into preserves.....	32 gallons.
Tomatoes made into butter.....	159 gallons.
Tomatoes made into catsup.....	26 gallons.
Turnips.....	500 bushels.
Winter beans.....	12 acres.

The foregoing report indicates the character of our crops. Never was a bountiful crop more needed. Without it we could not possibly have properly cared for the increased number of boys. But this crop will soon be consumed and the prospects of a long and cold winter, with our meagre appropriation, are not bright. Our average number of boys for the coming financial year will not be less than 450, and our appropriation is \$21,000 less than it was for one-half that number. I see no way of properly meeting these increased expenses unless the Legislature comes to our relief with an appropriation of at least \$10,000 to supplement the appropriation we now have, and to make our appropriation for the next two financial years \$60,000 a year. There can be no doubt but the number of inmates during those years will be nearly 600.

But few realize that but one-half of the cost of this school is borne by the State. Should the annual appropriations be fixed at \$60,000, the cost to the State Treasury would then be but \$30,000 per annum. No criminal boy can be clothed and educated on less than \$120 per year, the amount fixed by you as the estimated cost of caring for each boy. Upon the basis of 500 boys the appropriation should be \$60,000 per annum.

I trust that the Legislature will come to the rescue of this, the most important of the State schools, and supplement this year's appropriation by at least \$10,000. With this aid we could care for our boys properly until the next regular appropriation could be realized.

Below I submit to you the statement of the monthly expenditures from November 1, 1883, to November 1, 1884:

November, 1883.

Support	\$1,265 11
Boys' clothing	4 35
Fuel and lights.....	460 95
Officers' salaries.....	891 66
Contingent expenses.....	820 77
Repairs and buildings.....	306 90
Total.....	<u>\$3,749 74</u>

December, 1883.

Support.....	\$715 85
Boys' clothing.....	1,972 32
Fuel and Lights.....	307 87
Contingent expenses.....	408 05
Repairs and buildings.....	346 10
Total.....	<u>\$3,750 19</u>

January, 1884.

Support.....	\$707 92
Boys' clothing.....	408 45
Fuel and lights.....	210 50
Officers' salaries.....	857 11
Contingent expenses	868 18
Books.....	36 00
Repairs and buildings.....	636 69
Total.....	<u>\$3,724 85</u>

February, 1884.

Support.....	\$681 95
Furnishing goods.....	142 05
Boys' clothing.....	284 55
Fuel and light.....	185 67
Officers' salaries.....	824 26
Contingent expenses	600 53
Repairs and buildings.....	1,054 84
Total.....	<u>\$3,773 85</u>

March, 1884.

Support.....	\$1,789 53
Fuel and light	658 19
Officers' salaries.....	775 36
Contingent expenses	418 47
Books	50 80
Repairs and buildings.....	57 80
Total.....	<u>\$3,750 15</u>

April, 1884.

Support.....	\$704 03
Furnishing goods.....	83 05
Boys' clothing.....	662 27
Fuel and light.....	335 89
Officers' salaries.....	1,166 03
Contingent expenses	671 59
Repairs and buildings.....	124 65
Total.....	<u>\$3,750 51</u>

May, 1884.

Support.....	\$1,491 27
Furnishing goods.....	157 45
Boys' clothing.....	216 58
Fuel and light.....	76 83
Officers' salaries.....	416 67
Contingent expenses	760 13
Repairs and buildings.....	573 70
Total.....	<u>\$3,692 63</u>

June, 1884.

Support.....	\$1,037 11
Fuel and light.....	266 50
Officers' salaries.....	550 53
Repairs and buildings.....	1,935 45
Total.....	<u>\$2,789 59</u>

July, 1884.

Support.....	\$791 30
Furnishing goods.....	297 30
Boys' clothing.....	838 17
Fuel and lights.....	26 47
Officers' salaries.....	583 16
Contingent expenses	1,229 97
Total.....	<u>\$3,766 37</u>

August, 1884.

Support	\$1,200 41
Officers' salaries.....	573 48
Repairs and buildings.....	1,976 29
Total.....	<u>\$2,750 18</u>

September, 1884.

Support	\$1,452 54
Boys' clothing.....	252 79
Fuel and light.....	95 88
Officers' salaries.....	905 67
Contingent expenses	1,044 40
Total.....	<u>\$3,751 28</u>

October, 1884.

Support	\$1,185 76
Furnishing goods.....	48 84
Boys' clothing.....	381 60
Fuel and light.....	42 37
Officers' salaries.....	780 16
Contingent expenses	441 94
Repairs and buildings.....	869 99
Total.....	<u>\$3,750 66</u>

Statement showing the aggregate receipts and expenditures from November 1, 1883, to October 31, 1884:

TOTAL RECEIPTS.

From State Treasury	<u>\$45,000 00</u>
---------------------------	--------------------

TOTAL EXPENDITURES.

Support.....	\$13,022 78
Furnishing goods.....	728 69
Boys' clothing.....	5,021 08
Fuel and light.....	2,667 12
Officers' salaries.....	8,324 09
Contingent expenses.....	7,267 03
Books.....	86 80
Buildings and improvements.....	7,882 41
Total.....	<u>\$45,000 00</u>

RECAPITULATION.

Expenditures for November.....	\$3,749 74
Expenditures for December.....	3,750 19
Expenditures for January.....	3,724 85
Expenditures for February.....	3,773 85
Expenditures for March.....	3,750 15
Expenditures for April.....	3,750 51
Expenditures for May.....	3,692 63
Expenditures for June.....	3,789 59
Expenditures for July.....	3,766 37

Expenditures for October.....	3,750 66
Total.....	<u>\$45,000 00</u>

EXPLANATORY NOTE.

It should be borne in mind that the counties bear one-half the expenses of each boy, and out of the above amount there should be deducted the amount charged to counties and paid by them into the State Treasury. This amount for the past year was \$23,661.59, thus leaving the actual cost of the School to the State Treasury as \$21,338.41.

The following is a complete list of farming implements, etc.:

Large farm wagons.....	7
Spring wagon.....	1
Carriage.....	1

Buggies	2
Small single buggy.....	1
Carts	2
One-horse wagon.....	1
Sets of harness.....	9
Bean huller.....	1
Cutting boxes	2
Fanning mill.....	1
Shovels.....	39
Rakes.....	53
Hoes.....	34
Spades	39
Pitchforks.....	23
Pick-axes	19
Wheat drills.....	2
Cultivators.....	4
Hay rake.....	1
Mowing machine	1
Reaping machine	1
Corn drill.....	1
Turning plows.....	8
Double-shovel plows	6
Harrows	3
Sulky cultivators.....	2
Wheat cradles.....	4
Scythes	7
Single-shovel plows.....	2

The foregoing statistical tables speak for themselves, and now it remains for me to briefly refer to other features in the work of the past year.

REFORMATORY WORK.

This is undoubtedly the grandest work that has ever been undertaken by the State, and of immeasurably greater importance to society than any other.

To care for the insane, to restore them to sanity, is a noble and a sacred State charity. To teach the blind, to fit them for useful as well as happy lives, is a holy work. To instruct the deaf and dumb in a language that compensates them for the great loss they have sustained, is one of the noblest outgrowths

of Christian charity. To care for the soldiers' orphans and the feeble minded is among the latest and best of our State enterprises, for which all should be thankful. To properly care for the criminal men and women in our prisons is a work of great importance. But the work of the Boys Reform School is greater, far greater, in its importance to the State than any other. To rescue the wayward boys who have started life wrong, and to educate them so that they will make good citizens, is the greatest work in which mankind can engage.

That our school is doing this work and doing it well, is an established fact. *Nearly 1,500 of our boys have passed through the Reform School and are now out in the world. Over 90 per cent. out of that number are leading honest and honorable lives.* A few have fallen, largely because of the miserable atmosphere into which they were thrown after leaving the school. They left the school with bright hopes and noble purposes, but after a time, through the vicious influences emanating from their own homes, they were dragged down.

But the great mass of the boys, released on tickets of leave, have proven the efficacy of the instruction which they received at the Reform School. They are in every county of the State, and some of them are filling high stations in life. Many of them have passed their majority and, legally, are no longer under our control, and yet they have not lost their love for their *alma mater*, as their letters to me have shown. Many of them visit the school to tell the boys still there that "It pays to do right." The State of Indiana has been put to but little expense because of our boys. How would it have been had these 1,500 boys been allowed to continue in their old ways? At least one more prison would have been made a necessity; thousands of hearts would have been made to feel the bitter anguish resulting from their crimes.

To convict one great criminal often costs more than to reform a hundred boys. Then above all is the reflection that these boys have been saved—saved to society, saved from eternal ruin. It is true that "Prevention is better than cure," and yet so long as sin exists there will be criminal boys, and while the efforts of all good people should be aroused to stem the tide of evil, while the State should look well to the means of preventing crime, yet it must always have a large number of criminal youths to rescue. The Reform School will always

have all the work it can do. In view of this it behooves the State to make ample provision for this work, that no means be spared to make it successful.

Does the Reform School reform?

Unhesitatingly I answer "Yes." It is being done here every hour, every day. The results are simply marvelous. In other reports I have given you the name of each boy that has gone out on leave, where he lives, what and how he is doing. To do this has required more space than is now allotted to us, for the numbers have grown rapidly. But this work has been done this year and the results laid before you at your various meetings.

During the past year I have given at least four hours a day to correspondence with boys out on tickets-of-leave, and it is time well spent. This correspondence is now assuming such magnitude that in order to enable me to give proper attention to the boys in the school another clerk is imperatively demanded to take control of this department. My conviction is that these duties should be combined with that of

VISITOR.

Such an officer is needed in all such institutions, whose duty it would be to visit towns and cities where some of our boys are not doing well, and either return them to the school or personally procure them suitable homes and employment. He would not need to make more than fifty or sixty visits a year, and the remainder of his time could be employed in this correspondence. If we had a suitable appropriation I would most earnestly recommend the employment of a suitable person for this important work. The Superintendent could then give all his energies to the work of the School.

NEW BUILDINGS.

The appropriation of the last Legislature of \$5,000 each for four new family buildings has been wisely and carefully applied; and the buildings show for themselves. We asked simply enough to supply the materials. With the labor of the large boys we have erected buildings *worth TWICE THAT AMOUNT*. To do this has required all the labor we could spare from the regular daily work of the school. Our chair shop has been

closed to enable us to accomplish this, but the boys have been taught the most useful of trades, such as brick-making, brick-laying, carpentering, plumbing, painting, plastering, etc. Nine hundred thousand bricks were made this season and laid in the walls or walks, and the institution now has the capacity for all the boys who may be sent to us. But we must have the *means for caring for them*, which, I believe, the coming Legislature will grant. The State should not grow weary in well doing.

MORAL AND RELIGIOUS WORK.

Bro. John G. Blake, of Indianapolis, in his duties as Chaplain is doing an invaluable work among our boys. His extraordinary fitness for this work, his zeal for the reformation of the boys, have produced the most gratifying results. He has the love and respect of every boy and officer, and his stay with us each week from Saturday until Monday is a bright period in each week's work. The change in the lives of hundreds of our boys from wrong doing to well doing is directly traceable to his efforts. I trust the school will long have his services, which year after year grow more valuable.

OUR CATHOLIC BOYS.

The Rev. August Bessoines, Vicar General of this Diocese, still makes his quarterly visits to the Catholic boys and holds two services with them at each visit. Great good has resulted from his visits, as can be noticed in the lives of the boys who receive his instruction. As his work has always been gratuitous, it calls for our *sincerest* thanks, and I trust he will continue his visits for it is one of the valuable aids in our work of reformation.

PRESSING NEEDS.

1. A new barn.
2. Completion of gas works.
3. Introduction of steam heating apparatus.
4. A library building and a choice library.
5. More land.
6. An addition to our boys' kitchen.

DISCIPLINE.

The discipline attained in our school is very gratifying. This makes the work more pleasant to all the officers, and adds very much to the happiness of the boys. During the year we had, for a short time, inefficient officers in one or two of the families, but they were requested to leave a work in which they were failures, and their places have been filled by competent men and women.

PUNISHMENT.

In all Reform Schools there must be some cases of corporal punishment. To control these punishments is one of the most important duties of a Superintendent. Some years ago I outlined the exact treatment of each offense, but I soon found that sometimes a boy received a report which should have a very different *name*. For instance a boy's assertion of innocence would be hastily designated as a "falsehood" or "impudence," when in reality it was neither.

Thus, any outline I could make was imperfect and altogether in the hands of the officer in charge of the boy. A good officer rarely ever committed an error, but, while this was true, it became apparent that I must devise a system by which no punishment could be inflicted without my approval. I had books of coupons printed so they could be carried in the pocket of an officer, and whenever he believed that corporal punishment was necessary he could fill out an application giving the boy's name and tear off a leaf and send to me for approval, modification or refusal. This system works to my entire satisfaction. Below I have indicated the form of one page of these books, the paper of which is cardboard in texture.

No..... REFORM SCHOOL FOR BOYS,
PLAINFIELD, IND.,.....1884. }

T. J. CHARLTON, *Superintendent*:

I desire instructions whether or not to punish

....., No..... Offense.....

.....

My own judgment is that he should receive strokes.

Very respectfully,

.....

Officer.

No..... REFORM SCHOOL FOR BOYS,
PLAINFIELD, IND.,.....1884. }

You are hereby permitted to punish No.....with the strap strokes, but not until you have called him up and kindly shown him the gravity of his offense, and that you are discharging what is, to you, a painful duty.

T. J. CHARLTON, *Supt.*

If the boy desires to see the Superintendent at any time he is allowed that privilege. I frequently send for the boy and investigate his case before acting in the matter and in nearly every other case I require the evidence sent to me in writing, along with the application. In my absence the Assistant Superintendent must approve every case of corporal punishment. Our principal means of discipline is in the adjustment of a boy's deportment standing, which determines his time of detention in the School. Bad conduct, persisted in, prolongs his stay, and good conduct entitles him to promotion. The standing that is given a boy upon his entrance to the School is determined by the crime or offenses which caused his commitment. Thus the most depraved boys start off with a longer period ahead of them than those who are merely "incorrigible." This is as it should be. Extra promotion is freely given for extra good conduct, and extra demotion for unusually bad conduct. Our rule is to deal fairly with every boy, and I have never heard of boys complaining of mistreatment under our present system. I am much gratified to be able to report so favorably on this much abused and yet sometimes essential matter of corporal punishment.

A REFORM NEEDED.

The jail system of Indiana is a burning disgrace to the State. Young boys are incarcerated with old criminals. During vacation of courts this evil is greatly increased. A boy learns more crime in an hour under such circumstances than he would learn in a year under ordinary circumstances. We have now in our hospital a young boy almost dying of a loathsome disease caused while incarcerated in an Indiana jail. Sodom, as a city, was destroyed, but her crimes still exist to an alarming extent among the criminal classes. Our Legislature should make it a grave offense to allow youths to be incarcerated in jails with

older criminals. Let a youths' department be provided in every jail, and let a penalty attach to sheriffs who do not deliver boys committed to the Reform School at *once*, instead of leaving them days and weeks in order to make a larger board bill.

THANKS.

First—To the faithful officers who have so nobly done their duty, and made the past year so fruitful of good results.

Second—To Miss Lodie Reed and her co-workers of the W. C. T. U., for their visit to the boys, bringing each a bouquet of flowers and cheering words of counsel.

Third—To the Society of Friends, for another year's continuance of favors, such as papers, frequent visits and encouraging words for all.

Fourth—To Dr. Amos Carter, our physician, who has so skillfully and successfully guarded the health of our boys; also to Dr. T. E. Evans, our consulting physician, for his aid in extreme cases of sickness.

Fifth—To Hon. W. R. McKeen, President of the Vandalia Railroad, for furnishing free passes when requested, to parties visiting the school to entertain the boys.

Sixth—To you, the Board of Control, for the continuance of your confidence and support. The consciousness that I possess your confidence and esteem has given me strength to go forward in the discharge of the various and responsible duties of my position.

And *lastly*, to the Bountiful Giver of every good gift, who has blessed our work to the good of these boys.

Very respectfully,

T. J. CHARLTON, *Supt.*

PLAINFIELD, OCT. 31, 1884.

To Superintendent T. J. Charlton:

DEAR SIR—The exceedingly good health of the boys the past year calls for briefness in my report. At the close of last year we had two very bad cases of typhoid fever, both mentioned in my report. One, Amos A. Depue, died November 10, 1883, aged 16 years; the other, Joseph Allen, died November 13, 1883, aged 12 years, 11 months and 5 days, of catarrhal pneumonia following the typhoid fever. On April 8, 1884, Charles

Taylor was returned to the school, suffering with phthisis pulmonalis, and died on the 19th day of May, 1884, aged 16 years. Charley had been away from the school about three years and was doing well, but in order that he might have more of the home comforts of life that he required, he came back to die, thus seeking the hospitalities of the home that had given him an impetus to a better life. On June 11, 1884, John Martin, colored, was accidentally killed. Disobeying the order of the officer in charge, he went under a heavy timber that was being raised for loading, and in accidentally falling, it struck him on the head, behind the ear, and crushed the skull. John was 15 years, 5 months and 10 days old. Although we have had more deaths this year, the general health has been better, perhaps, than any year in the history of the institution. During August I made but four visits to the boys.

Mrs. McHatton has been faithful in her duties in charge of the hospital.

Dr. T. E. Evans has been called in counsel when required, and his counsel very much appreciated.

There can be no reasons for the general good health that has prevailed, than the regular habits, healthful food, good clothing and high spirits these blessings insure. It is a noticeable fact that many boys come to the school, spare, pale specimens of neglect, and in a short time change to healthy, robust, good humored and industrious boys. It is very interesting to note the radical change in so many, and conclusive evidence that the Indiana Reform School for Boys, under its present efficient management, is a great blessing to our State.

Respectfully submitted,

AMOS CARTER, M. D.

19.

ANNUAL REPORT

OF THE

DIRECTORS AND OFFICERS

OF THE

INDIANA STATE PRISON SOUTH,

FOR THE

Year Ending October 31, 1884.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

CAPTAIN OF NIGHT WATCH,

WILLIAM ROYCE.

STOREKEEPER,

DAVID M. ALLEN.

HOSPITAL STEWARD,

JESSE D. McCLURE.

DIRECTORS' REPORT.

To His Excellency, ALBERT G. PORTER,
Governor of the State of Indiana:

The Board of Directors of the Indiana State Prison South present to your Excellency their annual report of the condition and management of the prison for the fiscal year ending October 31, 1884.

Detailed statements of the Warden and Clerk, and reports of the Physician and Moral Instructor are hereto attached, to which is asked your careful attention.

We are pleased to state that since the last report of the Board nothing has occurred to affect the good condition of the prisoners; and the excellent discipline that has prevailed during the past two years is still continued, lessening in a large degree the necessity for the severer modes of punishment. It is, therefore, gratifying to the Board to be able to state that the "cat" or lash has not been used during the past year. The conduct and punishment registers show conclusively that the "time law" and "merit cards" are doing efficient work in aiding the Warden to the correct discipline of the prison and giving every inducement to the prisoner to conform to the better modes of conduct and the reformation of life.

The report of the Moral Instructor shows a healthy moral feeling amongst many of the prisoners and a disposition to cheerfully attend to their moral and religious duties. The Library, in this department, contains about fifteen hundred volumes, many of them valuable works; yet a large number are in bad condition and should be replaced by new ones. The Board, therefore, to that end, at its last meeting made an ap-

propriation of two hundred dollars, out of the Library fund, for the purpose of replacing spoiled valuable books and purchasing new ones.

The chapel is a large well-lighted and well-arranged room, and comfortably seats all who attend upon the prison services. But it is, at present, in an unfinished state, and in very cold weather it can not be properly heated. It should be plastered and well-finished so as to make a neat and attractive place of divine worship.

The Physician's report, it will be seen, gives a very favorable health and sanitary condition of the prison, yet, the Board hopes to be able to place this department in better shape in the future if they shall succeed in securing needed improvements through proper appropriations. The trip-hammer and blacksmith shop is a dilapidated building, lying along and near the hospital and old cell houses, and is a great annoyance to the inmates of the hospital, on account of the jar and noise of the machinery, as well as from the fumes of escaping gases from coke and coal used in this shop. This old building should be removed and a new one built at some other point within the prison walls. This the health of the prison demands.

For special information, in regard to the financial and general state and progress of the prison, the Board refers you to the Warden's and Clerk's detailed statements. It will be seen from these, that the income from the labor of the convicts is not sufficient to meet the expenses of the prison, yet it is clearly shown, by these statements, that the institution is run as judiciously and as economically as any other of similar character in the country. The inability, however, of the administrative management heretofore to increase the income of the prison, by an advance of the price of convict labor, is largely from the fact that the prison buildings were not suitable for the purposes of prison manufacturing. They are old and dilapidated; some of them having been built nearly a half century ago, illy constructed, poorly lighted and ventilated, and without any of the advantages that come from modernly constructed buildings. In this respect, as well as in others, many of the prisons in the West have advantages in securing favorable contracts that are not possessed by the Prison South, and are thus enabled to command better prices for labor. The Northern Prison in this State, for instance, has in addition to its more modernly con-

structed buildings, a farm of — hundred acres, a large proportion of which has been used profitably, as means for furnishing provisions for the convicts, thus lessening to a considerable extent the expenses of that prison, while the Prison South owns but six acres, two of which are occupied by the prison barn and lot, leaving only about four acres for garden purposes. In fact, this is all the land owned by the State connected with the Prison South outside the prison walls. Even the ground now used for prison burial purposes does not belong to the State, and its use may be prohibited at any time by its owner. To avoid this, the land, as it lies adjoining the prison grounds and is needed for prison purposes, should be bought by the State.

Since the last report of the Board, the contracts with Rider & Hyatt, employing 50 convicts in the manufacture of cooperage, and Pettingill & Co., 125 convicts in the manufacture of boots and shoes, have expired. On the expiration of these contracts the Board was enabled to re-let, or hire these men at greatly advanced prices. But they were enabled to do this only on condition that the State fit up a building especially for the manufacture of boots and shoes. With this understanding the Board, at considerable expense, added to and remodeled the large brick building formerly occupied by the saddle-tree and cooper shops, thus making it one of the best boot and shoe factories in the State, and enabling the Board to dictate higher prices for the convict labor, as is shown by their late contract with Bryan & Brown Boot and Shoe Company, of St. Louis, Mo. While the State received under the contracts with Rider & Hyatt and Pettingill & Co., only 30 cents per day for 50 men, and 45 cents for 125 men, the State, under the present contract with Brown-Bryan Shoe Company, for the same 175 men, is now receiving 31 cents per day for 50 convicts, 52 cents for 75 men and 60 cents for 50 men, making in the aggregate, during the period of said contract, about \$20,000 in favor of the State over the former contracts. It will be seen from this, that, in order to secure high prices for convict labor, the State must provide suitable buildings and give the proper facilities for efficient and profitable work. Until this is done, it can not be expected that the prison will be self-sustaining. Yet may not the effort to make the prison self-sustaining, be carried beyond what is deemed the true purposes of these institutions? The

objects of prisons are said to be two-fold penal and reformative. While the penalty is supposed to be inflicted as a deterrent, it is presumed that the general treatment of the prisoners shall be such as will have a tendency to make him a better man, that is, better qualified for citizenship, if possible, at the expiration of his term of sentence, than when he entered the prison. The State, the prisoner and the contractor, therefore, are interested parties. The State, however, has a double duty to perform, as it must guard strictly the interest of the State in its financial and social relations, and at all times do justice to both the prisoner and contractor, and at no time do harm to either. Yet it should be borne in mind, that in determining the relation of the prisoner to society, this is not the least responsible part of the State's duty. For while society has a direct interest in the discharged convict, it can not be said to be indifferent to his treatment in prison. It is, therefore, clearly the duty of the prison management to treat the convict with these purposes in view, for at the end of his term it is expected he will again assume those relations to society that his moral fitness will permit. While the contractor, therefore, is entitled to the labor of the convict, the labor is not to be imposed without the conditions that the State must fix, under the law, which will regulate that labor so that "it will be most conducive to the prisoner's welfare after his discharge." It is not clear, then, that State prisons were intended to be profitable investments, in a pecuniary sense, to the State. If, however, they can be made self-sustaining, and the beneficent objects intended secured, the prison management will have failed to do their duty if they do not make it so. This the Board hopes to do in the future if the proper aid is given by the State to place the prison in condition to meet the wants suggested.

The Board has been at considerable expense in making necessary alterations and repairs during the past two years, and as no special appropriations were made by the last Legislature for such purposes the Board was compelled to defray these expenses out of the general fund of the prison. This fund, therefore, should be reimbursed.

The following are some of the expenditures and improvements we desire to call attention to, and ask that recommendations be made for special appropriations to defray these expenses:

The condition of the administrative building was such that it became absolutely necessary to the proper transaction of business to remodel and refurnish, to a large extent, the offices in a manner commensurate with the wants of the State. The heretofore dark, dingy apartments have been transformed into neat and well-arranged offices, where the business of the State is transacted with comfort.

The building fitted up for the boot and shoe contract has been made a valuable building at a reasonable outlay of money, and a special appropriation should be made to meet the cost of these improvements.

The new cell-house having been completed, and no available funds on hand for furnishing the same, the Board deemed it their duty, knowing the necessity for the removal of the prisoners from the corridors of the old cell-house and other places not suitable for sleeping apartments to comfortable and safe quarters, to direct the Warden to furnish the same at as early a day as possible. Consequently, by the 2d day of November, 1883, the cells were furnished with good, substantial iron beds, suitable bedding and other conveniences, and on that day 320 convicts were placed in the new cell-house. A special appropriation is asked to meet the expenses incurred in furnishing these cells.

The administrative department and the new cell-house being disconnected by a few feet, and the guard-hall being very much out of repair, we would recommend that a sufficient appropriation be made to build such connection and do such repairs as will be needed to put all in a good, substantial condition.

The decaying wooden fence that now encloses a large part of the prison, should be replaced with a good and substantial brick wall. Within this wooden enclosure are all of the new shops, in which are employed more than one-half of the convicts. In the present condition it is a standing invitation for escape, and a constant menace to the prison management, and the State should not require its prison officers to take such risks, or give its prisoners such temptations to escape the penalty of their crimes.

It is a matter of but short time, we think, before the State will be compelled to vacate the sewer now in use, on account of the rapidly increasing population building up in the imme-

diate vicinity of its outflow, and already complaints are made of the foul odors arising from its discharge during the hot season. To do justice to a large number of citizens, whose health is endangered and property damaged, we recommend that a new sewer be built that shall empty its discharges into the Ohio river.

Solitary confinement, as a means of repression, is gaining favor with prison officials, and to make that kind of punishment the most effective, such confinement should be isolated and entirely apart from the general cells. The insane convicts should be provided with suitable quarters for their safety and humane treatment, and this prison being unprovided in these respects, the erection of a building as a cell-house, for the purpose of keeping the insane and punishing the refractory prisoners, would be of great importance, and add to the discipline of the prison and comfort of the insane.

The Board desire to again call attention to the claim of Messrs. Perin, Gaff & Co., contractors, at present, for the labor of 300 convicts. They have presented to the Board, through the Warden, a bill for \$6,926.63, and claim payment thereof. The claim is based on the following facts:

When Perin, Gaff & Co., became contractors in this prison, wooden buildings were assigned them for shops, and on the 26th day of December, 1879, one of said shops was destroyed by fire, and they replaced it with a good brick building at their own cost. Again, on the 14th day of July 1881, another frame building, used by them as an annealing room, was, by an unavoidable accident, burned down, and again they built, under the direction of the Board, a good and substantial brick building. The Board advised this course for the reason, that it had no available means at its command for building, and did not deem it advisable to contract a debt for that purpose, and the buildings being needed for the convenient and economical carrying on of their business, as well as to afford them room to work the labor already contracted. Therefore we recommend that the State should reimburse them.

We call especial attention to the Warden's recommendation for an amendment to the "Good Time Law," giving power to the Warden or Directors to restore lost time of prisoners for good reasons, and would recommend that the law be so amended as to remedy the difficulty and give to the prisoner the benefits arising from this humane provision.

We would state, in conclusion, that it is the desire of the Board to so conduct the affairs of the prison as to give to the convicts every privilege and right that is guaranteed to him by the laws of the State and of humanity, and to that end the members of the Board, amongst other things, at each monthly meeting, pass through the entire prison, giving to each convict the privilege of speaking to any one of the Board, on any subject connected with his prison life, and to make such requests and complaints to the Board as he may deem proper; and at this meeting a certain portion of the time of the Board is set apart for the consideration of these complaints and requests, and whenever they are found meritorious they are granted, and if not, the prisoner is so informed. To this custom of the Board may be attributed, in a certain degree, the good discipline of the prison during the past two years.

We desire here, in the conclusion of this report, to thank Capt. A. J. Howard, Warden, for his active efforts in facilitating the work of the Board, and for his uniform kindness and courtesy in the discharge of his responsible duties, and to his deputy and assistants for the efforts they have made to maintain the good order and discipline of the prison. To Capt. M. I. Huette are we especially indebted for the faithful manner he has discharged his duties as clerk, and for the accuracy and neatness of his official work as well as for his assistance in the preparation of this report.

Respectfully submitted,

WM. D. H. HUNTER,

H. V. NORVELL,

J. J. FINNEY.

WARDEN'S REPORT.

INDIANA STATE PRISON SOUTH, }
WARDEN'S OFFICE, December 1, 1884. }

To the Honorable Board of Directors:

For the fiscal year ending October 31, 1884, I would report:
Number of convicts in prison at the beginning of the year, 548; at the close, 580. Daily average number, 570.

The daily average number in prison during 1875, was 456; during 1884, 570. Increase in ten years, 114.

Table No. 11 shows the number of convicts received, discharged and remaining in prison for each year from the organization of the prison in 1822, to the close of 1884. The total received is 8,183. Total discharged, 7,603, as follows:

By expiration of sentence.....	5,041
Pardoned	1,162
Died	420
By mandate of court.....	269
Transferred to House of Refuge.....	25
Transferred to other prisons.....	407
Escaped.....	279
 Total.....	 7,603

The death rate during the whole period was four and eight-tenths per cent., while the death rate during the last nine years, under the present management, was one and one-tenth per cent.

Fourteen per cent. of all the convicts in the prison from the beginning, were pardoned, while less than one per cent. were pardoned in 1884.

Of the 580 in prison, 277 were born in Indiana, 89 in Kentucky, 54 in Ohio, 128 in other States, and 32 in foreign countries.

At the time of conviction, 61 per cent. were thirty years of age and under; 67 per cent. could read and write, 11 per cent. could read only, and 22 per cent. could neither read nor write; 57 per cent. were single, 33 per cent. were married, and 10 per cent. were widowers. At the time of conviction, 24 per cent. admitted that they had been intemperate in the use of intoxicating drinks.

Forty eight were sentenced for life. The average period of sentence below life is four years, two months and seventeen days.

Eighty were convicted of murder in the several degrees, thirty-four of manslaughter, forty-one of assault and battery with intent to commit murder, ten of assault and battery with intent to rape, ten of rape, aggregating 175. Of these twenty were twenty years of age and under, and fifty-eight were twenty-five years old and over twenty; or it may be said that 45 per cent. of the convicts, sentenced for the offenses above mentioned, were twenty-five years of age and under.

For further statistical details, see Clerk's tables.

LEASED LABOR.

The contracts for hire of labor now in force are as follows:

With Samuel H. Perin, manufacturer of shelf hardware, to expire November 1, 1886, at 48 cents per day.....	100 men.
With Frank L. Perin, manufacturer of shelf hardware, to expire December 1, 1886, at 48 cents per day.....	100 men.
With Thomas T. Gaff, manufacturer of shelf hardware, to expire January 15, 1887, at 48 cents per day.....	100 men.
With John R. Gathright, manufacturer of saddletrees, to expire July 15, 1886, at 48 cents per day....	20 men.
With George W. Brown, manufacturer of boots and shoes, to expire July 1, 1889, at 52 cents per day...	75 men.
With Alvin L. Bryan, manufacturer of boots and shoes, to expire April 1, 1889, at 60 cents per day....	50 men.
With Alvin L. Bryan, manufacturer of boots and shoes, to expire July 1, 1889, at 31 cents per day....	50 men.

The Clerk's statements accompanying this report exhibit the receipts and disbursements. The books in his office show all the details. Each voucher is an itemized statement of the disbursements which it represents. The invoice book contains the original bills, numbered to correspond with the vouchers.

The cost of management on the several accounts was as follows:

Provisions and garden.....	\$26,264	31
Fuel and light.....	5,844	16
Hospital.....	700	10
Clothing.....	4,516	45
Bedding.....	605	56
Repairs.....	3,297	45
Furnishing new cell-house.....	2,416	23
New buildings and permanent repairs.....	3,822	70
Team.....	430	14
Discharged convicts.....	4,115	00
Escaped convicts.....	108	50
Officers' salaries.....	25,448	56
All other expenses.....	4,954	99
Total	\$82,524	15

Deduct from the above the items—

New buildings and permanent repairs.....	\$3,822	70
Furnishing new cell-house.....	2,416	23
		6,238 93

And we find current expenditures proper..... \$76,285 22

The daily average number of convicts being 570, we ascertain that the total ordinary expenditures was 36 cents and 6 mills per man per day.

The cost of provisions was 12 cents and 6 mills per man per day.

Deducting from above statement the items of officers' salaries, discharged convicts, furnishing new cell-house, new buildings and permanent repairs, repairs and team, we find that the cost of the support of convicts proper, covering, clothing, bedding, fuel and light, hospital and miscellaneous expenses, was 19 cents and 8 mills per man per day.

Deducting from the ordinary expenses, \$76,285.22, the salaries of the Directors, Warden, Deputy Warden, Clerk, Physi-

cian and Moral Instructor, aggregating \$6,400, which were paid by the Auditor of State, and did not appear in the prison accounts prior to 1877, and we have for the purpose of comparison, the following showing of the cost per man per day, in each of the last sixteen years, in cents and decimals:

For year ending December 15, 1869	55.49
For year ending December 15, 1870	50.46
For year ending December 15, 1871	42.26
For year ending December 15, 1872	46.02
For year ending December 15, 1873	58.68
For year ending December 15, 1874	52.71
For year ending December 15, 1875	47.93
For year ending December 15, 1876	41.13
For year ending October 31, 1877	35.83
For year ending October 31, 1878	29.03
For year ending October 31, 1879	29.55
For year ending October 31, 1880	29.81
For year ending October 31, 1881	35.81
For year ending October 31, 1882	35.90
For year ending October 31, 1883	35.89
For year ending October 31, 1884	33.49

The discipline has been more satisfactory than in former years. The prisoners generally have more cheerfully yielded obedience to the demands of the prison laws, rules and regulations.

The system of registering the conduct of convicts, adopted in February, 1882, continues to produce good results. Each guard in charge of convicts keeps a conduct register in which he enters daily, by merit or demerit marks, the degree of good or bad conduct of the prisoners. The merit marks are 1, 2, 3; the demerit marks, *a* and *b*, signifying as follows: 1, fair; 2, good; 3, very good; *a*, bad; *b*, very bad. In most cases that were formerly reported to the Warden, the guard talks to the offender, and if the prisoner is penitent and promises to do better, the matter is disposed of with the mark *a*. If the guard reports the offender to the Warden and the report is sustained, he gives the mark *b*. In some cases in which the report is sustained, the mark *b* is all the punishment inflicted. The mark *a* depreciates what would otherwise be the daily average percentage for the month, 20 per cent., and *b*, 40 per cent.

A general Convict's Conduct Register is kept in the Warden's office. The names of the prisoners are entered in alphabetical order. At the close of each month the percentages of conduct to which the convicts are entitled, are calculated from the several Guards' Registers, and entered in the proper column opposite their several names, and the Warden issues to each a card certifying to him his daily average percentage for the month, and showing what his privileges are for the succeeding month.

When the percentage is 70 or over, the prisoner is given all the privileges usually allowed convicts. When the percentage is 60 and less than 70, he is deprived of tobacco for one month; when 50 and less than 60, he is also deprived of the privilege of writing to friends; if 40 and below 50, he is not permitted to see friends; below 40 he may be deprived of the use of library books or of candles or other light to read by in his cell, or of any other usual privilege.

The following table shows the number of convicts that made the different daily average percentages of conduct in each of the several months of the fiscal year :

PERCENTAGES.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.
One hundred.	268	263	204	213	209	248	318	334	333	335	342	350
Ninety, and under 100	138	112	178	186	184	193	147	114	128	123	131	104
Eighty, and under 90 .	23	48	45	59	37	35	54	42	35	35	27	28
Seventy, and under 80.	33	35	40	35	39	38	29	40	35	35	20	20
Sixty, and under 70 .	22	17	12	14	34	24	20	38	30	24	26	32
Fifty, and under 60. .	18	17	25	14	18	15	14	16	16	19	17	17
Forty, and under 50 .	12	7	10	5	13	5	7	9	12	11	8	6
Thirty, and under 40 .	5	5	12	5	7	3	3	5	4	3	6	2
Twenty, and under 30.	3	6	3	5	3	5	3	4	4	5	3	15
Ten, and under 20 . .	2	1	6	2	1	. .	1	3	2	2	2	1
Under ten	9	6	19	13	14	9	7	10	10	21	9	16

This table is a fair showing of the conduct of the convicts throughout the year. It is worthy of note, and I feel gratified with the showing, that so great a number made 70 per cent. and over, and were entitled to all their privileges, and that the conduct of the prisoners generally was good.

Very many of the convicts who make the higher percentages appreciate their conduct cards as being evidence of good behavior, and either keep them with some care or send them out to their friends. The General Register is of value in that, with some degree of accuracy, it shows, for future reference, the prison character of the convict. Recently the Governor inquired what the record showed as to the conduct of a prisoner that was discharged more than twenty-four years ago, but for want of proper records it could not be ascertained.

I have endeavored to secure good conduct on the part of the prisoners, or in other words their ready and cheerful submission to the constraints imposed by the prison laws and regulations, and to the demand that they shall labor diligently, as far as practicable, without resorting to physical punishments. "The Good Time Law" adopted by the last session of the General Assembly has been a great help in this direction. Yet the fact remains that there are those who will not be law abiding convicts until subjected to physical punishment or brought under the deterrent influence of the same. During the year the only punishments inflicted of this character have been by confinement in cell on bread and water diet, shackled to the door during working hours, or without the latter, with only a board for a bed. This punishment is in lieu of the whip as formerly in use here. After one year's experience in the disciplining of convicts without using the lash I may give it as my opinion that the whip would be more effectual in a small percentage of the cases, but I greatly prefer to get along without using it at all. Besides there is an overwhelming public sentiment that revolts at the idea of subjecting even a convict to the degradation of being whipped on the bare back.

Under "The Good Time Law" the Warden is authorized to deprive a convict of good time for violation of the rules and laws of the prison, and it is provided that he "shall not be allowed to restore to the convict the time forfeited." The Warden having taken action in a case and made up the record can not review it, neither has the convict a remedy by appeal

to the Directors. In some cases the Warden may deprive the convict of months or years of his commutation, and afterwards find that the punishment was excessive; but there is no remedy for the convict. The action of the Warden, whereby a convict's term in prison may be extended for days, weeks, months or years, is so important, in its bearing upon the prisoner, that the Directors, or they and the Warden, should have the authority to review and take action in the premises. Besides, there are many cases of convicts, who, in the early parts of their terms, violate the rules and laws, thereby losing good time, who, afterwards, by uniformly good conduct, deserve to have their forfeited time restored, and it would be in the interest of discipline to restore it. Therefore I think it plain, that the law should be so amended as to confer the authority to restore forfeited time upon the Directors and Warden.

It is due to the Deputy Warden, Clerk and other assistants to say that all have been zealous and careful in the discharge of their several duties. The Physician, Dr. W. F. Sherrod, and Moral Instructor, Rev. L. F. Cain, have not only rendered the most efficient professional services, but have constantly labored to assist me in promoting the general welfare of the convicts, for which I am sincerely thankful.

I beg to assure the gentlemen of the Board of my high appreciation of the advice and aid they have severally given me in the discharge of the difficult and often delicate duties of my office.

Respectfully submitted,

A. J. HOWARD,
Warden.

PHYSICIAN'S REPORT.

INDIANA STATE PRISON SOUTH, }
JEFFERSONVILLE. }

To the Hon. Board of Directors:

GENTLEMEN—In compliance with law and the usual custom, I have the honor to submit the following report of the medical department of this institution for the year ending October 31, 1884: We have had nine deaths during the year; all but three came into the prison with broken down constitutions; four were admitted to the hospital on their arrival. As to the cases met with and treated during the year, I would respectfully refer you to the tabulated statement appended. You will observe that six out of the nine fatal cases were from diseases of the lungs. No matter what our accommodations may be, we must expect a large per cent. of deaths from consumption. This disease is a scourge to all prisons. Dr. Baly, formerly physician of the Millbank penitentiary, London (to which I referred in a former report), states that in a period of eighteen years in that prison nearly half the deaths, and half the pardons on medical grounds, were due to consumption, and the ratio of mortality in that prison being nearly four times greater than that of the metropolis, as it regards this malady. It is reasonable to suppose that the health of many of the prisoners should be improved by the regulations here enforced. The diet is abundant, nutritious, and a liberal variety, cleanliness of person, the regular hours devoted to work, the time allotted to rest, must tend to improve the health of those who have previously led reckless and dissipated lives, provided no organic disease become developed before their admission. There are many marked cases at this time in the prison where this improvement has occurred.

In a former report I called attention to the hospital and its surroundings. On the southwestern side is the trip-hammer shop, with the very heaviest caliber of hammers. The thundering of these hammers are continuous, and of such force that the building is kept in an oscillating condition. When the wind is from the southwest the fumes and smoke are blown into the hospital. I would recommend that this building be removed at an early day.

I further call your attention to the room immediately under the hospital. The heat from the furnace and boilers, with fumes of the wash-house, render the atmosphere in the hospital unfit for the sick.

In conclusion, gentlemen, permit me to return my thanks for the kindness I have at all times received at your hands. I am also under obligations to the officers of the prison for their aid as well as their solicitude for the health and comfort of the unfortunate beings committed to our charge.

MORAL INSTRUCTOR'S REPORT.

INDIANA STATE PRISON SOUTH, }
JEFFERSONVILLE, December 1, 1884. }

To the Honorable Board of Directors:

GENTLEMEN—In compliance with the laws of the State I submit to you my second annual report, as Moral Instructor of this institution. It affords me much pleasure to be permitted to report to you the improvement in this department over which I have had supervision during the year. We have been permitted to see the religious interest steadily increase until at present it has reached a degree not witnessed here since the "Great Prison Revival" of nine years ago. Our chapel exercises of late have been characterized by much spiritual interest throughout. It is our desire, and we are working and praying to the end, that this interest now manifest may increase until it shall reach every heart in the prison, and finally result in the salvation of very many souls. There have been quite a number who publicly declared during the year that they had found Christ in the pardon of their sins and were henceforth resolved to lead a better life. How many of those are genuine I can not tell, about the same per cent., I am led to believe, as are genuine of the professed conversions in the outside world. I am positive that some are sincere, as their everyday deportment shows. One man was converted here, baptized, joined the "brotherhood," and when he left I gave him a letter, and to my certain knowledge he deposited it in a city church and is now a very useful member. I cite this to show that labors of Christian love are not wholly void of fruitful results, even when bestowed upon this class of the world's unfortunate. The general conduct of the prisoners is remarkably good. It

is true, there is violation of the prison law, but this violation is by the few, and by these over and over again, while the many are of the class who deplore the conduct of the violators.

THE PRISON SUNDAY SCHOOL.

The Sunday School about numbers the civil and religiously inclined population in the prison, and, possibly, is the greatest auxiliary to spiritual success connected with the Moral Instructor's work. In our annual report of last year we were able to report an increase of 121 in the general average of attendance over any previous year in the prison's history.

I am glad to be able to report an increase of 41 on the general average of last year, making the general average 393 for the year just closed. The greatest number at any session was 405, and the smallest number 379, thus showing a wonderful regularity of attendance, it being voluntary with them whether they shall attend. The interest in our Sunday School became so intense that its fame spread to the outside world, and attracted large numbers from Louisville, New Albany, and Jeffersonville, to witness its sessions and hear the reviews. I am still assisted in this work by an efficient corps of teachers, gentlemen and ladies, from New Albany and this city. While opposed by some professed Christians on the outside, they have the approval of a clear conscience, the blessings of many mothers and heart-broken wives, and in the end will receive a crown of everlasting life. We have an organized choir which meets every Thursday evening for practice, under the direction of our organist, an estimable young lady of this city. Through the efforts of my teachers and sympathizing friends, we have had a paper or tract for all who attend Sabbath School, at almost every session. Each prisoner is furnished a Berean Lesson Leaf.

THE PRISON LIBRARY.

Our library contains about two thousand volumes of reading matter, histories, novels, works of law, medicine, and theology. Many of these books are comparatively new, and are in good condition. I am now preparing an order for two hundred dollars worth of new books, which will put the library in very good condition. These books are under my supervision, and

are distributed by my librarian, so that each man has a change of books every two weeks. The books are kept covered with clean paper, and are in good condition. I have acknowledged the receipt of valuable contributions to the library from the Hon. John C. Shoemaker, of the Indianapolis Sentinel, Rev. E. A. Beaman, of Cincinnati, Ohio, and Hon. M. M. Stockslager, Member of Congress. Any contribution to the library will be cheerfully accepted and duly noted. Each man is furnished with a Bible or prayer-book. It is highly gratifying to see the disposition of most all the prisoners to read all the literature they can get in their possession.

DEATHS.

Nine deaths have occurred in the prison during the year. Six of this number were by me interred in the prison graveyard, with appropriate ceremonies, and the other three were sent home to their friends. Two men were sent here during the year for trivial offenses, both of whom were so nearly dead with consumption, that it took the assistance of two men to get them into the hospital. One of these was buried in less than two weeks, and the other will not survive sixty days of prison life, and is sixty-six years old. I regard such conduct on the part of the courts disgraceful in the extreme. Others have died when within a few months of the expiration of their sentence, of the same dread disease, despite the entreaties of friends, county and prison officials, that they might be permitted to die in the homes of their friends.

CONCLUSION.

I want to say, in conclusion, that this has been a very pleasant year to me in my work. I believe I have the good will of every prisoner in the institution. I also believe my labors will not return to me void in the end. My associations with the officers and guards have been most pleasant throughout. Every request to the Warden, Deputy Warden, Clerk, as well as every other officer and guard of the institution, has been responded to with a hearty good-will. The Warden has ever been ready to assist me in any step for the advancement of the

interests of the work of my department. I thank you, gentlemen, for the trust you have placed in my hands and the friendly counsel given me in the performance of my duties, and the Christian tendencies of your administration toward the unfortunate under our care.

Very respectfully submitted,

LEANDER F. CAIN,
Chaplain.

CLERK'S REPORT.

INDIANA STATE PRISON SOUTH,
JEFFERSONVILLE, IND., Dec. 1, 1884. }

To the Honorable Board of Directors:

GENTLEMEN—I herewith submit to your consideration a full statement of the financial and statistical operations of this prison for the fiscal year ending October 31, 1884.

Very respectfully,

MATTHEW I. HUETTE,
Clerk.

REPORT OF ANDREW J. HOWARD, WARDEN.

ANNUAL REPORT

OF THE

DIRECTORS AND OFFICERS

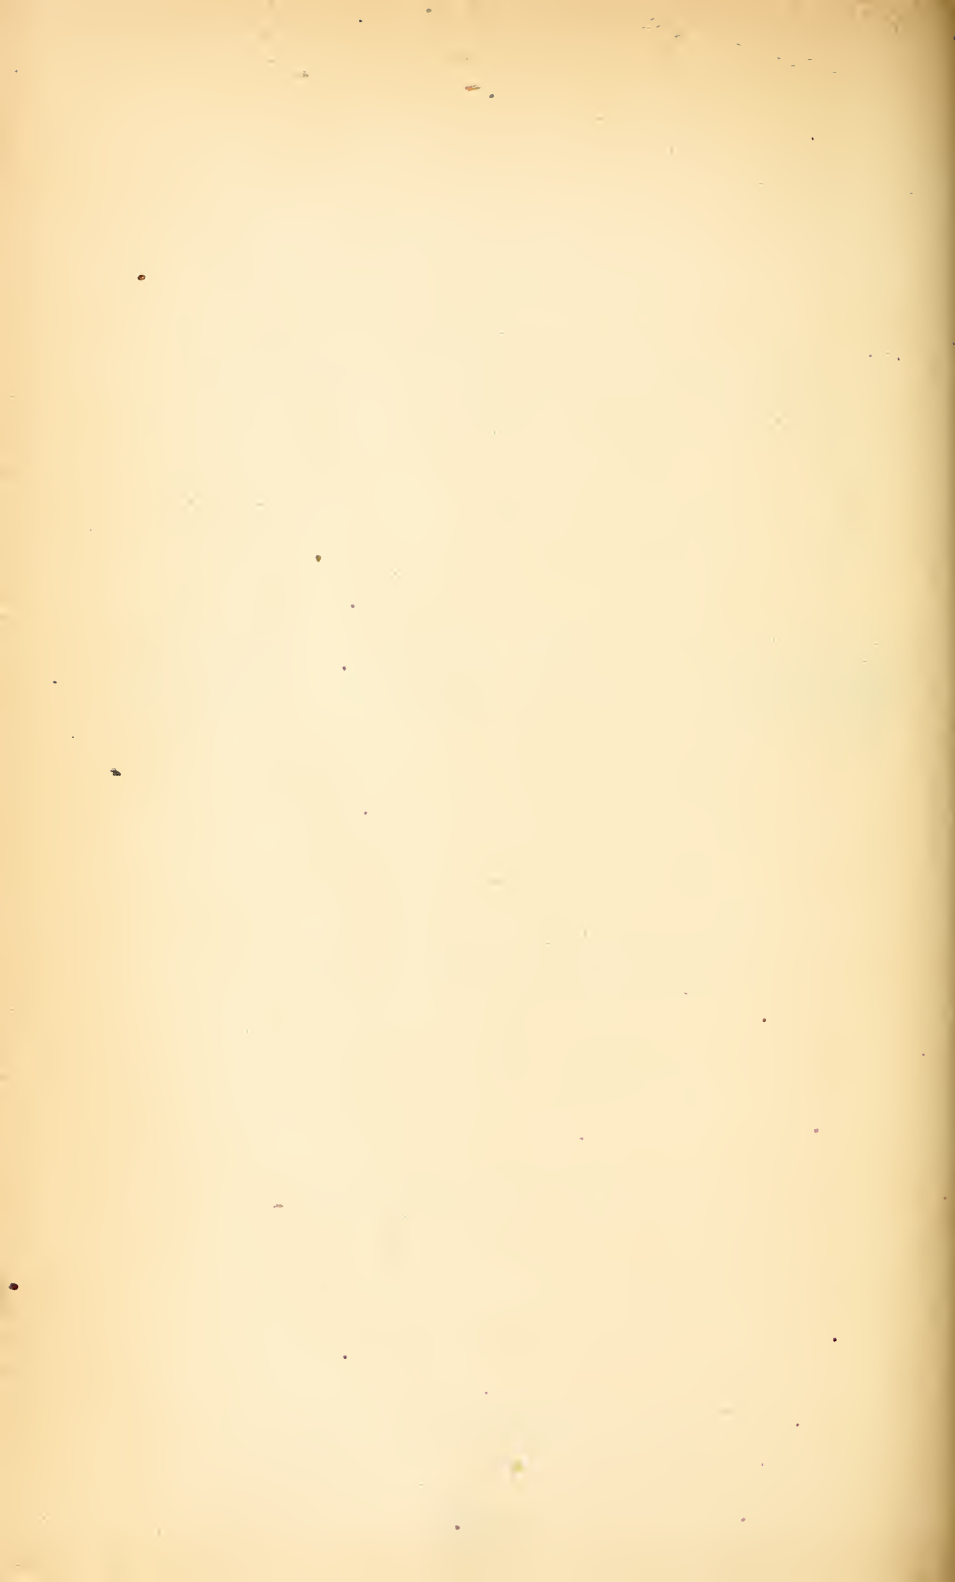

OF THE

INDIANA STATE PRISON NORTH,

FOR THE

YEAR ENDING OCTOBER 31, 1884.

TO THE GOVERNOR.

EXECUTIVE DEPARTMENT, }
STATE OF INDIANA. }

Received December 17, 1884, examined by the Governor, referred to the Auditor of State for verification of the financial statement, and delivered to the Secretary of State to be filed and preserved in his office and printed under direction of Commissioners of Public Printing.

F. H. BLACKLEDGE,
Private Secretary.

INDIANAPOLIS, December 22, 1884.

His Excellency, ALBERT G. PORTER, Governor:

SIR—The books of this office have the following exhibit of the financial transactions of the State Prison North, for the fiscal year of 1883-1884:

Maintenance account, paid	\$102,700 87
Earnings account, received.....	102,700 87

Yours respectfully,

JAS. H. RICE,
Auditor of State.

DIRECTORS' REPORT.

INDIANA STATE PRISON NORTH, }
MICHIGAN CITY, December 10, 1884. }

To *His Excellency*, ALBERT G. PORTER,

Governor of Indiana:

We have the honor to submit to your favorable consideration our annual report of the condition and management of the State Prison North, for the fiscal year ending October 31, 1884, together with the reports of the Warden, Clerk, Physician, and Moral Instructor, which severally are herewith respectfully submitted for more detailed and specific information.

We are gratified to be able to report that during the year the prison has been self-sustaining, including in the expenditures necessary repairs and improvements.

The receipts and earnings for the year have been...	\$103,047 26
The expenditures, including officers' salaries, together with expenditures for repairs and improvements amounting to \$4,417.27.....	95,844 55
Leaving a balance of.....	\$7,202 71

The number of prisoners has increased from 566, at date of last report, to 689.

The convicts are all employed at remunerative rates—for full and complete details in relation thereto, reference is made to the report of the Warden.

Contractors promptly meet the requirements of their several agreements, and all seem satisfied with the discipline of the prison and the amount of labor performed by the convicts.

The health of the convicts during the year has been good ; for full information pertaining thereto, we refer to the report of the Prison Physician.

We beg leave to report with all the force and earnestness at our command, that there is great need for proper facilities for bathing, which should be provided as soon as possible. We recommend the construction of a suitable bath-house, and connected therewith a wash and dry-house for laundry purposes.

A due regard for humanity demands that better provision be made for insane prisoners.

The condition of this class of prisoners demands better treatment than can be given them under existing circumstances.

Provisions should either be made for their removal to the State's Asylum for the Insane, or a suitable building should be provided for them, to the end that medical aid and general treatment such as their unfortunate condition requires.

We would direct special attention to the matter of providing an adequate Prison Library.

We found the so-called Prison Library, small, much worn, and in such general condition as scarcely to deserve the name of library.

During the latter part of the last and the present fiscal year, the Board has assumed the responsibility of making additions thereto to the value of \$348.64—would gladly have made much larger additions to the library had the means been at its command.

There is a general disposition among the prisoners to read while confined in the cells.

Reading matter is the prisoner's companion, and if provided therewith, in addition to the permanent benefit which prisoners derive therefrom, it proves a strong moral force in aid of discipline, by keeping the mind healthfully employed during the very time of the prisoner's life when there is the strongest tendency to restlessness and evil generally.

We recommend that ample provision be made for the creation and maintenance of a suitable library for the prison, not doubting that in all regards it will prove a wise investment.

We would direct your attention especially to that part of the report of the Warden referring to the heating facilities of the prison. We fully concur in the statements and recommendations of the Warden in relation thereto.

We would also especially call your attention to the matter of disposing of the eighty (80) acre tract of land in Porter county, and the reinvestment of the proceeds, as fully set forth in the Warden's report. Additional lands near the prison are greatly needed, and would prove a saving to the State.

For a full and complete itemized statement of the receipts and expenditures, as also the number of prisoners received and discharged during the year, the number committed from each county of the State, in what State born, the nationalities of convicts, the cost of feeding and clothing each convict per day (in separate items), and for a general fund of information, detailed and general, with reference to the practical workings of the prison, reference is made to the very full and comprehensive report of the Warden.

We are gratified to be able to state that the act of the last Legislature known as the "Good Time Law" has proved to be a valuable moral force in the administration of the prison. We think it safe to say that the good effects of the law, through its encouragement to good behavior on the part of convicts exceeds the expectations of the most sanguine friends of the measure.

It would be difficult to accord undue merit to Warden James Murdock, Deputy Warden Thomas E. Donnelly, and their assistants, for the high order of discipline of the prison, which has contributed so largely to its prosperity and general satisfactory condition.

Our thanks are due, also, to the physician, Dr. R. H. Calvert, for the excellent sanitary condition of the prison, and to our estimable moral instructor, J. J. Faude, for his faithful and efficient labors, and to the clerk, J. D. Cowdin, for the neat, correct and business-like manner in which he has kept the accounts of the prison.

Respectfully submitted,

GEORGE MAJOR,
JOHN C. SHOEMAKER,
HENRY MONNING.

WARDEN'S REPORT.

NORTHERN INDIANA PRISON, }
MICHIGAN CITY, December 10, 1884. }

*Messrs. George Major, John C. Shoemaker
and Henry Monning, Directors:*

I have the honor to submit this my annual report of the management for the fiscal year ending October 31, 1884, as follows:

The average monthly number of prisoners was.....	647
There were in prison November 1, 1883.....	566
Received from courts.....	418
Witness returned.....	1

Total.....	985
Discharged by expiration of sentence.....	274
Remanded.....	5
Pardoned by the Governor.....	5
Pardoned by the President.....	2
Escaped.....	1
Died.....	8
Sent to Reform School.....	1

Total.....	296
------------	-----

Number remaining in prison October 31, 1883 689

The receipts and earnings of the prison for the year are as follows:

From labor account.....	\$95,767 12
From sales account.....	6,014 74
From visitors' fund.....	893 90
From rent account.....	120 00
From U. S. convict account.....	251 50

Total receipts and earnings.....	\$103,047 26
----------------------------------	--------------

The disbursements for the year are as follows:

Discharged convict account.....	\$ 3,855 00
Guards' account.....	24,857 26
Provision account.....	41,002 22
Clothing and bedding account.....	5,425 14
Fuel account.....	2,773 25
Lights account.....	2,286 24
Improvements and repairs account...	4,417 27
Drugs and medicines account.....	1,035 24
Stationery.....	230 35
Expense	2,020 37
Advertising	146 00
Laundry	492 20
Table ware.....	214 19
Officers' salary.....	6,400 00
Insurance	223 35
Household furniture.....	292 07
Escaped convict.....	3 00
Library	96 40
Attorney fees.....	75 00

Total disbursements.....	95,844 55
--------------------------	-----------

Excess of receipts over expenditures	\$7,202 71
--------------------------------------	------------

Balance on hand Oct. 31, 1883.....	13,504 19
------------------------------------	-----------

Leaves balance on hand Oct. 31, 1884	\$20,706 90
--------------------------------------	-------------

Amount due prisoners account, over- work and cash received.....	1,854 19
--	----------

Total amount due.....	\$22,561 09
-----------------------	-------------

For the details of the financial and statistical condition of the prison reference is here made to the report of the clerk, Joseph D. Cowdin.

To deduct from provision account which is.....	\$41,002 22
---	-------------

The sales to prisoners during the year and receipts from boarding house..	\$6,014 74
--	------------

And value of provisions on hand as per inventory Nov. 1, 1884.....	3,190 65
---	----------

Total	9,205 39
-------------	----------

Leaving.....	\$31,796 83
--------------	-------------

The monthly average number of men being 647 makes the cost of feeding each convict per day, in 1884, thirteen and a half cents or four and a half cents a meal. The average cost of clothing each convict per day two and one-third cents. The average cost of fuel and lights for each convict per day two and one-tenth cents. And the average cost of each prisoner per day, in 1884, including salaries of officers and guards, provisions, repairs, clothing, fuel and lights, medicines, gateage, and all other expenses, was thirty-six and seven-tenths cents. The excess of receipts over expenditures for the last year \$7,202.71, and provisions on hand as per inventory \$3,190.65. Shows a net earning of \$10,393.36, over all expenditures.

The convicts have worked during the past year on an average of nine hours and twenty minutes each day. On the forty acres of tillable land connected with the prison we have raised large crops of vegetables, consisting of eight hundred bushels of potatoes, four hundred bushels radishes, one hundred bushels of beets, three thousand pounds of lettuce, two hundred and fifty bushels of tomatoes, thirty barrels of cucumber pickles, twenty thousand heads of cabbage, fourteen tons of hay, and three hundred and fifty bushels of rye.

The following will show the present condition of contract labor:

J. & J. R. WINTERBOTHAM, COOPERAGE, BUGGY AND WAGON MANUFACTURING.

Twenty-five men at 57 cents a day, expiring Jan. 16, 1885.

Fifty men at 63 cents a day, expiring May 18, 1887.

Seventy-five men at 63 cents a day, expiring April 1, 1888.

Twenty-five men at 65 cents a day, expiring Oct. 12, 1887.

Twenty-five men at 57 cents a day, expiring June 17, 1889.

FORD, JOHNSON & CO.

Fifty men at 46 cents a day, expiring Jan. 16, 1885.

Forty men at 55 cents a day, expiring June 7, 1887.

Twenty-five men at 55 cents a day, expiring July 19, 1887.

Sixty-five men at 37½ cents a day, expiring March 15, 1885.

Thirty men at 70 cents a day, expiring Feb. 15, 1889.

Forty-five men at 55 cents a day, expiring June 17, 1889.

Twenty-five men at 55 cents a day, expiring Aug. 16, 1889.

GEO. E. P. DODGE & CO.

One hundred men at 60 cents a day, expiring Jan. 16, 1885.

Fifteen men at 67 cents a day, expiring Feb. 15, 1889.

Fifteen men at 55 cents a day, expiring Feb. 15, 1889.

The discipline of the prison remains good. The good-time law, passed by the last General Assembly for the benefit of convicts, we are pleased to say, has an excellent effect on the discipline.

I have procured an abstract of title to the eighty acres of land in Porter county belonging to the State, and recommend the sale of same, and the proceeds invested in pasture land near the prison.

The boilers are not sufficiently large to furnish steam for heating purposes in extreme cold weather, neither are the pipes so arranged as to heat such large buildings, and recommend the purchase of new boilers, and that the piping be overhauled and substituted with modern improvements, which would be a great saving of fuel and add comfort to the prisoners.

Your attention is again called to the much-needed want of a bath, wash and dry-house, and a solitary prison for the insane, incurable and refractory prisoners.

The sanitary condition of the prison is good. For further information I refer you to the report of R. H. Calvert, prison physician.

For the moral and educational condition of the prison, reference is made to the report of J. J. Faude, moral instructor.

To Deputy Warden Thomas E. Donnelly, Clerk Joseph D. Cowdin, Prison Physician R. H. Calvert, Chaplain J. J. Faude, the steward, Robt. Sutton, and assistants, I return my thanks for the efficient manner in which they have performed the several duties entrusted to them, and to you, gentlemen of the Board, I return my sincere thanks for all the courtesies extended to me at your hands.

I remain your obedient servant,

JAMES MURDOCK,
Warden.

PHYSICIAN'S REPORT.

HOSPITAL DEPARTMENT, }
INDIANA STATE PRISON NORTH, }
October 31, 1884. }

GENTLEMEN—I have the honor to submit this, my second annual report for the fiscal year ending October 31, 1884:

There have been 8 deaths during the year, as follows:

NAME.	AGE.	DATE OF DEATH.	CAUSE OF DEATH.
Charles Clark.....	28...	February 18.....	Phthisis pulmonalis.
Burl Artis.....	20...	February 21.....	Phthisis pulmonalis.
Charles Reed, (col)...	24...	June 16.....	Ascrites.
George Shepler.....	40...	August 7.....	Congestive fever.
Frank Parker	22...	September 9.....	Secondary syphilis.
A. E. Teal.....	67...	September 9.....	Ulceration of bowels.
B. Pickett	42...	October 1.....	Consumption.
William Reece.....	51...	September 16 ...	Consumption.

The last named was received in the last stage of consumption, and only lived 48 hours after received.

The diseases are those incident to the climate, while a great many are brought here unfit to perform any manual labor, suffering from consumption, venereal diseases and crippled.

The sanitary condition of the prison is constantly and carefully attended to. The yard, sewers and surroundings generally have been kept in good condition, which, with a liberal supply of well-cooked food, has resulted in the general good health of the convicts.

I would recommend to your earnest consideration the need of a suitable bath house, which would be a matter of economy to the State as a sanitary measure in the prevention of disease.

In concluding my report, allow me to tender my thanks to the officers and guards for their uniform kindness and courtesy in aiding me in the performance of my duty.

Respectfully submitted,

R. H. CALVERT,

Physician, N. I. P.

MORAL INSTRUCTOR'S REPORT.

To the Honorable Board of Directors,

Indiana State Prison North:

GENTLEMEN—I have the honor of submitting my second annual report as Moral Instructor.

Services have been held in the chapel without intermission on the Sundays throughout the year, and also on Christmas Day. All requests for aid and counsel, coming from the prisoners, have been granted, and such private visitations have been made as seemed to further the work of moral instruction. I have also granted permission and requested Roman Catholic and Protestant ministers to give spiritual advice to convicts of their respective faiths. A school is maintained with weekly sessions for instruction in the rudiments of an education.

Aside from these means the prison has no facilities for the work of elevating the habits, tastes and inclinations of the prisoners. Without such facilities, the work of reformation can not make the progress that should be made if "the powers that be," more especially the Legislature of the State, would perform their whole duty in this important branch of government.

The convicts are imprisoned for punishment and for the safety of society. It is, however, a short-sighted policy to neglect such means of reformation as would, even to a slight degree, prevent a recurrence of crime on the part of those once imprisoned, and give them back to the world better than they entered.

Books are among the most useful means to such ends. Our prison library has too few volumes to permit each convict the

use of a book more than one week in four. In comparison with the prisons of surrounding States we stand lower than the lowest in the number of volumes in the library. The prisoners constantly complain of the scarcity of reading matter, and that time hangs heavy on their hands evenings and Sundays. Whether it is a greater wrong to deny food to the body, than to refuse it to the hungry mind, when it may be provided for both, is a question that will be answered in the affirmative only by the superficial and the base. We need a thousand volumes where we now have a hundred.

Lectures, night schools, and entertainments of an elevating character are also effective reformatory and moral forces, as is witnessed by those who have had long experience in penal institutions. To secure such we need additions to the force of guards, since the night or relief force is only adequate when supplemented by the lock and bar of each cell. A slight expense by way of fitting up the "chapel" for such uses would also be required.

Prisoners oftentimes leave the institution with resolutions of amendment of life, but break them before leaving the city. The brothel and the saloon afford a cordial, though not disinterested welcome, and present a ready way in which to spend the time between their discharge from prison and the departure of their trains. Part of this difficulty could be obviated by two rules: One requiring transportation, or clothing, or both, to the extent of fifteen dollars in value to be furnished the discharged prisoner—but no money, or so little, that riotous living would be impossible with that money; another, requiring convicts to be detained within the prison until a short time before the departure of their trains. As for the remainder of this difficulty it is hoped that voluntary efforts will one day be made by citizens of the State to provide a place of refuge, and some means of gaining a livelihood for those who have no fixed homes and no steady occupations, but have a mind to work.

I would again call your attention to the neglected condition of the chapel. Associated with all that is highest and best in the lives of men, and especially in the life of the prisoner—the worship of God—it should convey to those worshipping therein, as its present meagre furnishing does not, the grandeur and sublimity of the Supreme Being, whose earthly tabernacle it is. In its present condition suggestions of "Bleak House" are

most forcible. For the present, I would suggest the adornment of the walls, and the more ample furnishing of the platform which serves as "pulpit," while other improvements might be made later on as the means at disposal would permit. A cornice round about the room would destroy the echoing resonance now so trying to speaker and hearers.

I am indebted to the Warden and other officials for courtesy and aid in the performance of my duty, and tender to the gentlemen of the Board my grateful acknowledgements of their willingness and promptness in co-operating with me to the extent of their ability.

Respectfully submitted,

J. J. FAUDE.

TRINITY RECTORY, Michigan City, Ind., Oct. 31, 1884.

CLERK'S REPORT.

CLERK'S OFFICE, NORTHERN INDIANA PRISON,
MICHIGAN CITY, December 10, 1884. }

*Messrs. George Major, John C. Shoemaker, Henry
Monning, Board of Directors Northern Indiana Prison:*

I have the honor to submit to you a full statement of the financial and statistical operations of the Northern Indiana Prison, for the year ending October 31, 1884.

I remain your obedient servant,

JOSEPH D. COWDEN,
Clerk.

TABLE A.
